The Metaphysic of Ethics Immanuel Kant 1836

Deutschsprachige Zivilrechtslehrer des 20. Jahrhunderts in Berichten ihrer Schüler Band 1 Stefan Grundmann 2007-01-01 German civil law political theory is not in high demand these days. However, political theory is important for establishing an overall picture of German civil law and portraying an image of German civil law to Europe and beyond. This is especially true in times when ideas are widely

circulated and the circulation itself can be useful for influencing transnational legal realities. The collected essays on German civil law instructors presented in this work aim to contribute to just such a political theory. This two volume edition is based on the lecture series “20th Century German Civil Law Instructors Described by their Students” that was held at the Humboldt-Universität Berlin, the Europa-Universität Viadrina at Frankfurt (Oder), and the Ruhr-Universität Bochum.

Comparative Succession Law Kenneth G C Reid 2020-10-09 This third volume in a series on Comparative Succession Law concerns the entitlement of family members to override the provisions of a deceased person's will to obtain money or assets (or more money or assets) from the person's estate. Some countries, notably those in the civil law tradition (such as France or Germany), confer a pre-ordained share of the deceased's estate or of its value on certain members of the deceased's family, and especially on the deceased's children and spouse. Other countries, notably those in the common law tradition (such as England, Canada, or Australia), leave the matter to the discretion of the court, the amount awarded depending primarily on financial need. Whichever form it takes, mandatory family provision is both a protection against disinheritance and also, therefore, a restriction on testamentary freedom. The volume focuses on Europe and on countries influenced by the European experience. In addition to detailed treatment of the law in Austria, England and Wales, France, Germany, Hungary, Italy, the Netherlands, Norway, Poland, Scotland, and Spain, the book also has chapters on Australia and New Zealand, South Africa, the United States, Canada, the countries of Latin America, and the People's Republic of China. Some other countries are covered more briefly, and there is a separate chapter on Islamic law. The book opens with accounts of Roman law and of the law in medieval and early-modern Europe, and it concludes with a comparative assessment of the law as it is today in the countries and legal traditions surveyed in this volume.

Workplace Justice Without Unions Hoyt N. Wheeler 2004 Justice in the U.S. nonunion workplace operates within the tenets of employment-at-will. Based on the late nineteenth century Woods rule, this concept led courts to recognize the right of an employer to fire a worker at any time, for any reason. Fortunately for nonunion workers, a workplace justice system has evolved that provides them some recourse when they have been let go without just cause. This is a complex and not widely understood system, but now there is a book that clarifies its workings and compares its effectiveness and fairness to a variety of other workplace justice systems. Law and Method Bart van Klink 2011 This book gives an overview of the most relevant disciplines for interdisciplinary research on law. What are the characteristics of these disciplines one really needs to understand in order to do research that combines law with them? The book consists of three parts. The first part addresses general questions about legal scholarship and interdisciplinary research. These are questions of the aims and character of academic research and what it means to regard issues from different disciplinary perspectives. Furthermore, the particular character of the discipline of law and its methods are discussed. The second part consists of chapters exploring the relationship between law and other disciplines. Each chapter addresses questions of the characteristic methods of that discipline, its relevance to law and the problems to be tackled. The disciplines are classified in broadly three categories: empirical social science (sociology, economics, psychology), humanities (history, political theory, ethics, philosophy), and language-oriented disciplines (rhetoric, law and literature, argumentation theory). The third part contains examples of interdisciplinary research in practice: How is it done, what kinds of problems arise when doing such research, and what insights into law does it provide? The intended audience consists of law students who participate in research master programs or PhD students who are confronted with methodological questions about law in relation to other disciplines. The book will also be of interest to other legal researchers who are looking for an accessible introduction to the main fields of interdisciplinary research.

Transnational Commercial Law: International Instruments and Commentary Roy Goode 2012-03-29

Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of

Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.

Scientific Approaches to Consciousness Jonathan D. Cohen 2014-04-04 There are many ways to approach the understanding of consciousness. Questions about these ways have occupied philosophers and metaphysicians for centuries. During the early growth of cognitive science the problem of consciousness remained taboo, but an increasing number of studies have either implicitly or explicitly

begun to bear on its nature. These have been inspired by a number of different different original questions, and focus on a variety of different empirical phenomena. Thus, studies of implicit memory, subliminal processing, strategic versus automatic processing, allocation of attention, and differences between information processes in the awake versus dreaming state all share a common assumption of a particular quality or state -- awakeness, awareness, alertness, namely consciousness -- that somehow can be distinguished from another type of state or states in which the subject is not aware of the information being processed. What distinguishes the cognitive psychological and cognitive neuroscience approach to the question of consciousness from that of philosophy and metaphysics is scientific methodology: a set of tools that permit the empirical study of a phenomenon in an objective and reproducible way. Recent developments in both the empirical and theoretical methodologies of these fields have made it possible to begin to study the phenomenon associated with -- if not directly underlying -- consciousness in a scientific fashion. This volume tries to resolve the difficulties associated with the scientific investigation of consciousness. The intent is to explore the extent to which consciousness can be the target of direct scientific inquiry, to get on the table some of the relevant work, and consider the degree to which this research can help inform our understanding of consciousness. It brings together a group of cognitive and neuroscientists to share relevant recent research in the fields of cognitive science and neuroscience and to determine whether any new strategies for the scientific pursuit of this question can be developed. A long-term goal is the development of a unified understanding of consciousness, scientific as well as philosophical perspectives. This volume takes the first step toward building the necessary local bridges.

Die Dritthaftung von Klassifikationsgesellschaften Jürgen Basedow 2004 English summary: Classification societies establish and apply technical standards in relation to the design, construction and supervision of ships. Their principal contracting partners are ship builders and ship owners. Increasingly, classification societies are being faced with damage claims initiated by members of the shipping industry with whom they have not established a contractual relationship. Under German law but in a comparative perspective, Jürgen Basedow and Wolfgang Wurmnest examine such third party claims. They focus in particular on how such claims are affected by limitation of liability clauses agreed upon between the classification society and its contracting partners. German description: Klassifikationsgesellschaften sind die technischen Überwachungsorganisationen der Seeschifffahrt. In jungerer Zeit sind sie verstärkt Ansprüchen Dritter ausgesetzt, mit denen sie keine Vertragsbeziehungen unterhalten. Diese Tendenz ist weltweit zu beobachten, wie aktuelle Fälle vor englischen, neuseeländischen und US-amerikanischen Gerichten belegen. Dritte versuchen sich vor allem im Anschluss an Schiffskatastrophen, aber auch im Zuge von Schiffsverkäufen, an einer Klassifikationsgesellschaft schadlos zu halten. Jürgen Basedow und Wolfgang Wurmnest untersuchen, welche Ansprüche solchen Dritten nach deutschem Recht gegen eine Klassifikationsgesellschaft zustehen und welche Bedeutung hierbei Haftungsbeschränkungen zukommt, die eine Klassifikationsgesellschaft mit ihren Vertragspartnern vereinbart. Somit steht die privatrechtliche Haftung von Klassifikationsgesellschaften im Mittelpunkt dieses Buches; ihre Haftung für hoheitliches Handeln wird nur am Rande gestreift. Die Autoren arbeiten die Problematik rechtsvergleichend auf und beziehen dabei das australische, englische, französische, neuseeländische und US-amerikanische Recht ein. Die von ihnen vertretene Lösung steht im Einklang mit dem fein austarierten System der Haftungsverteilung und -beschränkung des internationalen Seerechts, welches maßgeblich durch völkerrechtliche Übereinkommen geprägt wird.

European Rules for Juvenile Offenders Subject to Sanctions Or Measures Council of Europe 2009-01-01
This book deals with the rules that are in force in Europe for juvenile offenders. The aim of the rules is to uphold the rights and safety of juvenile offenders subject to sanctions or measures and to promote their physical, mental and social well-being when subject to community sanctions or measures, or any form of

deprivation of liberty. It is based on Recommendation Rec(2008)11 of the Committee of Ministers of the Council of Europe on the European Rules for juvenile offenders subject to sanctions or measures, which was adopted on 5 November 2008. The first part of the book contains the text of the recommendation and is followed by a commentary which explains in finer detail the rules and the points raised by the text. The final section provides an analysis of the national replies to a questionnaire related to the treatment of juvenile offenders. This work will be of interest to human rights scholars, researchers and students of law, criminology and international relations.

Legal Secrets Kim Lane Scheppele 1988-11-15 Does the seller of a house have to tell the buyer that the water is turned off twelve hours a day? Does the buyer of a great quantity of tobacco have to inform the seller that the military blockade of the local port, which had depressed tobacco sales and lowered prices, is about to end? Courts say yes in the first case, no in the second. How can we understand the difference in judgments? And what does it say about whether the psychiatrist should disclose to his patient's girlfriend that the patient wants to kill her? Kim Lane Scheppele answers the question, Which secrets are legal secrets and what makes them so? She challenges the economic theory of law, which argues that judges decide cases in ways that maximize efficiency, and she shows that judges use equality as an important principle in their decisions. In the course of thinking about secrets, Scheppele also explores broader questions about judicial reasoning—how judges find meaning in legal texts and how they infuse every fact summary with the values of their legal culture. Finally, the specific insights about secrecy are shown to be consistent with a general moral theory of law that indicates what the content of law should be if the law is to be legitimate, a theory that sees legal justification as the opportunity to attract consent. This is more than a book about secrets. It is also a book about the limits of an economic view of law. Ultimately, it is a work in constructive legal theory, one that draws on moral philosophy, sociology, economics, and political theory to develop a new view of legal interpretation and legal morality.

Commentaries on European Contract Laws Nils Jansen 2018-07-13 The book provides rule-by-rule

commentaries on European contract law (general contract law, consumer contract law, the law of sale and related services), dealing with its modern manifestations as well as its historical and comparative foundations. After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades, and for an assessment of the current situation. In particular, the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law. The present book adopts a broad perspective and an integrative approach. All relevant reference texts (from the CISG to the Draft Common European Sales Law) are critically examined and compared with each other. As far as the *acquis commun* (ie the traditional private law as laid down in the national codifications) is concerned, the Principles of European Contract Law have been chosen as a point of departure. The rules contained in that document have, however, been complemented with some chapters, sections, and individual provisions drawn from other sources, primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law. In addition, the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background; and it thus investigates whether, and to what extent, these texts can be taken to be genuinely European in nature, ie to constitute a manifestation of a common core of European contract law. Where this is not the case, the question is asked whether, and for what reasons, they should be seen as points of departure for the further development of European contract law.

Business Criminal Law Lukas Staffler 2021-12-15 This textbook deals with business criminal law from the perspective of Germany, Austria, Liechtenstein and Switzerland. It primarily addresses students in business and economics (master's programme) as well as business practitioners, but is also meant for lawyers and law students. As criminal law legislators exert considerable influence on economic life, raising and growing awareness in the area of criminal law seems compulsory for future managers and executives. This textbook approaches the legal field less normatively and rather in a practical and entrepreneurial way. Its contents are based on the master level class "Business Criminal Law" at "MCI | The Entrepreneurial School" taught by the author. This textbook has been recommended and developed for university courses in Germany, Austria and Switzerland.

Law and the Balance of Power Stewart Macaulay 1966-12-31 Stewart Macaulay teaches contracts at the University of Wisconsin Law School and is interested in the part the legal system plays in implementing, regulating, and hindering economic relationships, and how it does these things. This book is a descriptive analysis of organizational change that has resulted from automobile dealers' attempts to find a legal remedy for what they consider unfair practices of the manufacturers. It advances our understanding of the limitations and the positive functions of formal rules in the regulation of human conduct, and shows how informal procedures can develop as a result of pressure for changes in the formal rules.
