Rapport de la Troisième Réunion Du Groupe de Planification Pour la Coordination Des Campagnes Acoustiques Au Large de L'Afrique Du Nord-Ouest, Dakar Sénégal, 28-29 Octobre 2003 2005 The second meeting of the Planning Group for the Coordination of Acoustic Surveys off Northwest Africa was held in Dakar, Senegal, from 28 to 29 October 2003. The general objective of the Planning Group is to plan the coordination of acoustic surveys in the region including intercalibration of research vessels and to act as a forum for discussion on issues important to acoustic surveys such as standardization of methods, acoustic research and training. The Planning Group noted that the three countries that possess their own research vessels had all conducted acoustic surveys in 2003 and that progress had been made in terms of planning and implementation of surveys as well as in data analysis and reporting. Nevertheless, there are still some issues that need to be addressed including the coordination of the national surveys to ensure complete coverage of the pelagic stocks, studies to reduce the noise level of the different research vessels, and the operation of the pelagic trawl to improve sampling of the target pelagic species.--Publisher's description.

Codex Canadensis and the Writings of Louis Nicolas François-Marc Gagnon 2011-09-29 Part art, part science, part anthropology, this ambitious project presents an early Canadian perspective on natural history that is as much artistic and fantastical as it is encyclopedic. Edited and introduced by François-Marc Gagnon, The Codex Canadensis and the Writings of Louis Nicolas showcases an intriguing attempt to document the life of the new world - flora, fauna, and aboriginal. The book brings together for the first time the illustrated Codex Canadensis and The Natural History of the New World, following Gagnon's argument that both can be attributed to Louis Nicolas, a

French Jesuit priest who travelled throughout Canada between 1664 and 1675. *Histoire Naturelle des Indes Occidentales*, originally written in classical French, has been put in modern French by Réal Ouellet and translated into English by Nancy Senior. The Natural History presents a pre-Linnaean botany and pre-Darwinian account of living things, including hundreds of species of plants and vivid descriptions of wildlife. It is thoroughly annotated, focusing on the contemporary identification of species, as the result of a pan-Canadian collaboration of experts in fields from linguistics to biology and botany. The *Codex Canadensis*, currently in the collection of the Gilcrease Museum in Tulsa, Oklahoma, is reproduced in full and provides both a fascinating visual account of wildlife as Nicolas saw it and a rare example of early Canadian art. Gagnon's introduction profiles Louis Nicolas and analyses connections between his work and European examples of natural illustration from the period. The *Codex Canadensis* and the Writings of Louis Nicolas shows how the wildlife and native inhabitants of the new world were understood and documented by a seventeenth-century European and makes available fundamental documents in the history and visual culture of early North America.
