Literacy Classrooms That S. O. A. R. Susan O'Hara 2020-11-27 "For more than fifteen years the authors have been conducting research and professional development in school districts across the United States. This work has shown that the SOAR Teaching Frames for Literacy provide a unique approach to planning, implementing, and elevating instruction that drives improvement in teaching and learning. One distinguishing aspect of the SOAR work is the focus on the high-impact teaching practices that research identifies as key to student learning. A second distinguishing aspect is that the practices are presented and unpacked within the context of teaching frames. Each teaching frame is designed to help educators understand and implement the high-impact practice that drives student learning, while simultaneously enacting a set of dynamic instructional moves in support of the high-impact practice and taking the foundational planning steps needed to do this well. Detailed instructional strategies are provided as a way to help teachers understand how to implement and continuously improve these practices. A third distinguishing aspect of the work is that the teaching frames provide a common language and a set of tools to foster teacher-to-teacher and coach-to-teacher collaboration that supports professional learning and growth across schools and districts. Principals, coaches, and teachers who have participated in SOAR professional learning report that the teaching frames provide them with a lens for continued professional learning and growth"--

The Roots of Reading Dr. Ijya C. Tulloss 2019-03-08 The ROOTS OF READING • Writing is the ability to leave information through symbols while reading is the ability to retrieve information previously written. • Writing is transcribing words we speak into understandable symbols that we see. • We are not born speaking but we are wired to acquire the speech that we hear in a relatively short time flawlessly. • We have the inherent capacity to form concepts and label concepts with words. • Reading is an outgrowth of speaking. It follows that to be a good reader one must be a fluent speaker and commands a wide range of vocabulary. • Unlike speaking, we need to be taught to read and write. We build a vocabulary of using symbols to represent the sounds that make up words. Similarly we represent auditory signs with visual signs. These signs are represented by the letters of the alphabet. • We communicate verbally through speaking and listening. • For written communication, we use writing

(sending a message) and reading (retrieving message). The method of representing sounds that make up words with signs is called phonics. • Writing is simply representing the sounds (letters) we use in saying a word. Reading is retrieving the message we wrote. • Analyzing the sounds that make up a word is called decoding. Choosing letters to represent the sounds of the word we want to say is encoding. Decoding and encoding are the cornerstones of reading and writing. • At first the process of decoding is slow but with practice, automaticity sets in and decoding is faster. Decoding then is reading. • To be an effective reader one needs to develop a subset of skills as follows: phonemic awareness, phonics, fluency, vocabulary, comprehension.

Foundations of Reading Acquisition and Dyslexia Benita A. Blachman 2013-03-07 The chapters in this volume are based on presentations made at a recent conference on cognitive and linguistic foundations of reading acquisition. The researchers who participated have all made contributions to the theoretical and empirical understanding of how children learn to read. They were asked to address not only what they have learned from their research, but also to discuss unsolved problems. This dialogue prompted numerous questions of both a theoretical and applied nature, generated heated debate, and fueled optimism about the important gains that have been made in the scientific understanding of the reading process, especially of the critical role played by phonological abilities.

Writing Anchors Jan Wells 2004-01-01 This comprehensive handbook shows teachers how to build a foundation for writing with effective lessons that are the key to powerful writing workshops. *Writing Anchors* demonstrates how to create a supportive classroom, model writing experiences, and create enthusiasm for writing among students. The practical lessons explore the major elements of writing, with explicit strategies for teaching the major forms of writing: Informational writing—detailed descriptions of ways to take and organize notes, use text features, and create reports that have voice; Poetry and personal writing— language choice, imagery, using the senses, and finding the personal pulse of the writer; Narrative—extends writing skills with lessons on story sequence, problem solving, and character development. The lessons form "metacognitive anchors" that build an understanding of the elements of powerful writing. Each lesson comes with an anchor cue card that prompts students to apply their growing understandings independently in writing workshops and in assessing their own writing. In addition, the book provides more than thirty effective tools that are ready to copy and use in the classroom—writing checklists, rubrics for assessment, graphic organizers, note-taking grids, semantic maps, story maps, tips for proofing, and student examples collected

from grade 2–7 classrooms.
