Step by Step Corneal Topography Sunita Agarwal 2005-01-13 Given that most ophthalmic surgeons have at some time in their careers struggled with reading a corneal topography map and attempting to ascertain if it is normal or abnormal, this handy step by step guide to corneal topography is an excellent aide-memoire. The

illustrious Agarwal family cover the common use of corneal topography - keratoconus detection – as well as more unique areas such as the extensive use of corneal topography for cataract surgery and phakonia, as well as posterior corneal topography, and astigmatism. Going one step further than many other texts in the field, this impressive guide also presents splendid information on the use of topography for aberrometry-guided excimer laser applications. Making the difficult and often confusing mixture of art and science that is corneal topography seem more manageable in day-to-day practice, Step by Step Corneal Topography is undoubtedly requisite reading for all ophthalmologists.

Buyology Martin Lindstrom 2008-10-21 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today’s consumer that will captivate anyone who’s been seduced—or turned off—by marketers’ relentless attempts to win our loyalty, our money, and our minds.

Raciolinguistics H. Samy Alim 2016-09-30 Raciolinguistics reveals the central role that language plays in shaping our ideas about race and vice versa. The book brings together a team of leading scholars-working both within and beyond the United States-to share powerful, much-needed research that helps us understand the increasingly vexed relationships between race, ethnicity, and language in our rapidly changing world. Combining the innovative, cutting-edge approaches of race and ethnic studies with fine-grained linguistic analyses, authors cover a wide range of topics including the struggle over the very term "African American," the racialized language education debates within the increasing number of "majority-minority" immigrant communities in the U.S., the dangers of multicultural education in a Europe that is struggling to meet the needs of new migrants, and the sociopolitical and cultural meanings of linguistic styles used in Brazilian favelas, South African townships, Mexican and Puerto Rican barrios in Chicago, and Korean American "cram schools" in New York City, among other sites. Taking into account rapidly changing demographics in the U.S and shifting cultural and media trends across the globe--from Hip Hop cultures, to transnational Mexican popular and street cultures, to Israeli reality TV, to new immigration trends across Africa and Europe--Raciolinguistics shapes the future of scholarship on race, ethnicity, and language. By taking a comparative look across a diverse range of language and literacy contexts, the volume seeks not only to set the research agenda in this burgeoning area of study, but also to help resolve pressing educational and political problems in some of the most contested raciolinguistic contexts in the world.

Memories, Dreams, Reflections C. G. Jung 2011-01-26 An eye-opening biography of one of the most influential psychiatrists of the modern age, drawing from his lectures, conversations, and own writings. In the spring of 1957, when he was eighty-one years old, Carl Gustav Jung undertook the telling of his life story. *Memories, Dreams, Reflections* is that book, composed of conversations with his colleague and friend Aniela Jaffé, as well as chapters written in his own hand, and other materials. Jung continued to work on the final stages of the manuscript until shortly before his death on June 6, 1961, making this a uniquely comprehensive reflection on a remarkable life. Fully corrected, this edition also includes Jung's VII Sermones ad Mortuos.

Winter Letters (Galician Wave Book 6) Agustin Fernandez Paz 2015-09-28 "The oldest and strongest emotion of mankind is fear, and the oldest and strongest kind of fear is fear of the unknown," writes H. P. Lovecraft at the start of his essay "Supernatural Horror in Literature." In real life, the author Agustin Fernandez Paz, Galicia's answer to H. P. Lovecraft, is reading the newspaper and comes across a classified ad for a haunted house. He imagines what would happen if someone answered that ad. Then what would happen if they went to see the house and liked it. Then what would happen if they had enough money and decided to buy it. And finally what would happen if they went to live there and discovered that the house was really haunted. This

is the plot of "Winter Letters," one of the best-selling Galician novels of all time. The house will bring to mind, for older readers, the Bates' home in Alfred Hitchcock's film "Psycho." Inside the house is a book of prints that may remind younger readers of Tom Riddle's diary in "Harry Potter and the Chamber of Secrets." However this may be, the reader is sure to be drawn in by the force and power of the narrative, which is as smooth and sinuous as the sirens' song heard by Ulysses from the sanctuary of the mast of his ship. Agustin Fernandez Paz is the author of another novel in English, "Black Air," about a psychiatrist's race against time to save his patient from a malignant presence, the Great Beast. He was awarded the Spanish National Prize for Literature in 2008 and is Spain's nominee for the Hans Christian Andersen Award. Other titles in the series Galician Wave include: "Dragal I: The Dragon's Inheritance" and "Dragal II: The Dragon's Metamorphosis" by Elena Gallego Abad, "Dove and Cut Throat" by Fina Casalderrey, "The Painter with the Hat of Mallows" by Marcos Calveiro and "I Love You Leo A. Destination Somewhere" by Rosa Aneiros."

A Discovery of Witches Deborah Harkness 2011-02-08 Book one of the New York Times-bestselling All Souls trilogy—"a wonderfully imaginative grown-up fantasy with all the magic of Harry Potter and Twilight" (People). Look for the hit TV series "A Discovery of Witches," streaming on AMC Plus, Sundance Now and Shudder. Season 2 premieres January 9, 2021! Deborah Harkness's sparkling debut, A Discovery of Witches, has brought her into the spotlight and galvanized fans around the world. In this tale of passion and obsession, Diana Bishop, a young scholar and a descendant of witches, discovers a long-lost and enchanted alchemical manuscript, Ashmole 782, deep in Oxford's Bodleian Library. Its reappearance summons a fantastical underworld, which she navigates with her leading man, vampire geneticist Matthew Clairmont. Harkness has created a universe to rival those of Anne Rice, Diana Gabaldon, and Elizabeth Kostova, and she adds a scholar's depth to this riveting tale of magic and suspense. The story continues in book two, Shadow of Night, and concludes with The Book of Life.

Free, Fair, and Alive David Bollier 2019-09-03 The power of the commons as a free, fair system of provisioning and governance beyond capitalism, socialism, and other -isms. From co-housing and agroecology to fisheries and open-source everything, people around the world are increasingly turning to 'commoning' to emancipate themselves from a predatory market-state system. *Free, Fair, and Alive* presents a foundational re-thinking of the commons — the self-organized social system that humans have used for millennia to meet their needs. It offers a compelling vision of a future beyond the dead-end binary of capitalism versus socialism that has almost brought the world to its knees. Written by two leading commons activists of our time, this guide is a penetrating cultural critique, table-pounding political treatise, and practical playbook. Highly readable and full of colorful stories, coverage includes: Internal dynamics of commoning How the commons worldview opens up new possibilities for change Role of language in reorienting our perceptions and political strategies Seeing the potential of commoning everywhere. *Free, Fair, and Alive* provides a fresh, non-academic synthesis of contemporary commons written for a popular, activist-minded audience. It presents a compelling narrative: that we can be free and creative people, govern ourselves through fair and accountable institutions, and experience the aliveness of authentic human presence.

Tantra Andre van Lysebeth 2002-10-01 Known only for the virtues of its sexual practice, ancient Tantric ideology is a universal and wide-reaching ideology virtually ignored in the West. In *Tantra: The Cult of the Feminine*, one of Europe's foremost Tantric authors and teachers, Andre Van Lysebeth, gives readers a balanced, well-informed, modern examination of the secret teachings and symbolism of Tantra. Espousing no dogma, Tantra involves a search for reality that contradicts neither science nor religion. For Tantra, all of the myriad energy forms in the universe -- gravity, nuclear cohesion, electromagnetism -- exist throughout the cosmos. "Scientifically speaking, the universe is a gigantic continuum ranging from sub-atomic to astronomical dimensions. Tantrists have perceived this unity for over thirty-five centuries," points out van Lysebeth in his introduction. Originally published in 1992, *Tantra* has become the classic text on the subject, the source for serious students. Eight full-color illustrations and 36 line drawings complement a comprehensive and contemporary explanation of Tantra, complete with meditations. Andre does a remarkable job of bringing ancient theories into the modern world.

Architects' Data Ernst Neufert 1991-01-15 This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

Sapiens Yuval Noah Harari 2015-02-10 New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking

narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

Shades Of Twilight Linda Howard 2009-11-24 Passion, wealth, and murder come together in this unputdownable thriller from the New York Times bestselling “queen of romantic suspense” (Booklist) Linda Howard. Roanna Davenport grew up a wealthy orphan on her grandmother's magnificent estate, Davencourt. There, she wanted for nothing—except to be loved by her cousin Webb. When he marries another, Roanna is devastated but life at Davencourt takes an even darker turn when Webb's new wife is found bludgeoned to death. After the shocking murder, Webb leaves for Arizona, abandoning the privileged life that he had once believed was all he wanted. Years later, a grown-up Roanna walks back into his life to bring him home. He's shocked that the mischievous sprite he had known in childhood has disappeared. Gone, too, is her passionate fire; in its place is ice that melted at his touch but Webb can't help but be drawn back to Davencourt, to Roanna, and to the killer that once destroyed his life and waits only for the chance to finish the job. With Linda Howard's signature “fast-paced, intricately detailed romantic suspense” (Fresh Fiction), *Shades of Twilight* will keep you riveted until the last page.

Lolita Vladimir Nabokov 2010-08-24 Awe and exhilaration--along with heartbreak and mordant wit--abound in Lolita, Nabokov's most famous and controversial novel, which tells the story of the aging Humbert Humbert's obsessive, devouring, and doomed passion for the nymphet Dolores Haze. Lolita is also the story of a hypercivilized European colliding with the cheerful barbarism of postwar America. Most of all, it is a meditation on love--love as outrage and hallucination, madness and transformation.

Goddesses in Everywoman Jean Shinoda Bolen 2004-03-02 A classic work of female psychology that uses seven archetypal goddesses as a way of describing behavior patterns and personality traits is being introduced to the next generation of readers with a new introduction by the author. Psychoanalyst Jean Bolen's career soared in the early 1980s when *Goddesses in Everywoman* was published. Thousands of women readers became fascinated with identifying their own inner goddesses and using these archetypes to guide themselves to greater self-esteem, creativity, and happiness. Bolen's radical idea was that just as women used to be unconscious of the powerful effects that cultural stereotypes had on them, they were also unconscious of powerful archetypal forces within them that influence what they do and how they feel, and which account for major differences among them. Bolen believes that an understanding of these inner patterns and their interrelationships offers reassuring, true-to-life alternatives that take women far beyond such restrictive dichotomies as masculine/feminine, mother/lover, careerist/housewife. And she demonstrates in this book how understanding them can provide the key to self-knowledge and wholeness. Dr. Bolen introduced these patterns in the guise of seven archetypal goddesses, or personality types, with whom all women could identify, from the autonomous Artemis and the cool Athena to the nurturing Demeter and the creative Aphrodite, and explains how to decide which to cultivate and which to overcome, and how to tap the power of these enduring archetypes to become a better "heroine" in one's own life story.
