Grown Up Digital: How the Net Generation is Changing Your World Don Tapscott
 2008-11-16 SELECTED AS A 2008 BEST BUSINESS BOOK OF THE YEAR BY THE ECONOMIST
 The Net Generation Has Arrived. Are you ready for it? Chances are you know a person between the ages of 11 and 30. You've seen them doing five things at once: texting friends, downloading music, uploading videos, watching a movie on a two-inch screen, and doing who-knows-what on Facebook or MySpace. They're the first generation to have literally grown up digital--and they're part of a global cultural phenomenon that's here to stay. The bottom line is this: If you understand the Net Generation, you will understand the future. If you're a Baby Boomer or Gen-Xer: This is your field guide. A fascinating inside look at the Net Generation, Grown Up Digital is inspired by a \$4 million private research study. New York Times bestselling author Don Tapscott has surveyed more than 11,000 young people. Instead of a bunch of spoiled "screenagers" with short attention spans and zero social skills, he discovered a remarkably bright community which has developed revolutionary new ways of thinking, interacting, working, and socializing. Grown Up Digital reveals: How the brain of the Net Generation processes information Seven ways to attract and engage young talent in the workforce Seven guidelines for educators to tap the Net Gen potential Parenting 2.0: There's no place like the new home Citizen Net: How young people and the Internet are transforming democracy Today's young people are using technology in ways you could never imagine. Instead of passively watching television, the "Net Geners" are actively participating in the distribution of entertainment and information. For the first time in history, youth are the authorities on something really important. And they're changing every aspect of our society--from the workplace to the marketplace, from the classroom to the living room, from the voting booth to the Oval Office. The Digital Age is here. The Net Generation has arrived. Meet the future.

Prick with a Fork Larissa Dubecki 2015-09-01 If a bad attitude could be subject to copyright, my ten years as a waiter would have left me obscenely wealthy. Working the floor, I was the Kerry Packer of passive aggression. Sullen insolence was my personal trademark, diligently honed and perfected over time. For a long list of perceived diner slights - ranging from ordering the tomato sauce separately to the fries, to calling me 'dear' - I could perform a Jekyll and Hyde switch into the most perfunctory, robotic and joyless server the world has ever seen. If I didn't like a group of people I would endeavour to do my very best to ensure that the only thing left of their night was a cold, dry husk. That I regularly used something I privately referred to as the 'Dead Eyes' should reveal plenty. Before she was one of Australia's top restaurant critics, Larissa Dubecki was one of its worst waitresses. A loving homage to her ten-year reign of dining-room terror, *Prick With a Fork* takes you where a diner should never go. From the crappiest suburban Italian to the hottest place in town, what goes on behind the scenes is rarely less fraught than the seventh circle of hell. Psychopathic chefs, lecherous owners, impossible demands and insufferable customers are just the start of an average shift. Therapy for former waiters, a revelation to diners, and pure reading pleasure for anyone interested in what really happens out the back of the restaurant, *Prick With a Fork* is an hilarious and horrific dissection of the restaurant industry, combining the gritty take-no-prisoners attack of Anthony Bourdain's *Kitchen Confidential* with the gross confessions and forensic grunge of John Birmingham's *He Died with a Felafel in His Hand*. Dining out will never be the same again.

The Economics of Symbolic Exchange Alexander Dolgin 2008-10-06 Alexander Dolgin's *Economics of Symbolic Exchange* is in reality not one but three books, and although these semantic layers are interlinked, the reader will need to choose between the different vectors and modalities. One clearly evident dimension is research. Certain authors introduce quite new intellectual approaches into scientific debate. This requires a special frame of mind and a searching curiosity about social reality. Carl Gustav Jung identified a phenomenon which he called systematic blindness: when a science reaches a stage of maturity and equilibrium, it categorically refuses, from a sense of self-preservation, to note certain facts and phenomena which it finds inconvenient. In Alexander Dolgin's book whole complexes of such "non-canonical" material are to be found. Here are just a few examples: the exchange networks, through which digital works of art are spread through the Internet; bargain sales of fashionable clothing; the paradox of equal pricing of cultural goods of varying quality; and a discussion of whether art or business has the more productive influence on creativity. Obviously, not all the issues Dolgin raises are totally new, but brought together and examined within an elegant logical framework of informational economics, they pose a challenge to scientific thinking. Such challenges are by no means immediately or, in some cases, ever acclaimed by the scientific establishment. J. K. Galbraith, for example, a great American economist, whose works are read throughout the world, who introduced a whole range of crucially important concepts, the director of John F.

Materials Chemistry Bradley D. Fahlman 2018-08-28 The 3rd edition of this successful textbook continues to build on the strengths that were recognized by a 2008 Textbook Excellence Award from the Text and Academic Authors Association (TAA). *Materials Chemistry* addresses inorganic-, organic-, and nano-based materials from a structure vs. property treatment, providing a suitable breadth and depth coverage of the rapidly evolving materials field – in a concise format. The 3rd edition offers significant updates throughout, with expanded sections on sustainability, energy storage, metal-organic frameworks, solid electrolytes, solvothermal/microwave syntheses, integrated circuits, and nanotoxicity. Most appropriate for Junior/Senior undergraduate students, as well as first-year graduate students in chemistry, physics, or engineering fields, *Materials Chemistry* may also serve as a valuable reference to industrial researchers. Each chapter concludes with a section that describes important materials applications, and an updated list of thought-provoking questions.

Consumer Behavior and Marketing Strategy J. Paul Peter 1996 This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis. Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.

expertise in this joint venture to research, compile and publish The International Corporate 1000, A Directory of Who Runs The World's 1000 Leading Corporations. Accordingly, you will find extensive, valuable detail about who does what, and how to reach them, but you will find little financial or statistical data. We have designed the book in this way because we believe there is a great need for an accurate and current executive directory, whereas a wealth of financial data is already available from many different sources. The organization of the directory is by key geographical region, then by major country within each region, and then alphabetically by company within each country.
