*Rethinking Transnational Chinese Cinemas* Jeremy E. Taylor 2020-11-26 The Amoy-dialect film industry emerged in the 1950s, producing cheap, b-grade films in Hong Kong for direct export to the theatres of Manila Chinatown, southern Taiwan and Singapore. Films made in Amoy dialect - a dialect of Chinese - reflected a particular period in the history of the Chinese diaspora, and have been little studied due to their ambiguous place within the wider realm of Chinese and East Asian film history. This book represents the first full length, critical study of the origin, significant rise and rapid decline of the Amoy-dialect film industry. Rather than examining the industry for its own sake, however, this book focuses on its broader cultural, political and economic significance in the region. It questions many of the assumptions currently made about the 'recentness' of transnationalism in Chinese cultural production, particularly when addressing Chinese cinema in the Cold War years, as well as the prominence given to 'the nation' and 'transnationalism' in studies of Chinese cinemas and of the Chinese Diaspora. By examining a cinema that did not fit many of the scholarly models of 'transnationalism', that was not grounded in any particular national tradition of filmmaking and that was largely unconcerned with 'nation-building' in post-war Southeast Asia, this book challenges the ways in which the history of Chinese cinemas has been studied in the recent past.

Sweet Mandarin Helen Tse 2008-07-08 Chronicles a dramatic, century-long history of a family of Chinese women, from their poverty-stricken lives in early twentieth-century China, to their rise to prosperity in 1930s Hong Kong, to their experiences as restaurateurs in modern England. 15,000 first printing.

**Worn on This Day** Kimberly Chrisman-Campbell 2019-11-05 This stunning visual guide is a journey of discovery through fashion's fascinating history, one day at a time. Beginning on January 1st and ending on December 31st, Worn On This Day looks at garments worn on monumental occasions across centuries, offering capsule fashion histories of everything from space suits to wedding gowns, Olympics uniforms, and armor. It creates thought-provoking juxtapositions, like Wallis Simpson's June wedding and Queen Elizabeth's June coronation, or the battered shoes Marie-Antoinette and a World Trade Center survivor wore to escape certain death, just a few calendar days apart. In every case there is a newsworthy narrative behind the garment, whether famous and glamorous or anonymous and humble. Prominent figures like Abraham Lincoln, Marilyn Monroe, and the Duchess of Cambridge are represented alongside ordinary people caught up in extraordinary events. Beautifully illustrated throughout, Worn On This Day presents a revelatory mash-up of styles, stories, and personalities.

*21st Century Chinese Cyberwarfare* William Hagestad II 2012-03-05 *21st Century Chinese Cyberwarfare* draws from a combination of business, cultural, historical and linguistic sources, as well as the author's personal experience, to attempt to explain China to the uninitiated. The objective of the book is to present the salient information regarding the use of cyber warfare doctrine by the People's Republic of China to promote its own interests and enforce its political, military and economic will on other nation states. The threat of Chinese Cyberwarfare can no longer be ignored. It is a clear and present danger to the experienced and innocent alike and will be economically, societally and culturally changing and damaging for the nations that are targeted.

**Perspective Taking: building a neurocognitive framework for integrating the “social” and the “spatial”** Klaus Kessler 2015-06-08 Background: Interacting with other people involves spatial awareness of one's own body and the other's body and viewpoint. In the past, social cognition has focused largely on belief reasoning, which is abstracted away from spatial and bodily representations, while there is a strong tradition of work on spatial and object representation which does not consider social interactions. These two domains have flourished independently. A small but growing body of research examines how awareness of space and body relates to the ability to interpret and interact with others. This also builds on the growing awareness that many cognitive processes are embodied, which could be of relevance for the integration of the social and spatial domains: Online mental transformations of spatial representations have been shown to rely on simulated body movements and various aspects of social interaction have been related to the simulation of a conspecific's behaviour within the observer's bodily repertoire. Both dimensions of embodied transformations or mappings seem to serve the purpose of establishing alignment between the observer and a target. In spatial cognition research the target is spatially defined as a particular viewpoint or frame of reference (FOR), yet, in social interaction research another viewpoint is occupied by another's mind, which crucially requires perspective taking in the sense of considering what another person experiences from a different viewpoint. Perspective taking has been studied in different ways within developmental psychology, cognitive psychology, psycholinguistics, neuropsychology and cognitive neuroscience over the last few decades, yet, integrative approaches for channelling all information into a unified account of perspective taking and viewpoint transformations have not been presented so far. Aims: This Research Topic aims to bring together the social and the spatial, and to highlight findings and methods which can unify research across areas. In particular, the topic aims to advance our current theories and set the stage for future developments of the field by clarifying and linking theoretical concepts across disciplines. Scope: The focus of this Research Topic is on the SPATIAL and the SOCIAL, and we anticipate that all submissions will touch on both aspects and will explicitly attempt to bridge conceptual gaps. Social questions could include questions of how people

judge another person's viewpoint or spatial capacities, or how they imagine themselves from different points of view. Spatial questions could include consideration of different physical configurations of the body and the arrangement of different viewpoints, including mental rotation of objects or viewpoints that have social relevance. Questions could also relate to how individual differences (in personality, sex, development, culture, species etc.) influence or determine social and spatial perspective judgements. Many different methods can be used to explore perspective taking, including mental chronometry, behavioural tasks, EEG/MEG and fMRI, child development, neuropsychological patients, virtual reality and more. Bringing together results and approaches from these different domains is a key aim of this Research Topic. We welcome submissions of experimental papers, reviews and theory papers which cover these topics.

*Hmong Refugees in the New World* Christopher Thao Vang 2016-01-20 Almost no one in the West had heard of the Hmong before National Geographic ran a cover story on the Southeast Asian ethnic group that had allied with the United States in the Vietnam War, and few knew of them before their arrival in the U.S. and other Western nations in 1975. Originating in China centuries ago, they have been known by various names--Miao, Meo, Miaozi, Meng or San Miao--some of them derogatory. The Hmong in the West are war-displaced refugees from China and Laos, though they have been misidentified as belonging to other ethnic groups. This mislabeling has caused confusion about the Hmong and their history. This book details the history of the Hmong and their journey from Eastern to Western countries, providing a clear understanding of an immigrant culture little understood by the American public. Instructors considering this book for use in a course may request an examination copy here.

The Last Mandarin Stephen Becker 2016-01-12 An American soldier of fortune pursues a Japanese war criminal through the streets and alleyways of war-torn Peking in this edge-of-your-seat thrill ride from the author of *The Chinese Bandit Peking, 1948*. In the midst of a brutal winter, the Communists tighten their stranglehold on the ancient capital, preparing to strike. Peasants starve, students riot, police crack down, and an entire city shivers on the edge of revolt. A decade ago, Maj. Jack Burnham was an American civilian living in China when the Japanese invaded. Now, he has returned on a mission to capture a notorious war criminal before Peking falls to the Red Army. Kanamori Shoichi raped, murdered, and pillaged his way through China during World War II—he also broke Burnham’s nose. If caught, Kanamori will be brought before a tribunal and made to pay for his crimes, large and small. But finding one man in a devastated city of millions is no simple task. Luckily, Burnham has the help of a beautiful Chinese doctor eager to help her people find justice, as well as his own expert knowledge of the language and culture. But when he finally locates Kanamori, the showdown Burnham has sought for so long will be far stranger and more dangerous than he ever imagined. *The Last Mandarin* is the 2nd book in the Far East Trilogy, but you may enjoy reading the series in any order.

Comprehensive English Prefix and Suffix List □□□□□□□□□□□□□□□□ DAVID YAO Many English words are formed by taking basic words and adding combinations of prefixes and suffixes to them. A basic word to which affixes (prefixes and suffixes) are added is called a root word because it forms the basis of a new word. The root word are mostly from Latin and Greek. This is very similar to Chinese language, which contains Radical. Radicals normally give you some hints in meaning. By decoding the root words from Latin and Greek, you will find most deep words such as biology and medical term are easier to remember, you can even sense out a new word meaning even it is new to you or it is even French, German or Italian. You will not be intimidated by English words, on the opposite, you will enjoy the “decoding” approach as a fun way to expand your English vocabulary.

substantial English-language text on Industrial Archaeology in a decade, this handbook comes at a time when the global impact of industrialization is being re-assessed in terms of its legacy of climate change, mechanization, urbanization, the forced migration of peoples, and labour relations. Critical debates around the beginning of a new geological era - The Anthropocene - have emerged over the last decade. This approach interrogates the widespread exploitation of natural resources that forged industrialization from its early emergence in 18th century northern Europe to its contemporary ubiquity, environmental impacts, and social legacy within our globalized world. Through a broad international and multi-period set of chapters, this volume explores the complex origins, processes, and development of industrialization through both its physical remains and human consequences - both the good and the bad. It provides a diverse material framework for understanding our modern world, from its industrial origins through its future paths in the 21st century.

From Tian'anmen to Times Square Gina Marchetti 2006 From Tian'anmen to Times Square: Transnational China and the Chinese Diaspora on Global Screens, 1989-1997 explores the important interconnections involving questions of race, ethnicity, gender, and sexuality on world screens by examining a range of films, videos, and digital works associated with global Chinese culture. The ways in which the world has imagined China and the images the Chinese have used to depict themselves have changed dramatically since 1989. The media spotlight placed on Beijing during the spring of 1989 created repercussions that continue to affect how China is seen globally, how it sees itself, and how the Chinese outside the People's Republic see themselves. The films and other texts included in this book represent a range of work by media artists working within China, Hong Kong, Taiwan, Singapore, and on transnational co-productions involving those places. The book also features media from other positions within the Chinese diaspora (including Chinese America) and work produced on China by non-Chinese. Highlighting questions of the circulation of images, people, and commodities, the book explores the important interconnections involving questions of race, ethnicity, gender, and sexuality on global screens. Beginning and ending with Tian'anmen and world image culture, a portrait emerges of momentous change and persistent challenges facing media artists and filmmakers working within "Greater China."

**Studies in Ethnopragmatics, Cultural Semantics, and Intercultural Communication** Lauren Sadow 2019-10-23 This book is the third in a three-volume set that celebrates the career and achievements of Cliff Goddard, a pioneer of the Natural Semantic Metalanguage approach in linguistics. This third volume explores the potential of Minimal English, a recent offshoot of the Natural Semantic Metalanguage, with special reference to its use in Language Teaching and Intercultural Communication. Often considered the most fully developed, comprehensive and practical approach to cross-linguistic and cross-cultural semantics, Natural Semantic Metalanguage is based on evidence that there is a small core of basic, universal meanings (semantic primes) that can be expressed in all languages. It has been used for linguistic and cultural analysis in such diverse fields as semantics, cross-cultural communication, language teaching, humour studies and applied linguistics, and has reached far beyond the boundaries of

linguistics into ethnopsychology, anthropology, history, political science, the medical humanities and ethics.

An Epic Tale of the People of the Covenant (The origin of Christianity) Atsushi Murakami 2021-02-26 Last year (2019), I published the 6th edition of my book "The Origin of Christianity" with the subtitle "An Epic Tale of the People of the Covenant," paying attention to the fact that Christianity was born from the "church movement" that had occurred in the process of the people of the Covenant scattered all over the world after they had migrated from the Fertile Crescent at the mouths of the Tigris and Euphrates rivers to the Promised Land Canaan. However, later, it became clear that the Ephraim and Manasseh, only who possess the genetic characteristics of Paleo-Mongoloid among the twelve tribes of Israel, played an important role not only in the conquest of Canaan but also in the eastern transmission of Christianity. Thus, this time, I deliver this 7th edition with the main title of "An Epic Tale of the People of the Covenant." In creating the augmented part of the 7th edition, I got many hints from the blog of Protestant Bible commentator Mr. Arimasa Kubo (阿部 有政), who was the first pastor of the Ikebukuro-Nishi Church, and used them as the reference. **Bartók and the Grotesque** Julie Brown 2017-07-05 The grotesque is one of art's most puzzling figures - transgressive, comprising an unresolvable hybrid, generally focussing on the human body, full of hyperbole, and ultimately semantically deeply puzzling. In *Bluebeard's Castle* (1911), *The Wooden Prince* (1916/17), *The Miraculous Mandarin* (1919/24, rev. 1931) and *Cantata Profana* (1930), Bartók's scenarios featuring either overtly grotesque bodies or closely related transformations and violations of the body. In a number of instrumental works he also overtly engaged grotesque satirical strategies, sometimes - as in *Two Portraits: 'Ideal' and 'Grotesque'* - indicating this in the title. In this book, Julie Brown argues that Bartók's concerns with stylistic hybridity (high-low, East-West, tonal-atonal-modal), the body, and the grotesque are inter-connected. While Bartók developed each interest in highly individual ways, and did so separately to a considerable extent, the three concerns remained conceptually interlinked. All three were thoroughly implicated in cultural constructions of the Modern during the period in which Bartók was composing.

The Mandarin's Daughter Thomas Hailes Lacy 2020-09-12 The Mandarin's Daughter willow plate story was first performed on stage at Punch's Playhouse and Strand Theatre Friday, December 26, 1851, It is a light-hearted and picturesque interpretation of the Blue Willow plate story with musical interludes. The Strand Theatre, near St. Clement's Church, was originally called "Punch's Theatre", and was particularly adapted to the representation of burlesques, extravaganzas, farces, and light interludes according to Cruchley's *London in 1865: A Handbook for Strangers, 1865*, featuring information about Victorian London. Blue Willow Ware is a chinoiserie-style china pattern that has been around for over 200 years. The pattern was created by the engraver, Thomas Minton, and was inspired by Chinese ceramics decorated with landscape scenes that were fashionable in England during the 1780's. The blue willow pattern features a garden scene with a bridge, pagoda, a zig-zag bamboo fence, willow trees, birds, flowing water and a boat. The better-known version is Spode's English Willow transferware pattern. The blue willow design was probably inspired by either a Japanese folk tale called "The Green Willow" or a Chinese fairy tale about two young lovers who were forbidden to marry due to class differences. The

story line of The Mandarin's Daughter, Koong-see, features a beautiful only child of a wealthy mandarin who falls in love with her father's accountant administrator, Chang, an intelligent young man who is of a lower class than Koong-see therefore considered unworthy of a prominent Mandarin.
