The Challenge of Global Capitalism Robert Gilpin 2018-06-05 Many individuals proclaim that global capitalism is here to stay. Unfettered markets, they argue, now drive the world, and all countries must adjust, no matter how painful this may be for some. Robert Gilpin, author of the widely acclaimed *Political Economy of International Relations* (Princeton, 1987), urges us, however, not to take an open and integrated global economy for granted. Rather, we must consider the political circumstances that have enabled global markets to function and the probability that these conditions will continue. Gilpin's new book amounts to a magisterial inquiry into all major aspects of the contemporary world political economy. Beginning with the 1989 end of the Cold War and the subsequent collapse of communism, it focuses on globalization and rapid technological change and covers a broad sweep of economic developments and political cultures. Gilpin demonstrates the fragility of a global and integrated economy and recommends what can be done to strengthen it. The international community has another chance to solidify the global market economy that collapsed with the outbreak of World War I. Yet, writes Gilpin, the full implications of this historic development for international affairs are not yet clear. Will socialist economies make a successful transition to market-type economies? What role will a dynamic China play in the world economy? Will the United States continue to exercise leadership or gravitate toward self-centered policies? Gilpin explores such questions along with problems in the areas of trade liberalization, multinational corporations, and destabilizing financial flows. He also investigates the struggles of less developed countries and the spread of economic regionalism, particularly in Europe, North America, and Pacific Asia, which directly threatens an open world economy. The author maintains that global capitalism and economic globalization have rested and must continue to rest on a secure political foundation. However, this foundation has eroded since the end of the Soviet threat. To ensure survival of the global economy, Gilpin concludes, the United States and other major powers must recommit themselves to working together to rebuild its weakened political foundations.

Gender Ideologies and Military Labor Markets in the U.S. Saskia Stachowitsch 2013-03 Gender Ideologies and Military Labor Markets in the U.S. offers a comprehensive analysis of the relationship between changes in military gender ideologies and structural changes in U.S. military and society. By investigating how social and military change have influenced gender ideologies, the author develops an approach that (re-)connects military gender ideologies to the social conditions of their production and distribution and explains their transformation as effects of changing social and political relations and conflicts. Examining the role of different groups of social actors, media debates on women's military participation and gender ideologies inherent in depictions of military women, the author seeks to contextualise these ideologies are within structural change in the U.S. military and society, relating them to the gender-specific division of labour on civilian and military labor markets. This work provides a deeper understanding of the nexus between military re-structuring processes, women's military integration, and changes of gender ideologies in regard to war and the military, and will be of great interest to students and scholars of gender, security studies and American politics.

Rose of Soweto - The Dingaan Thobela Story Deon Potgieter 2012-10-02 Many tales have been told of boxers who have risen up against the odds to achieve success in their lives. None, however, has been as dramatic and had such a profoundly inspirational influence on the people who shared the dream as the true life story of the man they call The Rose of Soweto. Dingaan Thobela, The Rose of Soweto, has been described as the most naturally talented boxer ever to come out of South Africa. Growing up in Chiawelo under the watchful eye of his grandmother, this is the story of how a skinny boy from Soweto overcame adversity

to become one of the greatest boxers to lace up a pair of gloves. Starting his career as a raw 17-year-old with a passion for boxing, Dingaana Thobela would go on to become a two-time lightweight world champion by the age of 26. Fame and fortune followed, but the fairy tale that his life had become was not to last. After relinquishing his WBO title and losing his WBA title, he was to endure seven years of mixed fortunes and bitter disappointments until he found himself on the verge of being consigned to history books. Written off in the media and no longer able to make the weight to fight in the lightweight division, it looked as if The Rose of Soweto had no other option but to fade away quietly. His long-held dream of winning a third world title seemed an impossible one. Yet, Dingaana refused to give it up. He would not be denied. This is the story of how one man went about proving that no matter where you come from, no matter what your background and social standing you can triumph in the face of adversity. And then he proved it all over again. In doing so he would not only regain his crown as the champion of the people and once again be hailed as a unifying symbol in a racially divided nation, but he would also confirm his place alongside the greatest stars that boxing has ever produced.
