**Houses of the Gentry, 1480-1680** Nicholas Cooper 1999 From the end of the fifteenth century to the closing years of the seventeenth, England underwent radical social change. English architecture changed radically as well, and the homes of the gentry were transformed as members of this class grew in numbers, wealth, and importance. This book provides a full account of the houses that were built and inhabited by the upper classes during this rich and fascinating period. Architectural historian Nicholas Cooper explores hundreds of gentry houses, some well known and others far less familiar, and considers their evolution in the light of economic, political, and social changes of the age. The book begins with a discussion of the members of the gentry class, their increasing influence, notions of gentility, and evolving attitudes toward the art of architecture and the craft of building. Cooper then traces changes in the architecture and layout of many specific upper class houses and shows how broader social trends and needs were reflected in such developments as the reception of classicism and the evolution of the new types of plans. This book is a treasury of information about English upper-class houses of 1480 to 1680, and about the attitudes and motives of those who built, owned, and lived in them.
