Evidence-Based Treatments for Trauma Related Disorders in Children and Adolescents Markus A. Landolt 2017-02-13 This handbook presents the current evidence-based psychological treatments for trauma related disorders in childhood and adolescence and in addition provides clearly structured, up-to-date information on the basic principles of traumatic stress research and practice in that age group, covering epidemiology, developmental issues, pathogenetic models, diagnostics, and assessment. Each of the chapters on treatment, which form the core of the book, begins with a summary of the theoretical underpinnings of the approach, followed by a case presentation illustrating the treatment protocol session by session, an analysis of special challenges typically encountered in implementing this treatment, and an overview of the current evidence base for the treatment approach. A special section considers modern treatments in particular settings, such as schools,

hospitals, and juvenile justice systems, and the concluding chapters provide an integrative discussion on how to treat traumatized children and adolescents and an outlook. The book will be invaluable for clinical child and adolescent psychologists, child and adolescent psychiatrists, psychotherapists, and other mental health professionals working with traumatized children and adolescents.

Fliegen ist sicher! Beruf und Alltag eines deutschen Fluglotsen 1957 - 1984
Frank W. Fischer 2017-01-18 Dieses Buch aus dem Berufsalltag eines deutschen Flugverkehrsleiters während der Zeit des Kalten Krieges wird Sie in eine Zeit zurückführen, die im Vergleich zu heute ein verändertes Arbeits- und Lebensumfeld schildert. Damals bestimmten Streitkräfte aus den USA, aus Großbritannien, aus Kanada und aus Frankreich das Geschehen im Hintergrund. Allmählich begann das deutsche Wirtschaftswunder zu wachsen, obgleich Autos und Telefone noch kein Allgemeingut waren. In diesem Umfeld begann der Autor, Frank W. Fischer, seine Berufslaufbahn. Hochmotiviert und in gutem Glauben, einen Beitrag zur Flugsicherheit im damals gerade aufgekommenen zivilen Luftverkehr leisten zu können, trat er seinen Dienst an. Der Autor versucht, sich primär auf die erlebten, rein sachlichen Mißstände der damaligen Zeit in seinem Berufsalltag zu konzentrieren. Es geht ihm darum, der Leserschaft die Umstände, Bedingungen und Arbeitsweise zu vermitteln, die den Beruf des Flutlotsen damals prägten. Freilich haben nicht bei allen Arbeitsstellen in der Flugsicherung solch dramatische Zustände geherrscht, wie sie im vorliegenden Buch beschrieben werden. Der Bericht ist subjektiv formuliert und möge zum Verständnis beitragen, wie man Flugsicherung - heute wie damals - nicht leisten sollte.

Europeanizing Education Martin Lawn 2012-05-14 The study of common and diverse effects in the field of education across Europe is a growing field of inquiry and research. It is the result of many actions, networks and programmes over the last few decades and the development of common European education policies. Europeanizing Education describes the origins of European education policy, as it metamorphosed from cultural policy to networking support and into a space of comparison and data. The authors look at the early development and growth of research networks and agencies, and international and national collaborations.

The gradual increase in the velocity and scope of education policy, practice and instruments across Europe is at the heart of the book. The European space of education, a new policy space, has been slowly coaxed into existence; governed softly and by persuasion; developed by experts and agents; and de-politicized by the use of standards and data. It has increasing momentum. It is becoming a single, commensurable space on a rising tide of indicators and benchmarks. The construction of policy spaces by the European Union makes Europe governable: policy spaces have to be mobilized by networks of actors and constructed by comparative data. They are the result of transnational flows of people, ideas and practices across European borders; the direct effects of European Union policy; and, finally, the Europeanizing effect of international institutions and globalization. The European space of education and research has become a new place of work through interconnected institutions, networks and companies, and it is being constructed through the flow of policy ideas, knowledge and practices from place to place, sector to sector, organization to organization, and across borders. This book will be useful to any scholar of the new arena of study, the European Space of Education.

Effective Interprofessional Education Della S. Freeth 2008-04-15 This volume presents a practical guide to the development, application and evaluation of effective interprofessional education in health and social care. It is both a practice manual for those in hands-on roles and a reflective guide for those indirectly involved in professional education. The book provides clear advice

on methods of establishing training and education programmes and evaluating their effectiveness, while simultaneously examining the relationship between initial application, ongoing maintenance and subsequent assessment. The authors expound multiple points of view that will generate individual thinking and approaches to both the practice and the estimation of interprofessional education schemes. The book is divided into three sections: the first introduces the differing approaches to professional education and the rationale behind measuring their worth; the second part focuses on planning, development and delivery; the third part advises in a robust and pragmatic way on modes of measuring the efficacy of programmes. The interrelation of these topics is then examined to provide a synthesised perspective on the development, delivery and evaluation of interprofessional education.

Severe Weather Flying Dennis Newton 2016 "At the outset, Dennis Newton reminds readers that Severe Weather Flying is not about flying in severe weather, but about how to detect and therefore avoid it, with advice on how to escape it if you become caught in it accidentally. The author is a meteorologist, weather research pilot, ATP, and flight instructor and more. He speaks pilot to pilot in this valuable guide on how not to fly in severe weather. He believes that given the knowledge, pilots can truly lessen their chances of being caught in thunderstorms and other extreme weather conditions. This book was written with that goal in mind: to impart enough meteorological information in a way pilots can best grasp and use it. Newton believes that, "Pilots as a group are more than conservative enough to keep themselves safe if they are only given the facts." Meteorology can be a tough "language" and not always clear to the lay person. Newton translates and brings across the most crucial principles pilots can use to fly more wisely in weather. Covering weather fundamentals, the atmosphere, and the stability of the air, he then digs deeper into the individual aspects of severe weather situations. In print for more than 30 years, this Fourth Edition blends in good coverage of detection equipment for the cockpit, and the weather briefing information available to the pilot for decision-making in flight planning, and even the enroute phase. Details on aircraft icing certification, critical aircraft icing information, and high altitude ice crystals is included. Valuable for seasoned veterans as for relative newcomers, applicable to VFR, IFR, piston, turbine, low- and high-altitude operations"--Provided by publisher.

Guidelines for Cardiac Rehabilitation and Secondary Prevention Programs

American Association of Cardiovascular & Pulmonary Rehabilitation 2013 This Fifth Edition Resource, covers the entire scope of practice for cardiac rehabilitation and secondary prevention (CR/SP) programs. This text was developed by the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR) and parallels federal guidelines for cardiac rehabilitation programs. It contains information on promoting positive lifestyle behavior patterns, reducing risk factors for disease progression, and lessening the impact of cardiovascular disease on quality of life, morbidity, and mortality. The text has been updated and restructured, providing the most current models for designing and updating rehabilitation programs for patients and preventing second episodes. In addition to chapter revisions, there is new content on behavior modification, risk factors, and special populations. The chapter covering program administration has been completely rewritten to include new regulations and reimbursement standards as well as additional suggestions for new models for CR/SP. The most recent Core Competencies for Cardiac Rehabilitation and Secondary Prevention Professionals and the Core Components of Cardiac Rehabilitation/Secondary Prevention Programs have also been included in their entirety. There is strong evidence that participation in outpatient cardiac rehabilitation and secondary prevention programs decreases mortality and recurrent morbidity after a cardiac event. These guidelines offers procedures for providing patients with low-cost, high-quality programming, moving them toward personal responsibility for disease management and secondary prevention over a lifetime.

Evidence-based Rehabilitation Mary C. Law 2008 This text provides the most up-to-date information on evidence-based practice, the concepts underlying evidence-based practice, and implementing evidence into the rehabilitation practice. Vocational Education and Training in Times of Economic Crisis Matthias Pilz 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training (VET). Revealing how youth in transition is affected by economic crises, it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The

contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the university track for young people in many countries.

Music and Disorders of Consciousness: Emerging Research, Practice and Theory Wendy L. Magee 2017-02-28 Music processing in severely brain-injured patients with disorders of consciousness has been an emergent field of interest for over 30 years, spanning the disciplines of neuroscience, medicine, the arts and humanities. Disorders of consciousness (DOC) is an umbrella term that encompasses patients who present with disorders across a continuum of consciousness including people who are in a coma, in vegetative state (VS)/have unresponsive wakefulness syndrome (UWS), and in minimally conscious state (MCS). Technological developments in recent years, resulting in improvements in medical care and technologies, have increased DOC population numbers, the means for investigating DOC, and the range of clinical and therapeutic interventions under validation. In neuroimaging and behavioural studies, the auditory modality has been shown to be the most sensitive in diagnosing awareness in this complex population. As misdiagnosis remains a major problem in DOC, exploring auditory responsiveness and processing in DOC is, therefore, of central importance to improve therapeutic interventions and medical technologies in DOC. In recent years, there has been a growing interest in the role of music as a potential treatment and medium for diagnosis with patients with DOC, from the perspectives of research, clinical practice and theory. As there are almost no treatment options, such a non-invasive method could constitute a promising strategy to stimulate brain plasticity and to improve

consciousness recovery. It is therefore an ideal time to draw together specialists from diverse disciplines and interests to share the latest methods, opinions, and research on this topic in order to identify research priorities and progress inquiry in a coordinated way. This Research Topic aimed to bring together specialists from diverse disciplines involved in using and researching music with DOC populations or who have an interest in theoretical development on this topic. Specialists from the following disciplines participated in this special issue: neuroscience; medicine; music therapy; clinical psychology; neuromusicology; and cognitive neuroscience.

Nachwuchswerbung und Öffentlichkeitsarbeit der Bundeswehr Nils Kluger 2020 Die Bundeswehr wirbt seit Ihrer Aufstellung in Werbefilmen um Nachwuchs. Dabei haben sich die Rahmenbedingungen seit der Aufstellung der Streitkräfte radikal verändert: Aus einer Wehrpflicht- und Verteidigungsarmee wurde eine Berufs- und Einsatzarmee. Die vorliegende Studie zeigt mit Hilfe von kommunikationsethischen Analysen auf, wie sich Nachwuchswerbung und Öffentlichkeitsarbeit der Bundeswehr in den audiovisuellen Medien (von ihren Anfängen in den 1950er Jahren bis heute) verändert haben und entwickelt daraus ethische Leitlinien für ihre Werbung und Öffentlichkeitsarbeit.
