**Military Dependent Students** U.s. Government Accountability Office 2017-08-04 "DOD operates a worldwide school system to meet the educational needs of military dependents. Questions have arisen about whether DOD is meeting the special needs of some of these children, such as those with learning disabilities. In response to a mandate in the National Defense Authorization Act for Fiscal Year 2011, GAO reviewed (1) how DOD provides special education services; (2) how DOD entities coordinate to assign families overseas and how schools might be affected; (3) what challenges, if any, families face in accessing DOD services for their children with special educational needs and obtaining related information; and (4) what steps, if any, DOD is taking to enhance screening and overseas assignment for families with children with special educational needs. GAO reviewed relevant federal laws and regulations, analyzed DOD documents and data, and conducted interviews with officials from multiple DOD entities, including schools. GAO also held 22 focus groups with parents of children with special needs during site visits and phone interviews at eight military installations worldwide."

Communication, Control, and Computer Access for Disabled and Elderly Individuals Dale Bengston 1987 One of a series of three resource guides concerned with communication, control, and computer access for the disabled or the elderly, the book focuses on hardware and software. The guide's 13 chapters each cover products with the same primary function. Cross reference indexes allow access to listings of products by function, input/output feature, and computer model. Switches are listed separately by input/output features. Typically provided for each product are usually an illustration, the product name, vendor, size, weight, power source, connector type, cost, and a description. Part I, "Computer Adaptations," presents the following types of items: modifications for standard keyboards; alternate inputs usable with all software; input devices usable with only some software; input adapters for computers; alternate display systems usable with all software; Braille printers and tactile display components; speech synthesizers; and other software and hardware adaptations. Part II, "Application Software for Special Ed and Rehab," includes software for administration and management; assessment; education, training, and therapy; recreation; and personal tools or aids. Appendixes include a list of additional sources of information, a glossary, addresses of manufacturers listed with their products, and an alphabetical listing of all products in the 3-book series. **Performance Management** Herman Aguinis 2012-02-27 This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Discover where the real success in business can be found. What makes some businesses more successful than others? The answer: people. Organizations with motivated, talented employees that offer outstanding customer service are more likely to pull ahead of the competition. Performance Management is the first text to emphasize this key competitive advantage, showing readers that success in today's globalized business world can be found, not in technology and products, but in an organization's people. The third edition includes updated and current information, and features over forty new cases.

**Disrupt Aging** Jo Ann Jenkins 2016-04-05 This book "sets out to change the current conversation about what it means to get older. In it, Jenkins chronicles her own journey, as well as those of others who are making their mark as disrupters, to show readers how we can all be active, financially unburdened, and happy as we get older. It's [a] ... narrative that touches on all the important issues facing people 50+ today, from caregiving and mindful living to building age-friendly communities and attaining financial freedom"--

*Traffic Operations at Intersections* Rod Troutbeck 2020-06-03 Traffic Operations at Intersections: Learning and Applying the Models and Methods of the Highway Capacity Manual Chapters on all-way stop-controlled intersections, two-way stop-controlled intersections, and signalized intersections Designed for practicing transportation engineers and university seniors and graduate students 11 simplified scenarios to open-up your understanding of the HCM 43 example calculations that are fully worked out and explained in detail 7 computational engines that allow you to see inside and then apply the models 138 figures to clearly illustrate concepts Additional problems online The models of the Highway Capacity Manual (HCM) are often the engineer's choice to analyze intersection performance. These models are complex, and nearly all transportation engineers use software implementations of these models to conduct their analyses. Software applications are powerful tools that help engineers solve problems. But these applications also serve as barriers to the understanding of the complex models embedded in the software. Our major objective in writing this book is to transform the "black box" of the HCM intersection models, and their software implementations, into a "clear box" that allows the engineer to better understand how these models work. We do this through the idea of the "simplified scenario." The eleven scenarios that we present are based on conditions greatly simplified from what you would normally see in the field. By focusing on one concept at a time, in the context of these simplified conditions, you will better understand the fundamentals of the HCM intersection models. You will then be able to apply these models to more complex intersections with skill, confidence, and insight.
