As the first comprehensive homage to the R and RS models, this is a must-have for all Porsche 911 lovers. At auctions they rack up premium prices, but the makers of the 911 R never intended to create objects of speculation for maximum profit. Their main concern was developing vehicles that would appeal to customers because of their uncompromising sportiness. The story begins 50 years ago, when the first Porsche 911 R achieved five new long-distance world records in Monza; and goes on to the latest 911 R - a car that is aware of its history, with racing stripes, houndstooth bucket seats, manual gear change, and a free-revving naturally aspirated engine. In between the first and the latest lie 50 years, numerous models, and a legion of fans.

**Killing and Dying** Adrian Tomine 2021-05-04 "One of the most gifted graphic novelists of our time." -Wired Killing and Dying is a stunning showcase of the possibilities of the graphic novel medium and a wry exploration of loss, creative ambition, identity, and family dynamics. With this work, Adrian Tomine (Shortcomings, Scenes from an Impending Marriage) reaffirms his place not only as one of the most significant creators of contemporary comics but as one of the great voices of modern American literature. His gift for capturing emotion and intellect resonates here: the weight of love and its absence, the pride and disappointment of family, the anxiety and hopefulness of being alive in the twenty-first century. "Amber Sweet" shows the disastrous impact of mistaken identity in a hyper-connected world; "A Brief History of the Art Form Known as Hortisculpture" details the invention and destruction of a vital new art form

in short comic strips; "Translated, from the Japanese" is a lush, full-color display of storytelling through still images; the title story, "Killing and Dying", centers on parenthood, mortality, and stand-up comedy. In six interconnected, darkly funny stories, Tomine forms a quietly moving portrait of contemporary life. Tomine is a master of the small gesture, equally deft at signaling emotion via a subtle change of expression or writ large across landscapes illustrated in full color. Killing and Dying is a fraught, realist masterpiece.

White Lotus Jamgon Mipham 2015-09-01 The commentary translated in these pages is unusual and rare. But if the commentary is a rarity, its subject matter—the seven-line invocation of Padmasambhava—is one of the best-known prayers in the Tibetan Buddhist world. The overall significance of the Seven-Line Prayer is perhaps best appreciated in relation to a practice called guru-yoga, or "union with the nature of the guru." The purpose of guru-yoga is to purify and deepen the student's relationship with his or her teacher. It is introduced as one of the preliminary practices, and it remains crucial—in fact, its importance increases—as one progresses through the more advanced levels of the tantric path. The cultivation of devotion to the guru and the blending of one's mind with his or her enlightened mind is, in the words of Dilgo Khyentse Rinpoche, "the most vital and necessary of all practices and is in itself the surest and fastest way to reach the goal of enlightenment." Regarding the origin of this commentary, Mipham refers in the colophon to an event that triggered the abrupt appearance in his mind of the hidden meaning of the prayer. It is interesting to note that the language Mipham uses suggests that the commentary itself is not an ordinary composition but perhaps a treasure teaching, specifically a "mind-treasure" or gongter.

**MATLAB for Engineering** Berardino D'Acunto 2021-10 This book presents an introduction to Matlab for students and professionals working in the field of engineering and other scientific and technical sectors, who have an interest or need to apply Matlab as a tool for undertaking simulations and formulating solutions for the problems concerned. The presentation is highly accessible,

employing a step-by-step approach in discussing selected problems: deduction of the mathematical model from the physical phenomenon, followed by analysis of the solutions with Matlab. Since a physical phenomenon takes place in space and time, the corresponding mathematical model involves partial differential equations. For this reason, the book is dedicated to numerically solving these equations with the Finite Element Method and Finite Difference Method. Throughout, the text presents numerous examples and exercises with detailed worked solutions. Matlab for Engineering is a useful desktop reference for undergraduates and scientists alike in real world problem solving.

*The Hanoverian Dimension in British History, 1714–1837* Brendan Simms 2007-02-08  
For more than 120 years (1714–1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

*Blueprint for Black Power* Amos N. Wilson 1998 Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. *Bugatti Type 50* Julius Kruta 2019-04-23 Launched in 1930, the Bugatti Type 50 heralded a new era with the introduction of the Molsheim marque's first twin-

cam design, a supercharged 4.9-litre straight-eight engine of prodigious power. At a time when brute force was needed to win the Le Mans 24 Hours, a competition version was developed and three such Type 50s took part in 1931. The car around which this book is focused, 50177, was leading the famous endurance race when the team withdrew it owing to tyre failures that had afflicted the sister cars, causing one to crash heavily at high speed. The fascinating story of 50177, and the Type 50 in general, is told in this brilliantly researched and superbly illustrated book in the Great Cars series. Introductory chapters explain the economically perilous world of 1931, the genius of Ettore and Jean Bugatti, the bloodline of large-capacity Bugatti engines, and the Type 46 from which the Type 50 was derived. There follows an in-depth exploration of the Type 50's design and development, including the Miller inspiration behind its twin-cam engine. The four Le Mans races in which Type 50s took part form the core of the book and tell a story of promise unfulfilled. The subject car, 50177, raced three times, in 1931 as a works entry with race no. 5 (driven by Albert Divo and Guy Bouriat) and in 1934 and 1935 with works assistance as no. 2 (driven by Pierre Veyron and Roger Labric). A section about the drivers presents illustrated biographies of the four men who raced 50177 as well as the four others in the 1931 works team – Louis Chiron and Achille Varzi in no. 4 and Maurice Rost and Count Caberto Conelli in no. 6. Post-war, three-time Le Mans winner Luigi Chinetti bought 50177 in 1949 and took it to America, where it spent nearly 50 years with five different owners. The last of them was Miles Coverdale, a passionate Bugatti collector who kept the car for 23 years and uncovered much of its history through correspondence with former works mechanics, notably Robert Aumaître. Co-authors Mark Morris and Julius Kruta, wellknown in the Bugatti world for their immense knowledge and enthusiasm, present a wealth of fresh information and illustration in this fine book.
