Blue Skies Patrick Parsons 2008-04-05 Cable television is arguably the dominant mass media technology in the U.S. today. Blue Skies traces its history in detail, depicting the important

events and people that shaped its development, from the precursors of cable TV in the 1920s and '30s to the first community antenna systems in the 1950s, and from the creation of the national satellite-distributed cable networks in the 1970s to the current incarnation of "infrastructure" that dominates our lives. Author Patrick Parsons also considers the ways that economics, public perception, public policy, entrepreneurial personalities, the social construction of the possibilities of cable, and simple chance all influenced the development of cable TV. Since the 1960s, one of the pervasive visions of "cable" has been of a ubiquitous, flexible, interactive communications system capable of providing news, information, entertainment, diverse local programming, and even social services. That set of utopian hopes became known as the "Blue Sky" vision of cable television, from which the book takes its title. Thoroughly documented and carefully researched, yet lively, occasionally humorous, and consistently insightful, *Blue Skies* is the genealogy of our media society.

The Agile Imperative Sabine Pfeiffer 2021-07-30 In an ever-changing working environment, customer and workplace demands have brought new challenges to how we organize and manage work. Increasingly, this is addressed by the idea of 'agility.' From its beginning, agile work has claimed to be a radically different approach which allows organisations to react flexibly to changing environmental demands whilst also offering a 'people' centered approach to management. While the literature often examines agile instruments from a business perspective, this edited collection advances the discussion of the efficacy of agile working, by applying a more critical social science perspective. The chapters scrutinize whether agility is just a discursive imperative, or whether it is in fact a genuine organizational and institutional strategy that is meant to better deal with complexity and volatility. The answers to these questions can vary at different levels, and the editors therefore examine agility at the level of teams, organizations and societies. By assembling different perspectives on the sustainability and virtue of agile instruments, and by bringing together international scholars from a variety of disciplines, the project stimulates a comparative discussion.

Organization Development Robert Smither 2016-06-03 Organization Development: Strategies for Changing Environments, Second Edition, aims to help managers of the future successfully plan for and manage changes in the workplace. The book teaches students how to conceptualize and implement planned interventions to increase organizational effectiveness. Building on the success of the previous edition, Smither, Houston, and McIntire maintain the foundational and historical organization development content while incorporating a number of key changes: new material on change management, globalization, diversity, sustainability, ethics, talent management, and emotional intelligence; a greater emphasis on the practical application of the theory; new case studies focusing on current business dilemmas that align with the chapter objectives. This edition brings this classic book into the 21st century, making it a valuable resource for students of organizational development, organizational behavior, change management, and leadership.

Inside the Patent Factory Donal O'Connell 2008-06-09 The book is a coaching guide for anyone interested in intellectual property and those wanting to embark on or develop patent creation. It draws on the authors' extensive experience and insights from change projects, management and leadership at Nokia. The book guides the reader through each stage of setting up a successful unit, inviting active involvement by asking vital questions about their needs and aims. Focusing on key issues and themes involved, it provides examples, diagrams and models to illustrate how they can be put into practice. Critical chapters include the core activities of patent creation, possible organisational models, costs, quality and the comparison of external and internal allocation of tasks. Discussion concentrates on how to such define roles and responsibilities and the management techniques of external resources. The book encourages the reader to challenge their current organisational structure and strategy by introducing various methods and tactics that can be deployed when considering patent

creation, then offering advice into the pros and cons of techniques and how such methods can be assessed. The book highlights how knowledge and innovation can be utilised and protected, which due to the increased importance of intellectual property rights, especially the use of patents, is essential for every business.

Case Studies in Retrofitting Suburbia June Williamson 2021-01-05 A brand-new collection of 32 case studies that further demonstrate the retrofitting of suburbia This amply-illustrated book, second in a series, documents how defunct shopping malls, parking lots, and the past century's other obsolete suburban development patterns are being retrofitted to address current urgent challenges they weren't designed for: improving public health, increasing resilience in the face of climate change, leveraging social capital for equity, supporting an aging society, competing for jobs, and disrupting automobile dependence. Case Studies in Retrofitting Suburbia: Urban Design Strategies for Urgent Challenges provides summaries, data, and references on how these challenges manifest in suburbia and discussion of successful urban design strategies to address them in Part I. Part II documents how innovative design strategies are implemented in a range of northern American contexts and market conditions. From modest interventions with big ripple effects to ambitious do-overs, examples of redevelopment, reinhabitation, and greening of changing suburban places from coast to coast are described in depth in 32 brand new case studies. Written by the authors of the highly influential Retrofitting Suburbia: Urban Design Solutions for Redesigning Suburbs Demonstrates changes that can and already have been realized in suburbia by focusing on case studies of retrofitted suburban places Illustrated in full-color with photos, maps, plans, and diagrams Full of replicable lessons and creative responses to ongoing problems and

potentials with conventional suburban form, *Case Studies in Retrofitting Suburbia: Urban Design Strategies for Urgent Challenges* is an important book for students and professionals involved in urban design, architecture, landscape architecture, urban planning, development, civil engineering, public health, public policy, and governance. Most of all, it is intended as a useful guide for anyone who seeks to inspire revitalization, justice, and shared prosperity in places they know and care about.

Research in Accounting Regulation Gary Previts 2000-12-20 The scope of service provided by professional accountants is influenced by legislation and case law as well as the dictates of a variety of government and private sector agencies; including State Boards of Accountancy, Academic Accreditation Bodies, the United States Securities and Exchange Commission, independent standard setting bodies such as the Federal Accounting Standards Advisory Board [US], the Financial Accounting Standards Board [US], and self-regulatory organizations such as State Societies of CPAs and the American Institute of Certified Public Accountants. There are equivalent and emerging national bodies that exist in most developed and developing countries, and further there are emerging global coordinating entities as well, which attempt to coordinate the activities among nations. It is important for academics, students, practitioners, regulators and researchers to consider, study and understand the role and relationship of such bodies with the practice and content of our discipline. *Research in Accounting Regulation* is a refereed annual serial that seeks to publish high quality

manuscripts, which address regulatory issues and policy affecting the practice of accountancy, broadly defined. Topics of interest include research based upon: self-regulatory activities, case law and litigation, government and quasi-governmental regulation, and the economics of regulation, including modeling. The serial aims to encourage the submission of original empirical, behavioral or applied research manuscripts that consider strategic and policy implications for regulation, regulatory models and markets.

Bold Ventures S. Raizen 1996-12-31 This book presents comprehensive results from case studies of five innovations in science education that have much to offer toward understanding current reforms in this field. Each chapter tells the story of a case in rich detail, with extensive documentation, and in the voices of many of the participants--the innovators, the teachers, the students. Similarly, Volume 3 of Bold Ventures presents the results from case studies of five innovations in mathematics education. Volume 1 provides a cross-case analysis of all eight innovations. Many U.S. readers certainly will be very familiar with the name of at least one if not all of the science innovations discussed in this volume--for example, Project 2061--and probably with their general substance. Much of the education community's familiarity with these arises from the projects' own dissemination efforts. The research reported in this volume, however, is one of the few detailed studies of these innovations undertaken by researchers outside the projects themselves. Each of the five studies was a large-scale effort involving teams of researchers over three years. These teams analyzed many documents,

attended numerous critical project meetings, visited multiple sites, conducted dozens of individual interviews. The team leaders (Atkin, Huberman, Rowe), having spent much time with science education over long careers, looked at these innovations through many lenses. It was a daunting task for each team to sift through the mountains of detail in order to bring the most compelling themes to the surface.

Why Managing Sucks and How to Fix It Jody Thompson 2013-02-04 Change the way you think about work (and life) by focusing on results—and only results Why Managing Sucks and How to Fix It shows how the Results-Only Work Environment (ROWE) mindset can make you or your organization more entrepreneurial, more connected with the broader trends in your industry, and more willing to take smart risks. It explains how to set clear expectations and focus on the endpoint as opposed to managing the process that gets you there. With eyes set on getting rid of distractions, long meetings, and unnecessary updates, this book offers quick, everyday strategies to experience huge increases in productivity (without adding resources) and dramatic drops in turnover. Authors Ressler and Thompson began their work together at Best Buy where they are credited with revolutionizing the workplace Reframes thinking away from counting on general availability (Where's Bob?) to creating clear expectations (Does Bob know exactly what's expected of him?) Explains how to reduce the number of meetings while increasing their quality Shows how to eliminate scheduled events in order to increase critical thinking and improve communication ROWE is a bold, cultural transformation that permeates the attitudes and operating style of an entire workplace, leveling the playing field and giving people complete autonomy—to manage their measurable results using adult common sense.

The Imagination Machine Martin Reeves 2021-06-08 A guide for mining the imagination to find powerful new ways to succeed. We need imagination now more than ever—to find new opportunities, rethink our businesses, and discover paths to growth. Yet too many companies have lost their ability to imagine. What is this mysterious capacity? How does imagination work? And how can organizations keep it alive and harness it in a systematic way? The Imagination Machine answers these questions and more. Drawing on the experience and insights of CEOs across several industries, as well as lessons from neuroscience, computer science, psychology, and philosophy, Martin Reeves of Boston Consulting Group's Henderson Institute and Jack Fuller, an expert in neuroscience, provide a fascinating look into the mechanics of imagination and lay out a process for creating ideas and bringing them to life:
