BORB Jane M. Riddoch 2022-04-09 BORB provides a set of standardised procedures for assessing neuropsychological disorders of visual object recognition, based on tests developed in the cognitive neuropsychological literature. The tests are introduced in terms of cognitive neuropsychological analyses of object recognition, and guidance is given concerning test use and interpretation. The tests assess low-level aspects of visual perception (using same-different matching of basic perceptual features, such as orientation, length, position and object size), intermediate visual processes (e.g., matching objects different in viewpoint), access to stored perceptual knowledge about objects (object decision), access to semantic knowledge (function and associative matches) and access to names from object (picture naming). BORB will serve as an invaluable companion test battery to the PALPA test of language ability.

Enumeratio florae Transsilvanicae vesiculosae critica Simonkai 1886

Cultivated vegetables of the world: a multilingual onomasticon Stanley J. Kays 2011-10-03 Vegetables make up a major portion of the diet of humans and are critical for good health. With the world population predicted to reach 9 billion people by 2050, they will play an increasingly important role in food availability. The purpose of this book is to facilitate accuracy in communication among individuals working in agriculture and a better understand of the extent and diversity of vegetable production and utilization worldwide. Increasing global economic interdependence and trade in agricultural products makes precise communication among individuals utilizing different languages essential. There is currently a wide range of vegetables shipped around the world as seasonal, economic and other forces are shifting markets from exclusively local toward global. The text provides up-to-date scientific names, synonyms, and common names for the commercially cultivated vegetable crops grown worldwide (404 crops), in addition to information on the plant parts utilized and their method of preparation. Common names from 370 languages are

presented along with information on each of the languages. The text represents an essential reference source with the information presented in a concise and readily accessible format. It allows indentifying a crop from the common name in a diverse cross-section of languages and is therefore of use to university and government researchers, libraries worldwide, agricultural organizations, agricultural scientists, embassies, international travelers, vegetable growers, shippers, packers, produce buyers, grocery store managers, gourmet restaurants, chefs, and gardeners.

The Face Specificity of Lifelong Prosopagnosia Bradford Z. Mahon 2020-04-30 Lifelong prosopagnosia has emerged as a key testing ground for theories of visual system organization, as well as the development and the emergence of neural specificity in the human brain. A key open issue concerns whether individuals who have lifelong prosopagnosia also experience difficulty with recognizing non-face stimuli. This volume features a thorough review of the congenital prosopagnosia literature and critical commentaries by the leading experts in the field. This book was originally published as a special issue of *Cognitive Neuropsychology*.

Borb Jason Little 2019-09-11 Radical comme une protest song, intense comme une douche froide, et drôle à en pleurer. Borb est un clochard, un clodo, une épave, un SDF, un mendiant, un crève-la-faim... bref, un déchet de la société. Borb, c'est aussi notre fils, notre cousin, notre frère en humanité. Borb, c'est cette réalité qu'on ne veut pas voir et que Jason Little nous envoie en pleine face. A travers une succession de strips mordants, l'auteur nous dépeint le quotidien de ce sans-abri dans une comédie douce-amère, à la fois touchante et hilarante. Le comique de situation, parfois quasi-muet, y est bienveillant et fait toute la force du livre : ce portrait poignant offre une représentation de la misère dotée d'un savant mélange d'humour grinçant et de gravité. New York en est le décorum, la misère répond à certains standards américains, mais l'universalité de ce conte tragique la rend transposable n'importe où en occident. Borb est un livre qui secoue son lecteur, qui ne laisse pas indemne et qui, pourtant, arrive à faire rire. Borb c'est radical comme une protest song, intense comme une douche froide, et drôle à en pleurer.

Pompeii, Its Life and Art August Mau 2022-05-28 The history of the legendary city, literally unearthed from the dust. After the volcano explosion, a stream of lava devastated the town and buried thousands of locals under the river of melted minerals. Centuries later, their last moment was recovered by filling the gaps in petrified lava. Thus, we see the previous inhabitants of Pompei in the final moments of their lives. This work collected the excavation materials, historical documents, and mentions to compile an objective picture of the ancient city's life and arts.

Glocal Narratives of Resilience Ana María Fraile-Marcos 2019-12-20 Resilience discourse has recently become a global phenomenon, infiltrating the natural and social sciences, but has rarely been undertaken as an important object of study within the field of the humanities. Understanding narrative in its broad sense as the representation in art of an event or story, Glocal Narratives of Resilience investigates the contemporary approaches to resilience through the analyses of cultural narratives that engage aesthetically and ideologically in (re)shaping the notion of resilience, going beyond the scales of the personal and the local to consider the entanglement of the regional, national and global aspects embedded in the production of crises and the resulting call for resilience. After an introductory survey of the state of the art in resilience thinking, the book grounds its analyses of a wide range of narratives from the American continent, Europe, and India in various theoretical strands, spanning Psycho-social Resilience, Socio-Ecological Resilience, Subaltern Resilience, Indigenous survivance and resurgence, Neoliberal Resilience, and Compromised Resilience thinking, among others, thus opening the path toward the articulation of a cultural narratology of resilience.

Flora of Russia - Andreï Aleksandrovich Fedorov 2000-06-01 This series of books is a translation of *Flora Evropeiskoi Chasti SSR*, which provides information on the wild and most important cultivated plants growing in the European portion of Russia and its bordering regions. The text describes plant systematics, habitat conditions, range, and chromosome numbers. The series serves as a manual for botanists, agronomists, teachers, students and naturalists. Volume 3 includes 14 families of dicotyledonous plants, many of which have valuable medicinal properties, such as Caprifoliaceae and Menyanthaceae. The text includes commentary on the largest of these families, Laminaceae.
