*The SAGE Handbook of Film Studies* James Donald 2008-04-16 Written by a team of veteran scholars and exciting emerging talents, *The SAGE Handbook of Film Studies* maps the field internationally, drawing out regional differences in the way that systematic intellectual reflection on cinema and film has been translated into an academic discipline. It examines the conversations between Film Studies and its contributory disciplines that not only defined a new field of discourse but also modified existing scholarly traditions. It reflects on the field's dominant paradigms and debates and evaluates their continuing salience. Finally, it looks forward optimistically to the future of the medium of film, the institution of cinema and the discipline of Film Studies at a time when the very existence of film and cinema are being called into question by new technological, industrial and aesthetic developments.

*The Whisper* Pamela Zagarenski 2015-10-06 The two-time Caldecott Honor artist shares "a sumptuously illustrated fable about the magic of storytelling and the power of imagination" (School Library Journal, starred review). When a little girl receives a curious book filled only with pictures, a whisper urges her to supply the words she cannot see. As the pages turn, her imagination takes flight and she discovers that the greatest storyteller of all might come from within. Pamela Zagarenski's debut as an author reminds us that we each bring something different to the same book. "Surreal, staggering mixed-media paintings make traveling across such beautifully varied and bizarre storyscapes exhilarating."—Kirkus, starred review

**L3 Syntactic Transfer** Tanja Angelovska 2017-08-15 This book fills an existing gap in the field of third language acquisition (L3A) by bringing together theoretical, empirical, and practical accounts that contribute to informed teaching practices in multilingual classrooms. The volume is organised into three sections that focus on prominent syntactic transfer models in the field of L3A and together provide insights into the interplay of the influences of prior languages in L3 syntax and how we can enrich the practical field of instructed L3 acquisition. Part I includes original papers dealing with new developments of existing theoretical models on syntactic transfer in L3A and Part II consists of empirical studies testing existing models from different perspectives (formal, lexico-functional, and neurocognitive). Following these

two sections, Part III discusses how theory can inform practices for L3 learning and teaching. This concise compilation brings to light innovations, not only in terms of theoretical refinements and practical implementations, but also in offering an impressive range of language combinations. This book is intended to act as a unique resource for scholars, applied linguists, language educators, both novices and experts alike, in and beyond the field of L3A.
