The Translator's Turn Douglas Robinson 1991 Despite landmark works in translation studies such as George Steiner's *After Babel* and Eugene Nida's *The Theory and Practice of Translation*, most of what passes as con-temporary "theory" on the subject has been content to remain largely within the realm of the anecdotal. Not so Douglas Robinson's ambitious book, which, despite its author's protests to the contrary, makes a bid to displace (the deconstructive term is apposite here) a gamut of earlier cogitations on the subject, reaching all the way back to Cicero, Augustine, and Jerome. Robinson himself sums up the aim of his project in this way: "I want to displace the entire rhetoric and ideology of mainstream translation theory, which ... is medieval and ecclesiastical in origin, authoritarian in intent, and denaturing and mystificatory in effect." -- from <http://www.jstor.org> (Sep. 12, 2014).

Law and Happiness Eric A. Posner 2010-04-15 Since the earliest days of philosophy, thinkers have debated the meaning of the term happiness and the nature of the good life. But it is only in recent years that the study of happiness—or "hedonics"—has developed into a formal field of inquiry, cutting across a broad range of disciplines and offering insights into a variety of crucial questions of law and public policy. *Law and Happiness* brings together the best and most influential thinkers in the field to explore

the question of what makes up happiness—and what factors can be demonstrated to increase or decrease it. Martha Nussbaum offers an account of the way that hedonics can productively be applied to psychology, Cass R. Sunstein considers the unexpected relationship between happiness and health problems, Matthew Adler and Eric A. Posner view hedonics through the lens of cost-benefit analysis, David A. Weisbach considers the relationship between happiness and taxation, and Mark A. Cohen examines the role crime—and fear of crime—can play in people’s assessment of their happiness, and much more. The result is a kaleidoscopic overview of this increasingly prominent field, offering surprising new perspectives and incisive analyses that will have profound implications on public policy.

Teaching Together, Learning Together Wolff-Michael Roth 2005 Coteaching and cogenerative dialoguing are ways of learning to teach that truly bridge the gap between theory and praxis, as new teachers learn to teach alongside peers and more experienced teachers. These practices are also means of overcoming teacher isolation and burnout. Through cogenerative dialogue sessions, new and experienced teachers, university supervisors, researchers, and administrators are able to create local theory for the purpose of improving teaching and learning. In this book, contributors from four countries report on how coteaching and cogenerative dialoguing worked in their situation.

The guide introduces the language education policy that underpins the ELP, explores the key concepts that it embodies, and explains how to plan, implement and evaluate whole-school ELP projects. Integrated Curriculum for Secondary Education English - Years 1 and 2 Claire Manners 2012 The MEC/BC bilingual project, initiated in 1996 in primary as a unique experiment within the Spanish state education system, and in September 2004 the classes that had started their bilingual education 8 years earlier took the project forward into Secondary schools. The formal agreement between the MEC/BC states that the aim of the project is to provide students from the age of three to sixteen with a bilingual, bicultural education through an integrated Spanish/English curriculum based on the Spanish National Curriculum and aspects of the National Curriculum for England and Wales. The implantation of such a curriculum requires, firstly, with regard to English as a subject, a very different classroom approach from the traditional EFL classroom where the focus is on learning English as a foreign language; secondly, a similar new methodology for teaching and learning other curricular areas through English. Such an integrated approach sits very positively within the Directives of the Council of Europe which insists on the need for students to be competent in three European languages by the end of the obligatory period of Secondary Education and that the learning of the first foreign language should begin in the early years of formal education. In addition to this, the secondary integrated curricula have consistently focused on the continuing development of students' skills and learning strategies, thus firmly establishing learning as a lifelong process. The specific objectives of the Project in the Secondary education level are to: continue the acquisition and learning of both languages through an integrated content-based curriculum, encourage awareness and understanding of the diversity of both cultures, facilitate the exchange of teachers and students, encourage the use of modern technologies in learning other languages, promote the certification of studies under both educational systems, if and when appropriate.

Primary School Geography (1994) Bill Marsden 2019-07-24 Published in 1994, this book is the result of the collaborative work undertaken at the Liverpool-based Geography INSET Primary Project (GIPP) over three years. It presents a series of chapters for primary teachers seeking to implement the Statutory Orders for Geography in the National Curriculum. Steering a middle course between the

sophistications of a theoretical/methodological text and the over-simplifications of a 'tips-for-teachers' approach, the authors highlight the positive opportunities offered by the National Curriculum. At the same time they are critical of many aspects of the Statutory Orders, without losing sight of their objective to help teachers to improve the quality of primary geography teaching. The book is especially useful for INSET work for teachers who have already grappled with National Curriculum Geography and who will be adjusting to the post-Dearing rearrangements.

Words, Words, Words David Crystal 2007 Words, Words, Words is all about the wonder of words. Drawing on a lifetime's experience, David Crystal explores language in all its rich varieties through words: the very building blocks of our communication. Language has no life of its own: it only exists in the mouths and ears, hands, eyes and brains of its users. As we are guided expertly and passionately through the mysteries and delights of word origins, histories, spellings, regional and social variations, taboo words, jargon, and wordplay, the contribution we all play in shaping the linguistic world around us becomes evident. Words, Words, Words is a celebration of what we say and how we say it. It invites us to engage linguistically with who we are: to understand what words tell us about where we come from and what we do. And as they continually shape our lives, it suggests ways that we can look at words anew and get involved with collecting and coining words ourselves.

Puzzle-based Learning Zbigniew Michalewicz 2008 What is missing in most curricula - from elementary school all the way through to university education - is coursework focused on the development of problem-solving skills. Most students never learn how to think about solving problems. Besides being a lot of fun, a puzzle-based learning approach also does a remarkable job of convincing students that (a) science is useful and interesting, (b) the basic courses they take are relevant, (c) mathematics is not that scary (no need to hate it!), and (d) it is worthwhile to stay in school, get a degree, and move into the real world which is loaded with interesting problems (problems perceived as real-world puzzles).

The Texts in Elementary Classrooms James V. Hoffman 2004-09-22 This CIERA sponsored book is based on the premise that high-quality texts of all kinds are essential to good teaching in elementary classrooms. Experts on a variety of text-related topics were asked to summarize existing research and then apply it to literacy development in an "ideal" classroom. The most comprehensive and up-to-date book in its field, it moves progressively from an examination of discrete literacy processes and forms to a holistic overview and assessment of the classroom literacy environment. Content coverage in this outstanding new book includes: *Literacy Processes--Part I examines basic reading processes (instruction, comprehension, word recognition, fluency, and motivation) as they relate to text features. *Forms of Texts--Part II examines the wide variety of text types (fiction, nonfiction, leveled, local, and electronic) that comprise an effective classroom literacy program. Discussions include the nature of these texts, their qualities and quantities, how they fit into an instructional plan, and how a teacher might assess their effectiveness. *Text Selection--Part III examines special issues (linguistic diversity and teachers as censors) related to the selection of classroom texts. *Personal Applications--The final, hands-on chapter synthesizes the book's ideas and offers practical tools (checklists and inventories) whereby teachers can self-assess the literacy environment of their own classrooms. This book is suitable for anyone (graduate students, in-service reading specialists and curriculum directors, college faculty, and researchers) who deal directly with issues of classroom literacy.

Basho's Narrow Road Matsuo Basho 2013-06-15 Matsuo Basho (1644-94) is considered Japan's greatest haiku poet. *Narrow Road to the Interior* (Oku no Hosomichi) is his masterpiece. Ostensibly a chronological account of the poet's five-month journey in 1689 into the deep country north and west of the old capital, Edo, the work is in fact artful and carefully sculpted, rich in literary and Zen allusion and filled with great insights and vital rhythms. In *Basho's Narrow Road: Spring and Autumn Passages*, poet and translator Hiroaki Sato presents the complete work in English and examines the threads of history, geography, philosophy, and literature that are woven into Basho's exposition. He details in particular the extent to which Basho relied on the community of writers with whom he traveled and joined in linked verse (renga) poetry sessions, an example of which, *A Farewell Gift to Sora*, is included in this volume. In explaining how and why Basho made the literary choices he did, Sato shows how the poet was able to transform his passing observations into words that resonate across time and culture.
