Detecting and Explaining Technological Innovation in Prehistory Michela Spataro 2019-12-19 Technology refers to any set of standardised procedures for transforming raw materials into finished products. Innovation consists of any change in technology which has tangible and lasting effect on human practices, whether or not it provides utilitarian advantages. Prehistoric societies were never static, but the tempo of innovation occasionally increased to the point that we can refer to transformation taking place. Prehistorians must therefore identify factors promoting or hindering innovation. This volume stems from an international workshop, organised by the Collaborative Research Centre 1266 'Scales of Transformation' at Kiel University in November 2017. The meeting challenged its participants to detect and explain technological change in the past and its role in transformation processes, using archaeological and ethnographic case studies. The papers draw mainly on examples from prehistoric Europe, but case-studies from Iran, the Indus Valley, and contemporary central America are also included. The authors adopt several perspectives, including cultural-historical, economic, environmental, demographic, functional, and agent-based approaches. These case studies often rely on interdisciplinary research, whereby field archaeology, archaeometric analysis, experimental archaeology and ethnographic research are used together to observe and explain innovations and changes in the artisan's repertoire. The results demonstrate that interdisciplinary research is becoming essential to understanding transformation phenomena in prehistoric archaeology, superseding typo-chronological description and comparison. This book is a scholarly publication aimed at academic researchers, particularly archaeologists and archaeological scientists working on ceramics, osseous and metal artifacts.

Sense of Place in Natural Resource Recreation and Tourism Jennifer Farnum 2005 Understanding sense of place and related concepts often presents challenges for both managers and researchers. Inconsistent application of terms, questions regarding their origin, and a lack of awareness of research findings contribute to the ambiguity of these concepts. This integrative review of research provides relevant, current information on the role of sense of place in natural-resourcebased recreation and tourism. Special focus is given to the foundations of place attachment, how place attachment may differ among user types, and the relation of place attachment to other psychological phenomena such as attitudes. The role of theory in place attachment also is addressed, and gaps in theoretical and empirical work are identified. This review provides specific recommendations for managers and others wanting to better understand the dynamics of sense of place.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

A History of Money Alan Pauls 2015-06-16 A major new novel from the writer Roberto Bolaño called “one of the best living Latin American writers” Alan Pauls, one of Latin American literature's rising stars, combines the intimate and the political in a novel that, although it is set in Argentina in the 1970s and '80s, will bring to mind books like Choire Sicha's *Very Recent History* and Sam Lipsyte's *The Ask* in its subtle, brilliant depiction of the place of money in its protagonists' lives. It begins with a body: a top executive of an iron and steel company dies after his helicopter, travelling toward the factory where he is due to meet with striking workers, plummets into the river. The briefcase full of money which he was carrying disappears without a trace. Accident, or assassination? And where is the money? *A History of Money* revolves around this event, as does the imagination and memory of the unnamed protagonist of the novel, who returns over and over to it even as he reflects on the role of money in his family and his own life. His parents are divorced: his father is a gambler who plays in all-night poker games and carries around all of his money in a wad of cash; his mother is a socialite who squanders her inherited fortune on a lavish lifestyle. Our protagonist, for his part, pays—in every sense of the word. And his individual story is echoed in the larger story of Argentina in the 1970s and '80s, where money is everything: promise and punishment, dream and disaster. An intensely evocative novel from one of the world's most exciting new writers.

Shuffling Nags, Lame Ducks Łászló Bartosiewicz 2013-11-01 The analysis of animal bone assemblages from archaeological sites provides much valuable data concerning economic and husbandry practices in the past, as well as insights into cultural and symbolic or ritual activity. Animal palaeopathology can identify diseases in archaeozoological assemblages but little interest has been expressed in investigating and understanding the cultural aspects of the diseases identified. Such assemblages represent the cumulative effects of human attitudes, decisions and influences regarding the keeping, care, treatment, neglect and exploitation of animals which result in a range of conditions, non-infectious diseases and injuries that can be recognised on ancient skeletal material. Additionally, ever since the domestication of a handful of animal species around 10,000 years ago, close physical proximity has been a mutual source of infectious disease and traumatic injury for humans and animals alike. *Shuffling Nags, Lame Ducks* provides an invaluable guide to the investigation of trauma and disease in archaeozoological assemblages. It provides a clear methodological approach, and describes and explains the wide range of traumatic lesions, infections, diseases, inherited disorders and other pathological changes and anomalies that can be identified. In so doing, it explores the impact that “man-made” decisions have had on animals, including special aspects of culture that may be reflected in the treatment of diseased or injured animals often incorporating powerful symbolic or religious roles, and seeks to enhance our understanding

of the relationship between man and beast in the past. Chapters include: · History of studying pathological animal remains · Differences between human and animal palaeopathology · Methodology · Growth, development and ageing · Traumatic lesions · Inflammatory diseases and bone · Pathological lesions in working animals · Diseases connected to the environment

Ego Is the Enemy Ryan Holiday 2016-06-14 The instant Wall Street Journal, USA Today, and international bestseller “While the history books are filled with tales of obsessive visionary geniuses who remade the world in their image with sheer, almost irrational force, I’ve found that history is also made by individuals who fought their egos at every turn, who eschewed the spotlight, and who put their higher goals above their desire for recognition.” —from the prologue Many of us insist the main impediment to a full, successful life is the outside world. In fact, the most common enemy lies within: our ego. Early in our careers, it impedes learning and the cultivation of talent. With success, it can blind us to our faults and sow future problems. In failure, it magnifies each blow and makes recovery more difficult. At every stage, ego holds us back. *Ego Is the Enemy* draws on a vast array of stories and examples, from literature to philosophy to history. We meet fascinating figures such as George Marshall, Jackie Robinson, Katharine Graham, Bill Belichick, and Eleanor Roosevelt, who all reached the highest levels of power and success by conquering their own egos. Their strategies and tactics can be ours as well. In an era that glorifies social media, reality TV, and other forms of shameless self-promotion, the battle against ego must be fought on many fronts. Armed with the lessons in this book, as Holiday writes, “you will be less invested in the story you tell about your own specialness, and as a result, you will be liberated to accomplish the world-changing work you’ve set out to achieve.”

Radio Frequency and Microwave Electronics Illustrated Matthew M. Radmanesh 2001 Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. another province Mohamed learns how to charm and steal, and discovers the joys of drugs, sex and alcohol. Proud, insolent and afraid of no one, he returns to Tangier, where he is caught up in the violence of the 1952 independence riots. It is here, during a short spell in a filthy Moroccan jail, that a fellow inmate kindles Mohamed's life-altering love of literature. 'A true document of human desperation, shattering in its impact.' Tennessee Williams 'Its unrelenting realism has produced a masterpiece ... In Choukri's African Islamic coastal cities the nightmares are of fathers killing children and the agony of hunger. Choukri's memories take him from famine in the Rif to Tangier and Oran, a world of crime, paid-for sex and of living poor ... It is an urban pain where every day "the alleys swallow me up and spew me out." A book to read, cherish and remember - and to show us again why we need books as well as bread.' Morning Star '(An) extraordinarily vivid, uncensored immediacy ... Using only undemonstrative prose, and asking for no special sympathy, Choukri conveys the experience of struggling to survive in a harsh world of dusty streets and unforgiving sunlight.' Guardian 'Five stars ... Achingly elegant ... Choukri's irrepressible, ultimately indomitable spirit is most touching and human.' Independent 'Richly descriptive and engaging ... an honest and vivid account. ... Definitely an enjoyable and worthwhile read.' Socialist Review 'A cult classic ... Choukri's text has become a staple on the syllabi of modern Arabic, comparative literature, and post-colonial studies programs.' Daily Star 'The most poetic exploration of that world of vice, coffee, conversation and intrigue ... One of the most widely read modernist novels in the Arab world.' Outsideleft.com

Chemical Ecology Anne-Geneviève Bagnères 2016-08-29 The book features comparative perspectives on the field of chemical ecology, present and future, offered by scientists from a wide variety of disciplines. The scientists contributing to this book –biologists, ecologists, biochemists, chemists, biostatisticians – are interested in marine, freshwater and terrestrial ecosystems and work on life forms ranging from micro-organisms to mammals, including humans, living in areas from the tropics to polar regions. Here, they cross their analyses of the present state of chemical ecology and its perspectives for the future. Those presented here include complex, multispecies communities and cover a wide range both of organisms and of the types of molecules that mediate the interactions between them. Up to now, no book has presented a solid scientific treatment of a wide range of examples. This book illustrates a diverse panel of the most advanced aspects of this rapidly expanding field.

Investigating Archaeological Cultures Benjamin W. Roberts 2011-06-04 Defining "culture" is an important step in undertaking archaeological research. Any thorough study of a particular culture first has to determine what that culture contains-- what particular time period, geographic region, and group of people make up that culture. The study of archaeology has many accepted definitions of particular cultures, but recently these accepted definitions have come into question. As archaeologists struggle to define cultures, they also seek to define the components of culture. This volume brings together 21 international case studies to explore the meaning of "culture" for regions around the globe and periods from the Paleolithic to the Bronze Age and beyond. Taking lessons and overarching themes from these studies, the contributors draw important conclusions about cultural transmission, technology development, and cultural development. The result is a comprehensive model for approaching the study

of culture, broken down into regions (Russia, Continental Europe, North America, Britain, and Africa), materials (Lithics, Ceramics, Metals) and time periods. This work will be valuable to all archaeologists and cultural anthropologists, particularly those studying material culture.

Radically Elementary Probability Theory Edward Nelson 1987 Using only the very elementary framework of finite probability spaces, this book treats a number of topics in the modern theory of stochastic processes. This is made possible by using a small amount of Abraham Robinson's nonstandard analysis and not attempting to convert the results into conventional form.

Henri Mercier and the American Civil War Daniel B. Carroll 2015-03-08 As French ambassador to the United States from July 1860 through December 1863, Henri Mercier was in an excellent position to observe, report, and influence the events of those crucial years. Through a description of Mercier's diplomacy, Professor Carroll gives a new account of the Civil War—the tenacious nationalism of the Lincoln-Seward government, the French economic distress caused by the loss of the cotton trade, the continental perspective on the War, the men and society of Washington and Richmond. He shows, in particular, that while maintaining friendly relations in Washington, Mercier seriously considered French recognition of the South, and intervention if necessary. Professor Carroll outlines the French peace proposals of 1862 and 1863, and also Mercier's ingenious plan for a North-South common market. Originally published in 1971.
