Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Sustainable Bioenergy Production Lijun Wang 2014-04-18 Given the environmental concerns and declining availability of fossil fuels, as well as the growing population worldwide, it is essential to move toward a sustainable bioenergy-based economy. However, it is also imperative to address sustainability in the bioenergy industry in order to avoid depleting necessary biomass resources.

Modern Psychology and Ancient Wisdom Sharon G. Mijares 2015-08-27 Modern Psychology and Ancient Wisdom, 2nd edition, brings together experts who explore the use of ancient healing techniques from Buddhism, Christianity, Goddess, Shamanism, Taoism, and Yogic traditions as well as the mystical practices of Judaism and Islam and their application to modern counseling and therapy professions. Each chapter lays out time-tested techniques used by teachers, guides, and practitioners to facilitate psychological healing, embraces a wide variety of cultural perspectives, and offers a large, varied, and meaningful view of the world. This new edition includes added material on Islam, indigenous, and shamanic healing perspectives and practices, as well as new findings in the fields of neuropsychology and epigenetics. With its vast offerings of new treatment methods from a variety of perspectives—from therapeutic metaphors and breathing exercises to meditation and yoga techniques—this book will be of use to mental health professionals, social workers, and pastoral caregivers.

Waymarking Italy's Influence on the American Environmental Imagination While on

Pilgrimage to Assisi Robert Lawrence France 2020-09-10 Undertaking a peripatetic pilgrimage that is equal parts a daily description of a 200-kilometre walk from the wounded mountain of La Verna to the tortured river in Assisi, and an examination of the debt owed to Italy in terms of ecocultural and environmental scholarship, this book provides an innovative addition to the nascent field of ecocritical narrative scholarship. Through a process that has been referred to as "deep-travel" or "mind-walking," the text fulsomely reviews how time spent in Italy influenced the writings of notable North American environmental historians, geographers, scientists, nature writers, landscape architects, and restoration theorists about the conception and manipulation of the natural world. This literary field study highlights how the phenomenological co-traversing of texts and trails can be a valued methodology for undertaking environmental criticism.

Tales from the Easel 2004 Tales from the Easel features seventy full-color reproductions that convey the expressive, allusive powers of narrative painting. Though they range widely in subject and setting, all of the paintings gathered here are rendered in a representational, or realistic, style. Carrying moral, social, or patriotic messages, the paintings are meant to teach, enlighten, or inspire. Then again, the paintings can also tweak the very conventions that define them, with results that range from the delightfully idiosyncratic to the visionary. Thomas Hart Benton, Winslow Homer, Andrew Wyeth, and Jacob Lawrence are just some of the household names whose work appears in Tales from the Easel. Others, like Elihu Vedder and Lilly Martin Spencer, are less well known, but still vital to the development of narrative painting. While some of the artists, including George Caleb Bingham and Paul Cadmus, were classically trained, self-taught painters such as Carlos "Shiney" Moon and Thomas Waterman Wood are also represented. American rivers, cities, and battlefields are among the native surroundings shown in many of the paintings. However, artists also looked elsewhere for settings--to Europe, the Holy Land, or even some imagined realm. Charles C. Eldredge's essay discusses the rich and varied sources of American narrative painting--from literature and history to childhood and domestic life--and an essay by William Underwood Eiland provides a discussion of the southern tale-telling tradition. Artist biographies by Reed Anderson and Stephanie J. Fox appear opposite the paintings, adding further context. Tales from the Easel, a companion volume to the national touring exhibit of the same name is a stunning reminder of a tradition in American painting that has endured across two centuries and numerous art movements.

Zoo Studies Tracy McDonald 2019-06-19 Do both the zoo and the mental hospital induce psychosis, as humans are treated as animals and animals are treated as humans? How have we looked at animals in the past, and how do we look at them today? How have zoos presented themselves, and their purpose, over time? In response to the emergence of environmental and animal studies, anthropologists, sociologists, philosophers, theorists, literature scholars, and historians around the world have begun to explore the significance of zoological parks, past and present. *Zoo Studies* considers the modern zoo from a range of approaches and disciplines, united in a desire to blur the boundaries between human and nonhuman animals. The volume begins with an account of the first modern mental hospital, La Salpêtrière, established in 1656, and the first panoptical zoo, the menagerie at Versailles, created in 1662 by the same royal architect; the final chapter presents a choreographic performance that imagines the Toronto Zoo as a place where the human body can be inspired by animal bodies. From beginning to end, through interdisciplinary collaboration, this volume decentres the human subject and offers alternative ways of thinking about zoos and their inhabitants. This collection immerses readers in the lives of animals and their experiences of captivity and asks us to reflect on our own assumptions about both humans and animals. An original and groundbreaking work, *Zoo Studies* will change the way readers see nonhuman animals and themselves.

Living with Depression Deborah Serani 2011-07-16 One out of four Americans will experience mental illness in their lifetime; major depressive disorder is the leading cause of disability in the United States for ages 15 through 44. However, only a fraction of those suffering will seek treatment; 25 percent will seek treatment for symptoms. Stigma claims the other 75 percent, wedging depressed individuals into a life of silent suffering. In *Living with Depression*, Serani outlines the various forms of depression, describes the

different treatments, and outlines methods for living with depression and getting the help you or a loved one needs. Tips on how to choose a good therapist, negotiate the labyrinth of healthcare, and minimize stigma are addressed, as is learning how to use biology and biography as tools of empowerment. Listings of national and global resources make this a ready resource for everything you need to know about depression.

Drawdown Paul Hawken 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” –Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” –David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” –Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Before Scopes Charles Alan Israel 2004 The 1925 Tennessee v. John Scopes case--the Scopes Monkey Trial--is one of America's most famous courtroom battles. Until now, however, no one has considered at length why the sensational, divisive trial of a public high school science teacher indicted for teaching evolution took place where, and when, it did. This study ranges over the fifty

years preceding the trial to examine intertwined attitudes toward schooling and faith held by Tennessee's politically dominant white evangelical Protestants. Those decades saw accelerating social and economic change in the South, writes Charles A. Israel. Education, long the province of family and community, grew ever more centralized, professionalized, and isolated from the local values that first underpinned it. As Israel tells how parents and church, civic, and political leaders at first opposed public education, then endorsed it, and finally fought to control it, he reveals their deep ambivalence about the intangible costs of progress. Lessons that Evangelicals took away from failed adult temperance campaigns also prompted them to reexert control over who and what influenced their children. Evangelicals rallied behind a 1915 bill requiring the Bible to be read daily in public schools. The 1925 Butler bill criminalized the teaching of evolution, which had come to symbolize all that was threatening about theological liberalism and materialistic science. The stage for the Scopes trial had been set. Delving deeply into the collective mind of a people in an age of uncertainty, *Before Scopes* sheds new light on religious belief, ideology, and expression.
