Topics that have to be dealt with in the CCNA Security exam include: Common Security Threats Securing Cisco

Routers AAA Threat Mitigation with ACLs Secure Management and Reporting Mitigating Layer 2 Attacks
IOS Firewall Feature Set Cisco IOS IPS Site-to-Site VPNs We give you knowledge information relevant to the exam specifications. To be able to succeed in the real exams, you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios. **THESE ARE ENTRY LEVEL EXAMS.** These exams are not too difficult. However, coverage is very comprehensive - a wide range of topics are presented in the official topic lists. The exams do not ask you to answer hundreds of questions. In other words, only a small fraction of the official topics will be presented.
