Biosignatures for Astrobiology Barbara Cavalazzi 2018-10-01 This book aims at providing a brief but broad overview of biosignatures. The topics addressed range from prebiotic signatures in extraterrestrial materials to the signatures characterising extant life as well as fossilised life, biosignatures related to space, and space flight instrumentation to detect biosignatures either in situ or from orbit. The book ends with philosophical reflections on the implications of life elsewhere. In the 15 chapters written by an interdisciplinary team of experts, it provides both detailed explanations on the nature of biosignatures as well as useful case studies showing how they are used and identified in ancient rocks, for example. One case study addresses the controversial finding of traces of fossil life in a meteorite from Mars. The book will be of interest not only to astrobiologists but also to terrestrial paleontologists as well as any reader interested in the prospects of finding a second example

of life on another planet.

British Romanticism and the Catholic Question M. Tomko 2010-11-17 The debate over extending full civil rights to British and Irish Catholics not only preoccupied British politics

but also informed the romantic period's most prominent literary works. This book offers the first comprehensive, interdisciplinary study of Catholic Emancipation, one of the romantic period's most contentious issues.

Classics and Translation D. S. Carne-Ross 2010 D. S. Carne-Ross (1921-2010) was one of the finest critics of classical literature in English translation after Arnold. More than four decades of Carne-Ross's writings are represented in this volume, which includes criticism of both ancient and modern writers, in addition to historical-critical studies of translation, discriminating analyses of translators widely read today, and investigations in the relationship between translation, criticism, and literary creation. This book will appeal to a wide audience including classicists, specialists in reception and translation studies, students of comparative literature, and literary readers. Two chapters give readings of the *Odyssey* and the *Oresteia*; others focus on significant and influential translators of those works. Two long essays give extended accounts of two of the most widely read twentieth-century translators of Greek and Latin, Robert Fitzgerald and Richmond Lattimore; there are also incisive studies of translations by H.D., David Ferry, Christopher Logue and others. Some essays focus on a particular work, author, or genre in translation, for example, Pindar's *Pythian 12*, Horace, Greek tragedy, and Greek epigram. The first and the final chapters use translation as a point of departure in order to investigate questions about transfers between ancient and modern literatures. In all the essays, translated works are considered in their relation to Greek or Roman literature and also as contributions to English literature, as a source of innovation for it, or as a way of laying bare connections between past and present moments.

Palimpsestic Memory Max Silverman 2013-02-28 The interconnections between histories and memories of the Holocaust, colonialism and extreme violence in post-war French and Francophone fiction and film provide the central focus of this book. It proposes a new model of 'palimpsestic memory', which the author defines as the condensation of different spatio-temporal traces, to describe these interconnections and defines the poetics and the politics of this composite form. In doing so it is argued that a poetics dependent on tropes and techniques, such as metaphor, allegory and montage, establishes connections across space and time which oblige us to perceive cultural memory not in terms of its singular attachment to a particular event or bound to specific ethno-cultural or national communities but as a dynamic process of transfer between different moments of racialized violence and between different cultural communities. The structure of the book allows for both the theoretical elaboration of this paradigm for cultural memory and individual case-studies of novels and films.

Visual Research Methods in the Social Sciences Stephen Spencer 2022-09-23 *Visual Research Methods in the Social Sciences: Awakening Visions* is an indispensable resource for students, researchers and teachers seeking to use visual sources in their research and understand how images work. This fully updated edition adds questions and activities for studies and many new images and models as well as additional exploration of social and theoretical contexts and examples of current visual and multimodal research. Due to the proliferation of image-centric social media and the growing potential for 'fake news', being able to critically assess media and other visual messages is more important than ever. For researchers embarking on visual research this book offers useful practical guidance and real-world examples from seasoned researchers exploring cultures as varied as: religious cults in Venezuela, the Beer Can Regatta in Darwin, Mapuche Indians in Chile and graffiti artists in Sheffield. It offers an integrated approach to visual research, building compelling case studies using a wide range of visual forms, including: archive images, media samples, maps, objects, video, photographs and drawings alongside traditional qualitative approaches. Examples of the visual construction of 'place', representations of social identities and different approaches to analysis are explored in the first section of the book, whilst the essays in the second section highlight the creativity and innovation of four leading visual researchers. This new edition will prove valuable for both experienced visual researchers and those embarking on visual research in the social sciences for the first time.

Fashion, Desire and Anxiety Rebecca Arnold 2001 Fashion, and the glossy magazines it inhabits, allow Western culture to dream. It permits a person to fantasize and to experiment with new identities. It flaunts glamour and success. Appearance becomes something to be perfected and admired. These dreams and freedoms, Rebecca Arnold proposes, are contradictory. Fashion and its surrounding imagery elicit fear and anxiety in their consumers as well as pleasure. Fashion has come to incorporate the underside of modern life, with violence and decay becoming a dominant theme in clothing design and photography. Arnold draws on diverse written sources to explore the complex nature of modern fashion. She discusses a range of key themes: how fashion uses and abuses the power of wealth; the alienating promotion of "good" taste; the power plays of sex and display; and how identities can be blurred to disguise and confuse. In order to unravel the contradictory emotions of desire and anxiety they provoke, she never loses sight of the historical and cultural contexts in which fashion designers and photographers perform. Generously illustrated, *Fashion, Desire and Anxiety* focuses on the last thirty years, from photographic works of the 1970s to the beginning of the twenty-first century.

The Age of Oligarchy Geoffrey Holmes 2014-07-16 The second volume, on early and mid-Georgian Britain, shows how the country used its expanding wealth, its new-found social cohesion at home and its international influence abroad to become not only a European but an imperial power. As with the first volume, every aspect of the period is covered.

Paramedic: Anatomy & Physiology American Academy of Orthopaedic Surgeons (AAOS), 2005-07-25 *Paramedic: Anatomy and Physiology* utilizes a systemic approach, beginning by formulating a basic picture of the human body, then moving into more anatomic detail. Individual chapters discuss body systems, both how they function individually and together as a unit. In addition to the overall picture of each system, this text presents both the gross anatomy and the microscopic anatomy of vital structures.
