*Sewing Machine Basics* Jane Bolsover 2010-10-14 In the climate of “make do and mend,” sales of sewing machines have soared, but many are only accompanied by a difficult-to-understand technical manual. Here, Jane Bolsover provides a comprehensive guide for beginners. Starting with an essential overview of the sewing machine, learn how to thread it and wind bobbins, why tension is important, and which needles to choose. There's information on the basic sewing kit you will need, plus advice on which fabrics to choose and how to cut out. The chapters then build into a complete sewing course, and at the end of each chapter is a simple project to consolidate the skills you have just mastered. The projects include items for the home, including a cushion cover and a lampshade, stylish accessories, such as bags and scarves, plus great clothing basics, such as an A-line skirt and a simple shift dress. Also included at the back of the book are two full-size pull-out paper pattern sections.

*Liquid Spaces* Sofia Borges 2015-03 It is not a paradox that today-in the era of digitalization and e-commerce-the creation of tangible spaces is gaining in importance. A personal encounter triggers profound thoughts, strong feelings, and memories that last. In other words, the foundation of a meaningful relationship between artist and audience, museum and visitor, shop and customer, or brands and their communities is based upon an unforgettable experience. Yet all these groups are more discerning than

ever before: They want a personalized moment, want to be informed and entertained, pampered, surprised, and inspired. Liquid Spaces shows the many different ways in which this desired effect can be achieved. Galleries, museums, temporary events, pop-up shops, and flagship stores provide the settings for a wide spectrum of unconventional architecture and interior design, where playfully experimental installations or complex productions can be presented. Surprising materials, colors, shapes, and surfaces provide the props, which alongside innovative smells, sounds, and lighting concepts come together in expansive, stage-like gestures with sculptural details. High-end cars are presented like works of art. Art is displayed in laboratories. Workshops become sacred sites of authenticity. The line between art and commerce is fluid; the quality of the experience is all that matters.

*Mending Matters* Katrina Rodabaugh 2018-10-16 This guide explores visible mending techniques in both hands-on projects and thoughtful insight about how mending relates to mindful well-being. *Mending Matters* explores sewing on two levels: First, it includes more than twenty projects that showcase visible mending—styles that are edgy, modern, and bold, yet draw on traditional stitching. It does all this with just four simple mending techniques: exterior patches, interior patches, slow stitches, darning, and weaving. In addition, the book addresses the way mending leads to a more mindful relationship to fashion and to overall well-being. In essays that accompany each how-to chapter, Katrina Rodabaugh explores mending as a metaphor for appreciating our own naturally flawed selves. She also examines the ways in which mending teaches us new skills, self-reliance, and confidence, all gained from making things with our own hands.

Shasta made in 1994 at the request of the Sixteenth Karmapa, who appeared to him in meditation and told him to seek the legendary Wish-Fulfilling Jewel. During this journey the Dalai Lama added a request, which was inextricably connected with the first request. In addition, the Master Saint Germain, under whom the author trained for many years, requested that the Buddhist teachings he learned in Tibet should be incorporated in the I AM Teachings given previously to Godfre Ray King in the 1930s. Here the author shares these teachings that can be used to transform daily life through the realization of your basic goodness and innate perfection.

*Oskar Schlemmer* Ina Conzen 2014 Oskar Schlemmer (1888–1943) was one of the most versatile all-rounders of the last century and as unusual as a painter as he was as a sculptor, draughtsman, graphic

artist, stage designer, wall designer, creator of epochal dance projects and author. His vision was the “new” man living in functional architecture, thinking clearly and acting clearly in the modern age which would never again sink into the chaos of war. The catalogue includes the seven original costumes of the Triadisches Ballett (Triadic Ballet) together with rare documents of the time. The connection between the all-encompassing attempts at reform of the Bauhaus are discussed as well as Schlemmer's vain attempts to reconcile his “unpolitical” art with the Nazi dictatorship's ideas of state-controlled art. The focus will be directed towards Schlemmer's lofty ethical demands, which always regarded man, typified as a “Kunstfigur” (artistic figure) as the “measure of all things”.

Experiments in Ethics Kwame Anthony Appiah 2010-03-30 In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of “experimental philosophy,” provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

*Aikido and the Harmony of Nature* Mitsugi Saotome 1993-10-19 Here is a unique approach to the teachings of the Founder of Aikido, Morihei Ueshiba, as interpreted by his direct student of fifteen years. Mitsugi Saotome examines the spiritual philosophy of the Founder, the warrior ideals of feudal Japan as the basis of his martial arts philosophy, and the scientific principles underlying the philosophy of Aikido technique. The author shows that the physical movement of Aikido is the embodiment of principles of the spirit. Negative force is not countered with aggression but is controlled and redirected through the power and balance of spiral movement. This is the shape of Aikido and the dynamic shape at the foundation of all energies of existence. Aikido movement can only be understood from its roots in universal law and the processes of nature. The sincere practice and study of Aikido deepens our appreciation for the perfection of nature's balance and brings us back into harmony with our environment, other people, and ourselves. Abundantly illustrated with the author's drawings, diagrams, and calligraphies, as well as photographs demonstrating Aikido techniques, the book also offers a history of Aikido, personal anecdotes about the Founder, and translations of several of his lectures.

**National Climate Policy** Elin Lerum Boasson 2014-10-10 Failed attempts at producing ambitious global climate commitments and instruments have made it increasingly important for nation states to deliver climate policies. This in turn requires a better understanding of national climate policymaking. In this book, Elin Lerum Boasson develops an innovative and well-grounded analytical framework for assessing national climate-policy development. Why do national climate policies emerge and change? This question is underpinned by the role played by different actors and the kind social mechanism at work. Boasson asks, to what extent and how is the emergence and change of climate policy influenced by: politicians and the national political fields; business and organizational fields; EU policy and the European environment; social and entrepreneurial mechanisms? Combining policy studies with sociological new institutionalism, and drawing on three climate policy sub-areas in Norway: renewable energy, low-energy buildings and carbon capture and storage, Boasson presents a multi-field framework that allows the reader to capture the entire policy cycle, explaining policy initiation, policy adoption and the long-term, social feedback effects resulting from implementation (or lack of implementation).
