Law and Society in Malaysia Andrew Harding 2018-01-02 This book provides a systematic and interdisciplinary examination of law and legal institutions in Malaysia. It examines legal issues from historical, social, and political perspectives, and discusses the role of law in relation to Malaysian multiculturalism, religion, politics, and society. It shows how the Malaysian legal system is at the heart of debates about how to deal with the country's problems, which include ethnic and religious divisions, uneven and unsustainable development, and political authoritarianism; and it argues that the Malaysian legal system has much to teach other plural polities, nations within the common law tradition, and federal states.

Researching the COVID-19 Pandemic: A Critical Blueprint for the Social Sciences Briggs, Daniel 2021-07-16 In challenging social science's established orthodoxies, this first in a series of books is a call for its disciplines to embrace new theoretical paradigms and research methods to better understand the reality of life in a post-COVID world. By offering a detailed insight into the harmful effects of neoliberalism before the pandemic, as well as the intervallic period the world is currently living

through, the authors show how it is more important than ever for social science to evolve and take a leading role in contextualising the biggest crisis of the 21st century. This is a critical blueprint for ongoing debates about the COVID-19 pandemic and alternative modes of research.

Mathematical Practices, Mathematics for Teachers: Activities, Models, and Real-Life

Blueprint 2003

The Second Handbook of Research on the Psychology of Mathematics Education Ángel Gutiérrez 2016-07-23 Since its establishment in 1976, PME (The International Group for the Psychology of Mathematics Education) is serving as a much sought after venue for scientific debate among those at the cutting edge of the field, as well as an engine for the development of research in mathematics education. A wide range of research activities conducted over the last ten years by PME members and their colleagues are documented and critically reviewed in this handbook, released to celebrate the Group's 40 year anniversary milestone. The book is divided into four main sections: Cognitive aspects of learning and teaching content areas; Cognitive aspects of learning and teaching transverse areas; Social aspects of learning and teaching mathematics; and Professional aspects of teaching mathematics. The selection for each chapter of a team of at least two authors, mostly located in different parts of the world, ensured effective coverage of each field. High quality was further enhanced by the scrupulous review of early chapter drafts by two leaders in the relevant field. The resulting volume with its compilation of the most relevant aspects of research in the field, and its emphasis on trends and future developments, will be a rich and welcome resource for both mature and emerging researchers in mathematics education.

Improving Teaching through Observation and Feedback Alyson L. Lavigne 2015-02-11 In response to Race to the Top, schools nationwide are rapidly overhauling their teacher evaluation processes. Often forced to develop and implement these programs without adequate extra-institutional support or relevant experience, already-taxed administrators need accessible and practical resources. Improving Teaching through Observation and Feedback brings cutting-edge research and years of practical experience directly to those who need them. In five concise chapters, Thomas Good and Alyson Lavigne briefly outline the history of RttT and then move quickly and authoritatively to a discussion of best practices. This book is a perfect resource for administrators reworking their processes for new evaluation guidelines.
