Civil and Military Censorship During World War II Hans F. Stich 1993-01-01 Censor mark / Zensurstempel.

In Defiance of Painting Christine Poggi 1992-01-01 The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by

it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.

Using French Vocabulary Jean H. Duffy 1999-03-11 Providing a structured vocabulary for all levels of undergraduate French courses, this text offers coverage of concrete and abstract vocabulary relating to the physical, cultural, social, commercial and political environment, as well as exposure to commonly encountered technical terminology.

UNIMARC Manual Alan Hopkinson 2008-12-18 The third edition succeeds the fifth update of second edition. One of the main features has been the adoption of new and revised international standards, notably the International Standard Identifier for Libraries and Related Organizations, the ISBN 13 and the linking ISSN. New fields have been added for recording the Persistent Record Identifier. Uniform Conventional Headings for Legal and Religious texts are now catered for with separate fields. A number of fields have been revised: archival materials, manuscripts and documentation produced by the ISSN International Centre.

A Philatelic Ramble Through Chemistry Edgar Heilbronner 2004-03 This is not a history of chemistry which uses stamps instead of the usual illustrations, but a collection of short essays and comments on such chemistry as can be found on postage stamps and other philatelic items. In other words, the choice of topics is dictated by the philatelic material available, with the necessary consequence that important parts of chemical history will be missing for the simple reason that they have not found their way onto postage stamps. Thus, the reader may find detailed comments on lesser known chemists, such as Wilhelm August Lampadius who has been honoured with two stamps by the German Post Office, but hardly anything on such luminaries as Robert Bunsen, who have not been deemed worthy of a commemorative issue.

The Vietnamese War David Elliott 2016-04-15 A monumental work of research and analysis, this is a history of the Vietnam War in a single province of the Mekong Delta over the period 1930-1975. More precisely, it is a study of the Vietnamese dimension of the "Vietnam War, " focusing on the revolutionary movement that became popularly known as the "Viet Cong." There are several distinctive features to this study: (1) it provides an explanation for the paradox of why the revolutionary movement was so successful during the war, but unable to meet the challenges of postwar developments; (2) it challenges the

dominant theme of contemporary political analysis which assumes that people are "rational" actors responding to events with careful calculations of self-interest; (3) it closely examines province-level documentation that casts light on a number of important historical controversies about the war. No other history of the Vietnam War has drawn on such a depth of documentation, especially firsthand accounts that allow the Vietnamese participants to speak directly to us.

A Reference Grammar of French R. E. Batchelor 2011-07-14 A Reference Grammar of French is a lively, wide-ranging and original handbook on the structure of the French language. It includes new information on register, pronunciation, gender, number, foreign words (Latin, Arabic, English, Spanish, Italian), adjectives and past participles used as nouns, texting, word order, frequency of occurrence of words, and usage with all geographical names. Examples come not only from France, but also from Quebec, Belgium and Switzerland. Readers will appreciate the initial passages illustrating the grammatical features of a given chapter. Also included is a user-friendly introduction to the French language, from its Latin origins to modern times. A full glossary explains any terms that might confuse the less experienced reader, and the index leads the student through the detailed labyrinth of grammatical features. This handbook will be an invaluable resource for students and teachers who want to perfect their knowledge of all aspects of French grammar.

Bibliographisches bulletin der Schweiz 1921 Vols. 3-5 include separately paged section "Stadtbibliothek Bern, verzeichnis der im jahre 1902-[04] neu erworbenen werke."

Captain Fracasse Theophile Gautier 2012-04-01 Get set for action and adventure in this thrill-a-minute swashbuckler from French writer Theophile Gautier. The tale follows the ups and downs of a well-born but penniless aristocrat who casts aside his birthright in favor of the traveling life. Fans of *The Three Musketeers* will delight in this picaresque page-turner.

Material Histories of Time Gianenrico Bernasconi 2020-12-16 The historiography of timekeeping is traditionally characterized by a dichotomy between research that investigates the evolution of technical devices on the one hand, and research that is concerned with the examination of the cultures and uses of time on the other hand. *Material Histories of Time* opens a dialogue between these two approaches by taking monumental clocks, table clocks, portable watches, carriage clocks, and other forms of timekeeping as the starting point of a joint reflection of specialists of the history of horology together with scholars studying the social and cultural history of time. The contributions range from the apparition of the first timekeeping mechanical systems in the Middle Ages to the first evidence of industrialization in the 18th and 19th

centuries.

Bulletin University of Aberdeen. Library 1913

Broken Music Ursula Block 2018-11 Broken Music is an essential compendium for records created by visual artists. The publication was edited by Ursula Block and Michael Glasmeier and originally published in 1989 by DAAD. Broken Music focuses on recordings, record-objects, artwork for records, and record installations made by thousands of artists between WWII and 1989. It also includes essays by both editors as well as Theodor W. Adorno, René Block, Jean Dubuffet, Milan Knizak, László Moholy-Nagy, Christiane Seiffert, and Hans Rudolf Zeller, as well as a flexi disc of the Arditti Quartet performing Knizak's "Broken Music." The centerpiece of the publication is a nearly 200-page bibliography of artists' records. Works chosen for the publication revolved around four criteria: (1) record covers created as original work by visual artists; (2) record or sound-producing objects (multiples/editions/sculptures); (3) books and publications that contain a record or recorded-media object; and (4) records or recorded media that have sound by visual artists.
