Surya Tutoring Paola Sapienza 2012 The case focuses on two major challenges in deal making in emerging market economiesdeal sourcing and negotiationby focusing on a real (but disguised) Indian private equity deal. In 2010 Surya Tutoring was a fast-growing tutoring academy for high school students aspiring to gain admission to the prestigious Indian Institute of Technology (IIT). Suryas CEO, R. K. Sharma, wanted to expand its reach beyond Kota (a city of 1 million people in the northern state of Rajasthan), which had become the center of the IIT prep school industry and home to tens of thousands of students studying for the rigorous IIT entrance exam. Sharma knew there was vast untapped potential in the teeming Indian metropolises of Mumbai, Chennai, Delhi, and Bangalore, as well as in foreign markets such as Dubai and Australia. Sharma had received term sheets from two private equity firms willing to finance Suryas expansion. By the end of the month he needed to decide which to accept: the offer from big bulge bracket fund Blackgem, or the one from ZenCap, a small Indian firm based in Mumbai with which he had become intimately familiar during the past year.

How To Watch Television Ethan Thompson 2013-09-16 Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and

deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. *How to Watch Television* brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, *How to Watch Television* is designed to engender classroom discussion among television critics of all backgrounds.

Fort Huachuca Cornelius Cole Smith 2000-04-01 This is a history of the famous old post erected deep within Apache country in Arizona where anyone stepping into the territory met with vicious, horrendous attack. The post served courageously to protect an ever-increasing influx of settlers into a wild and fearsome territory. With the Spanish reach for empire, colonization, and usurpation of Indian lands, the Apaches retaliated in the only way they knew how, by vicious and sustained attack upon anyone violating Apache territory. Emigrants, lone travelers, overland-mail riders and itinerant merchants were gunned down, slaughtered, mutilated and roasted alive. If the white man wanted the gold and silver hiding in the hills he would have to win access to the precious metals the hard way. This is the reason of Fort Huachuca's existence. One of the most savage contests of arms between dedicated and able frontier army soldiers and implacable Indian braves. This confrontation culminated in the inevitable reduction of the primitive by the technologically advanced. This was not brought on so much by the introduction of equipment and machines, however, as by persistence and the sheer weight of numbers. Fort Huachuca saw it all. It began in a primitive setting from cavalry charge and marathon infantrymen to being equipped with the most modern equipment of real bugles and crackling loud-speakers. That shows how long the ugly battle continued.

Twentieth-Century Building Materials Thomas C. Jester 2014-08-01 Over the concluding decades of the twentieth century, the historic preservation community increasingly turned its attention to modern buildings, including bungalows from the 1930s, gas stations and diners from the 1940s, and office buildings and architectural homes from the 1950s. Conservation efforts, however, were often hampered by a lack of technical information about the products used in these structures, and to fill this gap *Twentieth-Century Building Materials* was developed by the U.S. Department of the Interior's National Park Service and first published in 1995. Now, this invaluable guide is being reissued—with a new preface by the book's original editor. With more than 250 illustrations, including a full-color photographic essay, the volume remains an indispensable reference on the history and conservation of modern building materials. Thirty-seven essays written by leading experts offer insights into the history, manufacturing processes, and uses of a wide range of materials, including glass block, aluminum, plywood, linoleum, and gypsum board. Readers will also learn about how these materials perform over time and discover valuable conservation and repair techniques. Bibliographies and sources for further research complete the volume. The book is intended for a wide range of conservation professionals including architects, engineers, conservators, and material scientists engaged in the conservation of modern buildings, as well as scholars in related disciplines.

Logical Reasoning Bradley Harris Dowden 1993 This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

The Other Side of Charleston Michael Trinkley 1996 A study of the 1994 archaeological and historical

survey of the block in Charleston, S.C.--bounded by King St., Princess St., Archdale St., and Market St.--proposed for the construction of the Saks Fifth Avenue department store. Five site areas are explored, one associated with a standing structure used as a saloon and grocery throughout its history (corner of Market and Archdale), two associated with free persons of color, one associated with a middle-income white family, and a fifth associated with the rear alleyway of a businessman's hotel during the 19th century.

Case Studies in Marriage and Family Therapy Larry B. Golden 2004 The authors believe that prospective counselors must learn from the experience of practicing counselors. This enjoyable-to-read, inexpensive casebook offers nineteen live marriage and family therapy case studies that exemplify the major approaches taken to marriage and family counseling. The nineteen contributors provide real-life data about their counseling sessions, their decision-making process, their personal feelings, and even their mistakes. A common organization for each case study features: the problem, the diagnosis, goals, strategies, session-by-session accounts, results, and a "post-mortem." It is telling that the contributing authors have provided the case that touched them most, not their most successful case. For future counselors, therapists, and social workers.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The New Financial Capitalists George P. Baker 1998-10-13 Kohlberg Kravis Roberts's approach to leveraged buyouts was an important aspect of the corporate restructuring and governance reforms in the American economy from the mid-1970s through 1990. During that period, KKR crafted a series of progressively more elaborate deals tailored to specific companies and market conditions. Through its creative debt financing and its relationships with an evolving cast of investors, companies, and managers, KKR drove the scale and scope of the buyout phenomenon to unprecedented highs. This book, first published in 1999, examines KKR's record in detail. Based upon interviews with partners of the firm and on unprecedented access to KKR's records, George Baker and George Smith have written a balanced and enlightening account of how KKR has approached LBOs. The book focuses on KKR's founding, evolution, and innovations as ways to understand issues in modern American business. In examining KKR as a unique form of enterprise, the book bridges the gap between public perception and academic knowledge of the leveraged buyout.

Neuromarketing Leon Zurawicki 2010-09-02 Over the last 10 years advances in the new field of neuromarketing have yielded a host of findings which defy common stereotypes about consumer behavior. Reason and emotions do not necessarily appear as opposing forces. Rather, they complement one another. Hence, it reveals that consumers utilize mental accounting processes different from those assumed in marketers' logical inferences when it comes to time, problems with rating and choosing, and in post-purchase evaluation. People are often guided by illusions not only when they perceive the outside world but also when planning their actions - and consumer behavior is no exception. Strengthening the

control over their own desires and the ability to navigate the maze of data are crucial skills consumers can gain to benefit themselves, marketers and the public. Understanding the mind of the consumer is the hardest task faced by business researchers. This book presents the first analytical perspective on the brain - and biometric studies which open a new frontier in market research.
