Long Way Round Ewan McGregor 2013-04-11 'A highly readable and spiritually uplifting book about a dream come true' Wanderlust 'Touching and memorable ... one for armchair travellers and bike freaks' Daily Mail From London to New York, Ewan and Charley chased their shadows through Europe, the Ukraine, Kazakhstan, Mongolia and Russia, across the Pacific to Alaska, then down through Canada and America. But as the miles slipped beneath the tyres of their big BMWs, their troubles started. Exhaustion, injury and accidents tested their strength. Treacherous roads, unpredictable weather and turbulent politics challenged their stamina. They were chased by paparazzi in Kazakhstan, courted by men with very large guns in the Ukraine, hassled by the police, and given bulls' testicles for supper by Mongolian nomads. And yet despite all these obstacles they managed to ride more than twenty thousand miles in four months, changing their lives forever in the process. As they travelled they documented their trip, taking photographs, and writing diaries by the campfire. Long Way Round is the result of their adventures - a fascinating, frank and highly entertaining travel book about two friends riding round the world together and, against all the odds, realising their dream.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Riding in the Zone Ken Condon 2019-10-15 Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of

the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

It features a 1,170 cc (71 cu in) flat-twin engine with a six-speed gearbox and shaft drive. Four generations of "RT" motorcycles from 1996 to the present BMW Motorrad began manufacturing "RT" ((Reise-Tourer, or "travel tourer") touring motorcycle models in the late 1970s. The first of these were "airhead" models that continued BMW's long tradition dating to 1923 of producing "boxer" or opposed-twin engined motorcycles with unit engine-transmission construction and shaft final drive. In 1995 BMW produced its first "oilhead" RT, the R1100RT. The new machine included oil-cooling, standard ABS brakes, four-valve heads, 5 speed gearbox, Telelever front suspension, Paralever rear suspension, and an electrically adjustable screen. This model was further updated in 2004 by the addition of two spark plugs per cylinder. The next version of the RT series arrived in 2005 with the introduction of the R1200RT. The design of this model is completely different from the R1150RT with a 15% boost in power, 20 kg (44 lb) weight saving, optional electronically...
