Gunning for Ramirez: Silent as a Grave Nicolas Petrimaux 2018-07-31 What if the deadliest assassin in all of Mexico, a man with dozens of kills to his name, was actually a vacuum repairman in Arizona? Falcon City, Arizona. Jacques Ramirez works at Robotop, the leading home appliance company in the southwest United States. Jacques is efficient, thorough, and discreet. That last one is easy: he's also mute. But everything changes

when two members of one Tijuana's largest drug cartels take Jacques for the deadly hitman who betrayed them in the past: Ramirez. Could it be that the cartel's legendary clean-up man is really a legendary vacuum cleaner expert? Now that they've found him, the men of the cartel will do everything they can to kill this traitor! Nicolas Petrimaux presents a tribute to the action thrillers of the 1980s and 90s, a brutal narrative with never a dull moment. Gunning for Ramirez is as much a descendant of Friedkin's *To Live and Die in L.A.* as it is Tarantino's *Pulp Fiction* or Rodriguez's *Mexico Trilogy*.

If Hemingway Wrote JavaScript Angus Croll 2014-10-14 What if William Shakespeare were asked to generate the Fibonacci series or Jane Austen had to write a factorial program? In *If Hemingway Wrote JavaScript*, author Angus Croll imagines short JavaScript programs as written by famous wordsmiths. The result is a peculiar and charming combination of prose, poetry, and programming. The best authors are those who obsess about language—and the same goes for JavaScript developers. To master either craft, you must experiment with language to develop your own style, your own idioms, and your own expressions. To that end, *If Hemingway Wrote JavaScript* playfully bridges the worlds of programming and literature for the literary geek in all of us. Featuring original artwork by Miran Lipovača.

Clinical Manual of Geriatric Psychiatry James E. Spar 2007-04-02 Because limited training in geriatric psychiatry has tended to give insufficient attention to mental health care for the elderly, clinicians often need help when assessing and treating problems specific to older clients. *Clinical Manual of Geriatric Psychiatry* provides a single-volume reference that covers the full range of such problems, from depression to dementia. It shows that psychiatrists working with older people must sometimes be willing to play a generalist's role, combining routine medical management with psychiatric interventions or helping with social or situational problems. Drs. Spar and La Rue review the effects of aging on cognitive performance, including clinical

presentations of memory loss and medication-induced symptoms of mental disorder. They offer practical guidance to help the clinician not only diagnose and treat these conditions but also address such issues as evaluating competency for informed consent. Enhanced by numerous charts and tables for easy reference, the book boasts a broad range of coverage: • Guidelines to differential diagnosis of depression -- laboratory tests, psychological tests, and symptom rating scales -- along with insights on new directions in psychotherapy, including intervention within primary care. • Assessment of both selective serotonin reuptake inhibitors and non-SSRIs as first-line agents for depression, citing advantages and disadvantages of specific drugs, plus advice on switching or combining antidepressants. • Discussion of the effective use of electroconvulsive therapy -- particularly the use of brief-pulse, bilateral electrode placement -- as well as experimental therapies such as repetitive transcranial magnetic stimulation and vagal nerve stimulation. • Guidance in cognitive mental status examinations and brief screening tools for dementia and Alzheimer's disease, focusing on the Mini-Mental State Exam and summarizing advanced and experimental diagnostics such as single photon emission computed tomography and positron emission tomography. • Appraisal of psychosocial therapies for patients with Alzheimer's Disease, such as behavior modification and reminiscence therapy, plus use of cholinesterase inhibitors for treatment of cognitive deficits. • Review of approaches to anxiety disorders, including differential diagnosis of phobias, generalized anxiety disorder, obsessive-compulsive disorder, and panic disorder, with a focus on psychosocial-behavior therapy and medications of choice. With life expectancies increasing, people over 85 already constitute one of the fastest growing demographics -- and the number of older people with mental disorders is rising as well. *Clinical Manual of Geriatric Psychiatry* explains how working effectively with older adults requires a blending of specialized knowledge with a flexible approach to the patient -- and shows how to bring that about in daily practice.
