Rescue, Response, and Resilience: a Critical Incident Review of the Orlando Public Safety Response to the Attack on the Pulse Nightclub Frank Straub 2019-08-15 The shooting attack on the Pulse nightclub in June 2016 claimed the lives of 49 individuals and injured 58 more. It was an event of extreme violence, carnage, and confusion. Yet the Orlando Police Department (OPD) performed with great courage and professionalism, averting a potentially greater loss of life. Recognizing that there were many lessons to be shared and learned from this incident, the OPD asked the COPS Office to conduct a Critical Incident Review of the attack. This Police Foundation report on the incident review details multiple aspects of the attack and response, including leadership, collaboration, tactics, equipment, training, emergency medical care, officer safety, public information, and community relationships. In so doing, it identifies best practices for planning, training, and procedures in all areas of response to a similar attack or mass casualty event and can serve as a valuable guide to law enforcement or first responders seeking to prepare for similar incidents.

Knowledge, Policy and Practice in Education and the Struggle for Social Justice: Essays Inspired by the Work of Geoff Whitty Andrew Brown 2020-04-01

For 50 years, educator and sociologist Geoff Whitty resolutely pursued social justice through education, first as a classroom teacher and ultimately as the Director of the Institute of Education in London. The essays in this volume - written by some of the most influential authors in the sociology of education and critical policy studies - take Whitty's work as the starting point from which to examine key contemporary issues in education and the challenges to social justice that they present. Set within three themes of knowledge, policy and practice in education, the chapters tackle the issues of defining and accessing 'legitimate' knowledge, the changing nature of education policy under neoliberalism and globalization, and the reshaping of teacher workplaces and professionalism - as well as attempts to realize more emancipatory practice. Whitty's scholarship on what constitutes quality and impact in educational research is also explored. Together, the essays open a window on a life in the sociology of education, the scholarly community of which it was part, and the facets of education policy, practice and research that they continue to reveal and challenge in pursuit of social justice. They celebrate Whitty as one of the foremost sociologists of education of his generation, but also as a friend and colleague. And they highlight the continued relevance of his contribution to those seeking to promote fairer and more inclusive education systems.

The Pandemic Century: One Hundred Years of Panic, Hysteria, and Hubris Mark Honigsbaum

2019-04-09 With a New Chapter and Updated Epilogue on Coronavirus A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors' Choice "Honigsbaum does a superb job covering a century's worth of pandemics and the fears they invariably unleash." —Howard Markel, MD, PhD, director of the Center for the History of Medicine, University of Michigan How can we understand the COVID-19 pandemic? Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing such catastrophic outbreaks of infectious disease. Yet despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. In *The Pandemic Century*, a lively account of scares both infamous and less known, medical historian Mark Honigsbaum combines reportage with the history of science and medical sociology to artfully reconstruct epidemiological mysteries and the ecology of infectious diseases. We meet dedicated disease detectives, obstructive or incompetent public health officials, and brilliant scientists often blinded by their own knowledge of bacteria and viruses—and see how fear of disease often exacerbates racial, religious, and ethnic tensions. Now updated with a new chapter and epilogue.

Boston's Apollo Erica E. Hirshler 2020-01-01 In 1916, John Singer Sargent (1856-1925) met Thomas Eugene McKeller (1890-1962) a young African American elevator attendant at Boston's Hotel Vendome. McKeller became the principal model for Sargent's murals in the new wing of the Boston's Museum of Fine Arts, among the painter's most ambitious works. Sargent's nude studies and sketches from this project attest to a close collaboration between the two men that unfolded over nearly ten years. Featuring drawings given by Sargent to Isabella Stewart Gardner and published in full for the first time, a portrait of McKeller, and archival materials reconstructing his life and relationship with Sargent, this book opens new avenues into artist-model relationships and transforms our understanding of Sargent's iconic American paintings. Essays offer the first biography of Thomas McKeller and a window into African America life in early 20th century Roxbury. They address the artist's sexuality, his models, and consider questions of race and gender.

Animal Crisis Alice Crary 2022-07-12 For too long the questions of how we treat animals and how we treat our fellow human beings have been considered separately. But the contours of the current animal crisis make it clear – the harms we are inflicting on the nonhuman world have devastating impacts on humans: zoonotic diseases caused by habitat destruction and animal exploitation have brought human life to a standstill; mass production of animals for food is poisoning the ground and contributing to catastrophic climate change. *Animal Crisis* responds to this fractured relationship between human beings and animals by exploring the complex social and political contexts in which animals are harmed, revealing the connections between our callous and cruel attitudes to the animal world and those same attitudes towards vulnerable human groups. Marking a stark contrast to traditional theories in animal ethics, Alice Crary and Lori Gruen argue that there can be no animal liberation without human emancipation. Borrowing from critical social theory and ecofeminism, they build a framework for understanding and combatting the structural forces that shape and enable the diminishment of some for the advantage of a few, isolating critical resources that are crucial for animal and human emancipatory struggles alike.

The Road to Results Linda G. Morra-Imas 2009 'The Road to Results: Designing and Conducting Effective Development Evaluations' presents concepts and procedures for evaluation in a development context. It provides procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations and do social mapping, and how to construct a "rigorous" quasi-experimental design to answer an impact question. The text begins with the context of development

evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation, such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations. The topics of implementing 'Results-based Measurement and Evaluation' and constructing a 'Theory of Change' are emphasized throughout the text. Next, the authors take the reader down 'the road to results, ' presenting procedures for evaluating projects, programs, and policies by using a 'Design Matrix' to help map the process. This road includes: determining the overall approach, formulating questions, selecting designs, developing data collection instruments, choosing a sampling strategy, and planning data analysis for qualitative, quantitative, and mixed method evaluations. The book also includes discussions on conducting complex evaluations, how to manage evaluations, how to present results, and ethical behavior--including principles, standards, and guidelines. The final chapter discusses the future of development evaluation. This comprehensive text is an essential tool for those involved in development evaluation.

The Power of Change National Academies of Sciences, Engineering, and Medicine 2016-09-30 Electricity, supplied reliably and affordably, is foundational to the U.S. economy and is utterly indispensable to modern society. However, emissions resulting from many forms of electricity generation create environmental risks that could have significant negative economic, security, and human health consequences. Large-scale installation of cleaner power generation has been generally hampered because greener technologies are more expensive than the technologies that currently produce most of our power. Rather than trade affordability and reliability for low emissions, is there a way to balance all three? *The Power of Change: Innovation for Development and Deployment of Increasingly Clean Energy Technologies* considers how to speed up innovations that would dramatically improve the performance and lower the cost of currently available technologies while also developing new advanced cleaner energy technologies. According to this report, there is an opportunity for the United States to continue to lead in the pursuit of increasingly clean, more efficient electricity through innovation in advanced technologies. *The Power of Change: Innovation for Development and Deployment of Increasingly Clean Energy Technologies* makes the case that America's advantages—world-class universities and national laboratories, a vibrant private sector, and innovative states, cities, and regions that are free to experiment with a variety of public policy approaches—position the United States to create and lead a new clean energy revolution. This study focuses on five paths to accelerate the market adoption of increasing clean energy and efficiency technologies: (1) expanding the portfolio of cleaner energy technology options; (2) leveraging the advantages of energy efficiency; (3) facilitating the development of increasing clean technologies, including renewables, nuclear, and cleaner fossil; (4) improving the existing technologies, systems, and infrastructure; and (5) leveling the playing field for cleaner energy technologies. *The Power of Change: Innovation for Development and Deployment of Increasingly Clean Energy Technologies* is a call for leadership to transform the United States energy sector in order to both mitigate the risks of greenhouse gas and other pollutants and to spur future economic growth. This study's focus on science, technology, and economic policy makes it a valuable resource to guide support that produces innovation to meet energy challenges now and for the future.

A Tragedy of Lives Chiedza Musengezi 2003 A collection of first-hand stories, based on interviews with former female prisoners, conducted by Zimbabwe Women's Writers. Each story is highly personal and particular. As a body, they document that women who find themselves in prison are often driven by circumstances into a situation where the emotional or material poverty of their lives makes breaking the law the only option. They illustrate how once in prison, women are subjected to punitive or demeaning action; and not infrequently, are regarded as pariahs by their families and friends, and society at large. The stories further shed light on the impact of imprisonment on the children of prisoners, who by virtue of the absence of their mothers, suffer deprivation, which limits their opportunities for a fulfilling life. The writers pose the challenges: how much responsibility should be borne by the culprits themselves; and how much are their failures an indictment against the whole society, outlining what might be done to prevent the so-called crime and create a more compassionate environment. The stories are supplemented with scholarly essays written by specialists in law, gender and prison reform, who raise some important general issues regarding women, criminal law and punishment regimes.

Heating, Cooling, Lighting Norbert Lechner 1991-01-16 Using a qualitative rather than a quantitative approach, presents detailed information based on concepts, rules, guidelines, intuition, and experience for architects in the areas of heating, cooling, and lighting at the schematic design stage. The data explored supports a three-tiered approach--load avoidance, using natural energy sources, and mechanical equipment. Among the topics covered are shading, thermal envelope, passive heating and cooling, electric lighting, and HVAC. Case studies illustrate how certain buildings use techniques at all three tiers for heating, cooling, and lighting. An appendix lists some of the more appropriate computer programs available to the architect for analysis at the schematic design stage.

Schooling for Sustainable Development in Africa Heila Lotz-Sisitka 2016-11-11 This book considers the scope and dynamics of Education for Sustainable Development (ESD) and learning in schools in Africa. It explores the conditions and processes that support such learning, and examines how ESD in schooling can improve the quality and relevance of education. The quality of education has been defined internationally as a key concern for educational institutions around the world, including schools in Africa. The models of quality are often limited to performance-based approaches and/or inclusive approaches. The contributions in this book show that there is more to a discussion on educational quality in Africa than performance success and/or inclusion. The chapters explain how ESD brings a new relevance to education in Africa, and at the same time, sounds the beginning of a new concept of quality education. The volume presents a collection of experiences in creating and supporting quality learning processes through a variety of ESD practices.

It questions assumptions that have underpinned over 200 years of social science, statistical and policy work. *Understanding Well-being Data* is a readable, introductory book with real-life examples. Understanding the contexts of data and decision-making are critical for policy, practice and research that aims to do good, or at least avoid harm. Through its comprehensive survey and critical lens, this book provides tools to promote better understanding of the power and potential of well-being data for society, and the limits of their application.
