The Virtual Community, revised edition Howard Rheingold 2000-10-23 Howard Rheingold tours the "virtual community" of online networking. Howard Rheingold has been called the First Citizen of the Internet. In this book he tours the "virtual community" of online networking. He describes a community that is as real and as much a mixed bag as any physical community—one where people talk, argue, seek information, organize politically, fall in love, and dupe others. At the same time that he tells moving stories about people who have received online emotional support during devastating illnesses, he acknowledges a darker side to people's behavior in cyberspace. Indeed, contends Rheingold, people relate to each other online much the same as they do in physical communities. Originally published in 1993, The Virtual Community is more timely than ever. This edition contains a new chapter, in which the author revisits his ideas about online social communication now that so much more of the world's population is wired. It also contains an extended bibliography.

A Gift of Fire Sara Baase 2013 This timely revision will feature the latest Internet issues and provide an updated comprehensive look at social and ethical issues in computing from a computer science perspective.

Legal Aspects of Business Daniel Albuquerque 2017-10-19 The second edition of Legal Aspects of Business: Texts, Jurisprudence, and Cases is a comprehensive textbook designed especially for postgraduate students of business management. It presents a complete, all inclusive jurisprudence and supplements the concepts with numerous cases, exercises, and profiles of legal luminaries. The book is divided into six parts. Part I introduces the reader to Business Jurisprudence. As the contract law is foundation to all business laws, Part II, Commercial Jurisprudence, on Mercantile Law discusses the Indian Contract Act, 1872 and its features at length. The Sale of Goods Act, 1930, the Negotiable Instrument Act, 1881, The Indian Partnership Act, 1932, the Companies Act, 2013, and the Competition Act, 2002 are

also covered in depth. Part III, Financial Jurisprudence, covers the laws related to finance and banking at length. Part IV, Labour and Industrial Jurisprudence, covers the laws related to wages, workers' social security, and industrial relations. Part V, Aspects of New Economy and Jurisprudence, throws light on laws related to information and communication, intellectual property rights, and environment protection. Part VI, Judicial and Social Jurisprudence, is devoted to business and criminal liability and basic rights and business. The book also offers valuable insights to practitioners to arrive at legally sound decisions in various business situations.

The Art of Public Speaking Dale Carnegie 2019-01-15 The Art of Public Speaking is a fantastic introduction to public speaking by the master of the art—Dale Carnegie. Featured within this classic manual are hundreds of tips and tricks on how to become an efficient and effective public speaker. One of the core ideas in his books is that it is possible to change other people's behavior by changing one's reaction to them. This is a fascinating work and is thoroughly recommended for everyone.

The Three Waves of Volunteers & the New Earth Dolores Cannon 2011 In 1945 when the atomic bombs were dropped in WWII, our "protectors" and "watchers" in outer space saw that Earth was on a collision course with disaster. The prime directive of non-interference prevented them from taking any action, but then they came up with a brilliant plan to save Earth and assist her in her ascension. They couldn't interfere from the "outside", but maybe they could influence from the "inside". So the call went out for volunteers to come and help. "Earth is in trouble - who wants to volunteer?" The native souls living on Earth were too caught up on the wheel of karma. The only hope was to ask for pure souls to come who had never been trapped on the karmic cycle. Dolores in her hypnosis work has discovered three waves of these volunteers. Some have come direct from the "Source" and have never lived in any type of physical body before. Others have lived as space beings on other planets or other dimensions. Because all memory is erased upon entry to the Earth dimension, they do not remember their assignment. Thus these beautiful souls have a difficult time adjusting to our chaotic world. These souls have a vital role to play as they help all of the rest of us ascend to the New Earth. * Characteristics of the Three Waves of

Volunteers * The Difficulties being Experienced by First-Timers * How the Shift is affecting the Physical Body * The Roles of ETs and Light Beings in the Shift * Keepers of the Grid * The Separation of the Old and New Earth * What is the New Earth? * What is the Significance of 2012?

The Routledge Companion to Global Internet Histories Gerard Goggin 2017-02-17 The Routledge Companion to Global Internet Histories brings together research on the diverse Internet histories that have evolved in different regions, language cultures and social contexts across the globe. While the Internet is now in its fifth decade, the understanding and formulation of its histories outside of an anglophone framework is still very much in its infancy. From Tunisia to Taiwan, this volume emphasizes the importance of understanding and formulating Internet histories outside of the anglophone case studies and theoretical paradigms that have thus far dominated academic scholarship on Internet history. Interdisciplinary in scope, the collection offers a variety of historical lenses on the development of the Internet: as a new communication technology seen in the context of older technologies; as a new form of sociality read alongside previous technologically mediated means of relating; and as a new media "vehicle" for the communication of content.

Bitcoin and Cryptocurrency Technologies Arvind Narayanan 2016-07-19 An authoritative introduction to the exciting new technologies of digital money Bitcoin and Cryptocurrency Technologies provides a comprehensive introduction to the revolutionary yet often misunderstood new technologies of digital currency. Whether you are a student, software developer, tech entrepreneur, or researcher in computer science, this authoritative and self-contained book tells you everything you need to know about the new global money for the Internet age. How do Bitcoin and its block chain actually work? How secure are your bitcoins? How anonymous are their users? Can cryptocurrencies be regulated? These are some of the many questions this book answers. It begins by tracing the history and development of Bitcoin and cryptocurrencies, and then gives the conceptual and practical foundations you need to engineer secure software that interacts with the Bitcoin network as well as to integrate ideas from Bitcoin into your own projects. Topics include decentralization, mining, the politics of Bitcoin, altcoins and the cryptocurrency ecosystem, the future of Bitcoin, and more. An essential introduction to the new technologies of digital currency Covers the history and mechanics of Bitcoin and the block chain, security, decentralization, anonymity, politics and regulation, altcoins, and much more Features an accompanying website that includes instructional videos for each chapter, homework problems, programming assignments, and lecture slides Also suitable for use with the authors' Coursera online course Electronic solutions manual (available only to professors)

The Multilingual Internet Professor of Sociology and Communication Brenda Danet 2007 Devoted to analysing internet related CMC in languages other than English, this volume collects 18 new articles on facets of language and internet use, all of which revolve around several central topics: writing systems, the structure and features of local languages and how they affect internet use, gender issues, and so on.

A Manual of Mercantile Law MC Shukla 2007 The developments during the period since the publication of the last edition have been such that this thirteenth edition has involved the most substantial revisions. Among statutory changes, those with the most significant and immediate impact, flow from the Companies (Amendment) Act, 1988 and various Notifications issued by the Central Government from time to time, and some of the labour laws, more particularly, Factories Act, Workmen's Compensation Act, Industrial Disputes Act and Payment of Wages Act. These amendments and case law developments have necessitated thorough and extensive re-writing and updating. Case law has been updated to January, 1991.

Cases on the Law of Partnership Floyd Russell Mechem 1903

Netopia Y. G. Levimor 2015-12-28 The perfect reality is just a thought away, but it comes at a chilling price. In a near future world, a social network by the name of MINDS gifts its users with the unique ability to communicate directly by thoughts and recreate reality by their deepest fantasies and desires. In the MINDS network, desires are actualized in a spilt of a second and unwanted elements erased from reality. The advanced algorithms of MINDS enable the user to virtually visit any place in the world or in history within seconds, in an utterly realistic three-dimensional reality. Humans can use their mind to determine everything they please - from the weather to the way their friends look like and behave. But the ultimate comfort comes at a price, and the unexpected results reveal the grand plan behind MINDS. What stands behind this magnificent social network, and what are the consequences when the virtual merges with the actual? Netopia follows the heroes of the network in the days before its establishment, through its launch, relationships and love, and the unexpected change it wreaks on the enthusiastic users who had no idea what awaited them the moment they gave up control over their minds. Is the MINDS network a dream come true or a nightmare come to life? Netopia is beyond science fiction: it is a groundbreaking novel that explores the implications of communication technology on human nature and society, the preference of warmth for realistic animal doll pets but coldness towards humans. the novel speaks to the connected and to the disconnected, to the great minds and the Neverminds. Netopia is a gleaming hope and a dark warning. So, where is your mind? Scroll up to grab your copy now.

Preference, Belief, and Similarity Amos Tversky 2003-11-21 Amos Tversky (1937–1996), a towering figure in cognitive and mathematical psychology, devoted his professional life to the study of similarity, judgment, and decision making. He had a unique ability to master the technicalities of normative ideals and then to intuit and demonstrate experimentally their systematic violation due to the vagaries and consequences of human information processing. He created new areas of study and helped transform disciplines as varied as economics, law, medicine, political science, philosophy, and statistics. This book collects forty of Tversky's articles, selected by him in collaboration with the editor during the last months of Tversky's life. It is divided into three sections: Similarity, Judgment, and Preferences. The Preferences section is subdivided into Probabilistic Models of Choice, Choice under Risk and Uncertainty, and Contingent Preferences. Included are several articles written with his frequent collaborator, Nobel Prize-winning economist Daniel Kahneman.
