Green Chemistry Paul T. Anastas 2000-01-01 "As the summary of a vision, the book is brilliant. One can feel the enthusiasm of the authors throughout...I see it as a vehicle for initiating a fruitful dialogue between chemical producers and regulatory enforcers without the confrontation, which often characterizes such interactions.' ' -Martyn Poliakoff, *Green Chemistry*, February ' Its is an introductory text taking a broad view and intergrating a wide range of topics including synthetic methodologies, alternative solvents and catalysts, biosynthesis and alternative feedstocks. There are exercises for students and the last chapter deals with future trends' Aslib

MCAT Critical Analysis and Reasoning Skills Review Princeton Review (Firm) 2016

"Complete coverage of the critical analysis and reasoning skills needed for the MCAT, detailed explanations for every practice question, strategies for a competitive edge; 3 full-length online practice tests"--Cover.

Cryptography Apocalypse Roger A. Grimes 2019-10-15 Will your organization be protected the day a quantum computer breaks encryption on the internet? Computer encryption is vital for protecting users, data, and infrastructure in the digital age. Using traditional computing, even common desktop encryption could take decades for specialized 'crackers' to break and government and infrastructure-grade encryption would take billions of times longer. In light of these facts, it may seem that today's computer cryptography is a rock-solid way to safeguard everything from online passwords to the backbone of the entire internet. Unfortunately, many current cryptographic methods will soon be obsolete. In 2016, the National Institute of Standards and Technology (NIST) predicted that quantum computers will soon be able to break the most popular forms of public key cryptography. The encryption technologies we rely on every day—HTTPS, TLS, WiFi protection, VPNs, cryptocurrencies, PKI, digital certificates, smartcards, and most two-factor authentication—will be virtually useless. . . unless you prepare. *Cryptography Apocalypse* is a crucial resource for every IT and InfoSec professional for preparing for the coming quantum-computing revolution. Post-quantum crypto algorithms are already a reality, but implementation will take significant time and computing power. This practical guide helps IT leaders and implementers make the appropriate decisions today to meet the challenges of tomorrow. This important book: Gives a simple quantum mechanics primer Explains how quantum computing will break current cryptography Offers practical advice for preparing for a post-quantum world Presents the latest information on new cryptographic methods Describes the appropriate steps leaders must take to implement existing solutions to guard against quantum-computer security threats *Cryptography Apocalypse: Preparing for the Day When Quantum Computing Breaks Today's Crypto* is a must-have guide for anyone in the InfoSec world who needs to know if their security is ready for the day crypto break and how to fix it.

Gandhi and the Contemporary World Sanjeev Kumar 2019-12-20 This book develops a critical understanding of Mahatma Gandhi’s philosophy and practice in the context of contemporary challenges and engages with some of his key work and ideas. It highlights the relevance of Gandhi’s legacy in the quest towards peace-building, equity and global justice. The volume examines diverse facets of Gandhi’s holistic view of human life – social, economic and political – for the creation of a just society. Bringing together expert analyses and reflections, the chapters here emphasise the philosophical and practical urgency of Gandhi’s thought and action. They explore the significance of his concepts of truth and nonviolence to address moral, spiritual and ethical issues, growing intolerance, conflict and violence, poverty and hunger, and environmental crisis for the present world. The volume serves as a platform for constructive dialogue for academics, researchers, policymakers and students to re-imagine

Gandhi and his moral and political principles. It will be of great interest to those in philosophy, political studies, Gandhi studies, history, cultural studies, peace studies and sociology.

India's Glocal Leader Tejaswini Pagadala 2018-02-11 A stereotype image of Nara Chandrababu Naidu has been formed in the last 40 years. His story is remarkable at every level. But often questions, which is the important story? The one where he evolves into one of the extraordinary leaders in Indian politics over four decades? Or that of an ordinary man from a farming family who worked his way to the top by keeping his family and political party together? That which reflects his political acumen, intellect, and hardwork? Or the one that unveils the person who introduced Andhra Pradesh to India? This book attempts to show how Naidu has been a quintessential survivor in Indian politics. This book analyses how Naidu's ability to combine politics and governance has touched every aspect of Indian domestic and foreign policy, from the struggle for social, technological, economic and administrative reforms to creating world-class institutions. It establishes the fact that Naidu, today, is a symbol and an embodiment of many Indias - modern, progressive, rural and cultural.

Verbal Reasoning BS Sijwalii 2018-04-20 Reasoning is equally weighed section in any competitive examination. Reasoning tests the thinking power and mind applicability skills of the candidates. The questions on reasoning asked in various competitive examinations are not easy to solve without having enough practice. Verbal & Analytical Reasoning will help candidates master the 'Tricks of the Trade' as it covers verbal and analytical reasoning very much comprehensively. This book has been divided into two Sections - Verbal Reasoning and Analytical Reasoning each sub-divided into number of chapters with different types of questions of multiple patterns asked in various exams. The Verbal Reasoning section has been divided into 21 chapters covering Analogy, Classification, Series, Coding-Decoding, Logical Arrangement of Words, Mathematical Operation, Venn Diagram, Clocks, Calendar, Decision Making, Input-Output, Puzzles, Data Sufficiency, etc whereas the Analytical Reasoning section has been divided into eight chapters covering Statement & Arguments, Statement & Assumptions, Course of Action, Passage & Conclusions, Cause & Effects, Syllogism, etc. Ample number of solved problems have been covered in each chapter followed by practice exercises at the end to help aspirants practice the concepts discussed in each chapter. Also the book contains previous years' solved questions of different competitive examinations like CAT, XAT, UPSC, SSC, etc to help aspirants get an insight into the types of reasoning questions asked. The book will be highly useful for aspirants preparing for Management (CAT, XAT, CMAT, IIFT, SNAP & other), Bank (PO & Clerk), SSC (CGL, 10+2, Steno, FCI, CPO & Multitasking), LIC (AAO & ADO), CLAT, RRB, UPSC and other state PSC Exams. As the book covers Verbal and Analytical Reasoning both in detail with ample number of solved problems, it for sure will help aspirants prepare both the types in a thorough manner and score high in the upcoming competitive & recruitment exams.

Green Signals Jairam Ramesh 2015-03-05 The debate on whether to privilege economic growth over ecological security is passé. Environmental considerations must be at the heart of economic growth, especially for a country of 1.25 billion people destined to add another 400 million by the middle of the century. *Green Signals* chronicles the '1991 moment' in India's environmental decision-making, telling the story of how, for the first time, the doors of the environment ministry were opened to voices, hitherto unheard, into the policy-making process. It details efforts to change the way environment is viewed both by proponents of environmental security and those who prize economic growth at all costs. Told from the perspective of a pivotal decision maker, the book addresses the challenges involved in trying to ensure economic growth with ecological security. It takes us through India's coming of age in the global environmental and climate change community to take on a leadership role that is progressive, proactive, and steeped in national interest. Using speaking orders on high-profile projects, notes and letters to the Prime Minister, ministerial colleagues, chief ministers and others, Jairam Ramesh gives an insight into the debates, struggles, challenges, and obstacles to bringing environmental considerations into the mainstream of political and economic decision-making. This collection reveals the story of the author's attempt at the highest levels of governance to introduce effective decision-making, a transparent and accountable administration, and to make environmental concerns an essential component of a nation's quest to accelerate economic growth and end the scourge of poverty and deprivation.

Databases and Information Systems IX G. Arnicans 2016-11-04 Databases and information systems are now indispensable for the day-to-day functioning of businesses and society. This book presents 25 selected papers from those delivered at the 12th International Baltic Conference on Databases and Information Systems 2016 (DB&IS 2016), held in Riga, Latvia, in July 2016. Since it began in 1994, this biennial conference has become an international forum for researchers and developers in the field of databases, information systems and related areas, and the papers collected here cover a wide spectrum of topics related to the development of information systems and data processing. These include: the development of ontology applications; tools, technologies and languages for model-driven development; decision support systems and data mining; natural language processing and building linguistic components of information systems; advanced systems and technologies related to information systems, databases and information technologies in teaching and learning. The book will be of interest to all those whose work involves the design, application and use of databases and information systems.

Attracting Investment in Bangladesh—Sectoral Analyses Sanjay Kathuria 2016-10-17 This is volume 3 of a three-volume publication on Bangladesh's trade prospects. Bangladesh's ambition is to build on its very solid growth and poverty reduction achievements, and accelerate growth to become a middle income country by 2021, and share prosperity more widely amongst its citizens. This includes one of its greatest development challenges: to provide gainful employment to the over 2 million people that will join the labor force each year over the next decade. Moreover, only 54.1 million of its 94 million working age people are employed. Bangladesh needs to use its labor endowment even more intensively to increase growth and, in turn, to absorb the incoming labor. The Diagnostic Trade Integration Study identifies the following actions centered around four pillars to sustain and accelerate export growth: (1) breaking into new markets through a) better trade logistics to reduce delivery lags ; as world markets become more competitive and newer products demand shorter lead times, to generate new sources of competitiveness and thereby enable market diversification; and b) better exploitation of regional trading opportunities in nearby growing and dynamic markets, especially East and South Asia; (2) breaking into new products through a) more neutral and rational trade policy and taxation and bonded warehouse schemes; b) concerted efforts to spur domestic investment and attract foreign direct investment, to contribute to export promotion and diversification, including by easing the energy and land constraints; and c) strategic development and promotion of services trade; (3) improving worker and consumer welfare by a) improving skills and literacy; b) implementing labor and work safety guidelines; and c) making safety nets more effective in dealing with trade shocks; and (4) building a supportive environment, including a) sustaining sound macroeconomic fundamentals; and b) strengthening the institutional capacity for strategic policy making aimed at the objective of international competitiveness to help bring focus and coherence to the government's reform efforts. This third volume provides in-depth analysis of eight different manufacturing and services sectors of the Bangladeshi economy, which help to illustrate the thematic analysis of volume 2 and ground it in sector experiences. Besides pointing to cross-cutting themes, the analysis also highlights some specific issues and actions that could help relieve constraints to faster export growth in these sectors.
