Sensational Devotion Jill C Stevenson 2013-04-15 Sensational Devotion examines contemporary Passion plays, biblical theme parks, Holy Land recreations, creationist museums, and megachurches in order to understand how they serve their evangelical believer-users while also shaping larger cultural and national dialogues. Jill Stevenson explores how performative media support specific theologies and core beliefs by creating sensual, live experiences for those who use them. The book explores evangelical performance across a range of media and sites, including film, television, theater, tourist attractions, museums, and places of worship. Using historical research coupled with firsthand experiences, it critically examines these spaces and events within their specific religious, cultural, and national contexts, while placing them within a long devotional tradition to suggest how they cultivate religious belief by generating vivid, sensual, affectively oriented, and individualized experiences. Stevenson's analysis builds upon existing work on performance and cognition, as well as theories of affect, as it contributes to existing scholarship on American evangelicalism and evangelical Christian media.

Final Report of the National Academies' Human Embryonic Stem Cell Research Advisory Committee and 2010 Amendments to the National Academies' Guidelines for Human Embryonic Stem Cell Research National Research Council 2010-08-13 In 2005, the National Academies released the book, Guidelines for Human Embryonic Stem Cell Research, which offered a common set of ethical standards for a field that, due to the absence of comprehensive federal funding, was lacking national standards for research. In order to keep the Guidelines up to date, given the rapid pace of scientific and policy developments in the field of stem cell research, the Human Embryonic Stem Cell Research Advisory Committee was established in 2006 with support from The Ellison Medical Foundation, The Greenwall Foundation, and the Howard Hughes Medical Institute. As it did in 2007 and 2008, the Committee identified issues that warranted revision, and this book addresses those issues in a third and final set of amendments. Specifically, this book sets out an updated version of the National Academies' Guidelines, one that takes into account the new, expanded role of the NIH in overseeing hES cell research. It also identifies those avenues of continuing National Academies' involvement deemed most valuable by the research community and other significant stakeholders.

Black Lives in the English Archives, 1500-1677 Imtiaz Habib 2017-05-15
Containing an urgently needed archival database of historical evidence, this volume includes both a consolidated presentation of the documentary records of black people in Tudor and Stuart England, and an interpretive narrative that confirms and significantly extends the insights of current theoretical excursus on race in early modern England. Here for the first time Imtiaz Habib collects the scattered references to black people—whether from Africa, India or America—in sixteenth- and seventeenth-century England, and arranges them into a systematic, chronological descriptive index. He offers an extended historical and theoretical interpretation of the records in six chapters, which serve as an introductory guide to the index even as they articulate a specific argument about the meaning of the records. Both the archival information and interpretive scholarship provide a strong framework from which future historical debates on race in early modern England can proceed.

2007 Amendments to the National Academies' Guidelines for Human Embryonic Stem Cell Research National Research Council 2007-05-30 In 2005, the National Academies released the report *Guidelines for Human Embryonic Stem Cell Research*, which offered a common set of ethical standards for a field that, due to the absence of comprehensive federal funding, was lacking national standards for research. In order to keep the Guidelines up to date, given the rapid pace of scientific developments in the field of stem cell research, the Human Embryonic Stem Cell Research Advisory Committee was established in 2006 with support from The Ellison Medical Foundation, The Greenwall Foundation, and the Howard Hughes Medical Institute. This letter report is the committee's first set of amendments to the Guidelines and clarifies earlier recommendations and conclusions, including the criteria for determining which stem cell lines it is acceptable to use. Future deliberations of the committee will address items for which additional information gathering and more extensive debate and discussion will be necessary.

Rethinking the Rhetorical Presidency Jeffrey Friedman 2013-09-13 In *The Rhetorical Presidency*, Jeffrey Tulis argues that the president's relationship to the public has changed dramatically since the Constitution was enacted: while previously the president avoided any discussions of public policy so as to avoid demagoguery, the president is now expected to go directly to the public, using all the tools of rhetoric to influence public policy. This has effectively created a "second" Constitution that has been layered over, and in part contradicts, the original one. In our volume, scholars from different subfields of political science extend Tulis's perspective to the judiciary and Congress; locate the origins of the constitutional change in the Progressive Era; highlight the role of Theodore Roosevelt, Woodrow Wilson, and the mass media in transforming the presidency; discuss the nature of demagoguery and whether, in fact, rhetoric is undesirable; and relate the rhetorical presidency to the public's ignorance of the workings of a government more complex than the Founders imagined. This book was originally published as a special issue of *Critical Review: A Journal of Politics and Society*.

Constructions of Neoliberal Reason Jamie Peck 2010-10-28 Amongst intellectuals

and activists, neoliberalism has become a potent signifier for the kind of free-market thinking that has dominated politics for the past three decades. Forever associated with the conviction politics of Ronald Reagan and Margaret Thatcher, the free-market project has since become synonymous with the 'Washington consensus' on international development policy and the phenomenon of corporate globalization, where it has come to mean privatization, deregulation, and the opening up of new markets. But beyond its utility as a protest slogan or buzzword as shorthand for the political-economic Zeitgeist, what do we know about where neoliberalism came from and how it spread? Who are the neoliberals, and why do they studiously avoid the label? *Constructions of Neoliberal Reason* presents a radical critique of the free-market project, from its origins in the first half of the 20th Century through to the recent global economic crisis, from the utopian dreams of Friedrich von Hayek through the dogmatic theories of the Chicago School to the hope and hubris of Obamanomics. The book traces how neoliberalism went from crank science to common sense in the period between the Great Depression and the age of Obama. *Constructions of Neoliberal Reason* dramatizes the rise of neoliberalism and its uneven spread as an intellectual, political, and cultural project, combining genealogical analysis with situated case studies of formative moments throughout the world, like New York City's bankruptcy, Hurricane Katrina, and the Wall Street crisis of 2008. The book names and tracks some of neoliberalism's key protagonists, as well as some of the less visible bit-part players. It explores how this adaptive regime of market rule was produced and reproduced, its logics and limits, its faults and its fate.

Art Deco Chicago Robert Bruegmann 2018-10-02 An expansive take on American Art Deco that explores Chicago's pivotal role in developing the architecture, graphic design, and product design that came to define middle-class style in the twentieth century Frank Lloyd Wright's lost Midway Gardens, the iconic Sunbeam Mixmaster, and Marshall Field's famed window displays: despite the differences in scale and medium, each belongs to the broad current of an Art Deco style that developed in Chicago in the first half of the twentieth century. This ambitious overview of the city's architectural, product, industrial, and graphic design between 1910 and 1950 offers a fresh perspective on a style that would come to represent the dominant mode of modernism for the American middle class. Lavishly illustrated with 325 images, the book narrates Art Deco's evolution in 101 key works, carefully curated and chronologically organized to tell the story of not just a style but a set of sensibilities. Critical essays from leading figures in the field discuss the ways in which Art Deco created an entire visual universe that extended to architecture, advertising, household objects, clothing, and even food design. Through this comprehensive approach to one of the 20th century's most pervasive modes of expression in America, *Art Deco Chicago* provides an essential overview of both this influential style and the metropolis that came to embody it.

The New Chicago John Patrick Koval 2006 For generations, visitors, journalists, and social scientists alike have asserted that Chicago is the quintessentially American city. Indeed, the introduction to "The New Chicago" reminds us that to know America, you must know Chicago. The contributors boldly announce the demise of the city of broad shoulders and the transformation of its physical, social, cultural, and economic institutions into a new Chicago. In this wide-ranging book, twenty scholars, journalists, and activists, relying on data from the 2000 census and many years of direct experience with the city, identify five converging forces in American urbanization which are reshaping this storied metropolis. The twenty-six essays included here analyze Chicago by way of globalization and its impact on the contemporary city; economic restructuring; the evolution of machine-style politics into managerial politics; physical transformations of the central city and its suburbs; and race relations in a multicultural era. In elaborating on the effects of these broad forces, contributors detail the role of eight significant racial, ethnic, and immigrant communities in shaping the character of the new Chicago and present ten case studies of innovative governmental, grassroots, and civic action. Multifaceted and authoritative, "The New Chicago" offers an important and unique portrait of an emergent and new Windy City.

Perceptions of Female Offenders Brenda Russell 2012-12-09 Female offenders are often perceived as victims who commit crimes as a self-defense mechanism or as criminal deviants whose actions strayed from typical 'womanly' behavior. Such cultural norms for violence exist in our gendered society and there has been scholarly debate about how male and female offenders are perceived and how this

perception leads to differential treatment in the criminal justice system. This debate is primarily based upon theories associated with stereotypes and social norms and how these prescriptive norms can influence both public and criminal justice response. Scholars in psychology, sociology, and criminology have found that female offenders are perceived differently than male offenders and this ultimately leads to differential treatment in the criminal justice system. This interdisciplinary book provides an evidence based approach of how female offenders are perceived in society and how this translates to differential treatment within the criminal justice system and explores the ramifications of such differences. Quite often perceptions of female offenders are at odds with research findings. This book will provide a comprehensive evidence-based review of the research that is valuable to laypersons, researchers, practitioners, advocates, treatment providers, lawyers, judges, and anyone interested in equality in the criminal justice system.
