**The Cost of Environmental Degradation** Lelia Croitoru 2010-07-16 How much is a cleaner environment worth? For policy makers, that question used to go largely unanswered. Many economic activities cause environmental degradation, entailing real costs to the economy and to people's welfare. Knowing the extent of these costs is crucial for identifying a country's main environmental priorities and allocating appropriate funds for environmental protection. Over the past decade, the World Bank has initiated a systematic effort to measure the costs of environmental degradation in the Middle East and North Africa, shedding new light on their magnitude and on the need for policy changes. In many cases, these costs were found to be surprisingly large. 'The Cost of Environmental Degradation: Case Studies from the Middle East and North Africa' brings together the best case studies of this program and summarizes their policy impacts at the national and regional levels. The case studies quantify monetarily the annual damage due to environmental degradation and express these estimates as percentages of the countries' gross domestic product. The studies use the most recent environmental valuation methods to estimate the economic costs resulting from air pollution, water degradation, deforestation, and land degradation. Uniquely, the book dedicates a case study to value the costs of environmental degradation resulting from an oil spill and demolition waste in times of conflict. The studies then illuminate the concrete implications on policy, investments, and institutions for the respective nations. This book will be of interest to policy makers, nongovernmental organizations, and academic and research institutions.

**Rethinking Teacher Supervision and Evaluation** Kim Marshall 2009-10-30 In this important book, education expert Kim Marshall shows how to break away from the typical and often ineffective evaluation approaches in which principals use infrequent classroom visits or rely on standardized test scores to assess a teacher's performance. Marshall proposes a broader framework for supervision and evaluation that enlists teachers in improving the performance of all students. Emphasizing trust-building and teamwork, Marshall's innovative, four-part framework shifts the focus from periodically evaluating teaching to continuously analyzing learning. This book offers school principals a guide for implementing Marshall's framework and shows how to make frequent, informal classroom visits followed by candid feedback to each teacher; work with teacher teams to plan thoughtful curriculum units rather than focusing on individual lessons; get teachers as teams involved in low-stakes analysis of interim assessment results to fine-tune their teaching and help struggling students; and use compact rubrics for summative teacher evaluation. This vital resource also includes extensive tools and advice for managing time as well as ideas for using supervision and evaluation practices to foster teacher professional development.

**Values in English Language Teaching** Bill Johnston 2003-01-30 This book offers a new perspective on language teaching by placing moral issues--that is, questions of values--at the core of what it is to be a teacher. The teacher-student relation is central to this view, rather than the concept of language teaching as merely a technical matter of managing students' acquisition of language. The message is that all language teaching involves an interplay of deeply held values, but in each teaching situation these values are played out in different ways. Johnston does not tell readers what to think, but only suggests what to think about. Values in English Language Teaching explores the complex and often contradictory moral landscape of the language classroom, gradually revealing how teaching is not a matter of clear-cut choices but of wrestling with dilemmas and making difficult decisions in situations often riven with conflict. It examines the underlying values that teachers hold as individuals and as members of their profession, and demonstrates how those values are played out in the real world of language classrooms. Matters addressed include connections between the moral and political dimensions in English language teaching, and between values and religious beliefs; relationship(s) between teacher identity and values; the meaning of professionalism and how it is associated with morality and values; the ways in which teacher development is a moral issue; and the marginality of English language teaching. All the examples are taken from real-life teaching situations--the complexity and messiness of these situations is always acknowledged, including both individual influences and broader social, cultural, and political forces at play in English language classrooms. By using actual situations as the starting point for analysis, Johnston offers a philosophy based in practice, and recognizes the primacy of lived experience as a basis for moral analysis. Examples come from teaching contexts around the world, including Brazil, Thailand, Poland, Japan, Central African Republic, Turkey, and Taiwan, as well as various settings in the United States. This book will change the way teachers see language classrooms--their own or those of others. It is a valuable resource for teachers of ESL and EFL and all those who work with them, especially teacher educators, researchers, and administrators.

**Education and the Reverse Gender Divide in the Gulf States** Natasha Ridge 2014-05-04 In this groundbreaking work, the author provides a close examination of the relationship between gender and education in the Gulf Cooperation Countries (GCC) and reveals that women's participation and achievement in education is rapidly outpacing that of men's. Ridge refers to this situation as a "reverse gender divide" and examines the roots and causes of this imbalance, as well as implications for the future. Based on timely material that is largely unavailable to other scholars, the book further describes how GCC countries, in their desire to be perceived as modern nation states, have enacted and embraced education policies that leave no space for local policymakers to acknowledge boys' deficits and challenges. In addition to the important implication for educational policy and practice, the author also explores wider social and political issues, such as the impact on the workforce and future sustainable development in the region.

**Last Bell** Carl Bistany 2015-11-05 In the mid-nineties, the Alfred Glickman School was just another failing school in one of America's most violent cities. Then SABIS, a private, for-profit education provider, took over. Twenty years later, the school is a six-time silver medalist in U.S. News & World Report's annual "America's Best High Schools" listing, and every single graduate of the school has been offered a college place. With success of this magnitude, you would think that for-profit managed charter schools like SABIS would be in high demand. On the contrary, they are fought at every turn. Why is the idea of employing for-profit companies to help rescue failing public schools treated with fear and hostility? Stranger still, why does a nation built on free enterprise refuse to embrace a free market strategy when so many students and schools would clearly benefit and with so much at stake? Last Bell is a book about politics, money and power. It examines the charge that for-profits running charter schools are in it for the money, not the kids, and reveals the real motives of those spreading these ideas and why they fight private sector involvement in public schools. Last Bell is a reasonable voice in a polarized debate. It does not call for an end to public schools but rather imagines a future in which private companies help create a competitive market for public education to boost performance, turn derelict schools into centers of excellence and give parents even in the worst neighborhoods real choice and their children a future.

**Territories of Poverty** Ananya Roy 2015-11-15 Territories of Poverty challenges the conventional North-South geographies through which poverty scholarship is organized. Staging theoretical interventions that traverse social histories of the American welfare state and critical ethnographies of international development regimes, these essays confront how poverty is constituted as a problem. In the process, the book analyzes bureaucracies of poverty, poor people's movements, and global networks of poverty expertise, as well as more intimate modes of poverty action such as volunteerism. From post-Katrina New Orleans to Korean church missions in Africa, this book is fundamentally concerned with how poverty is territorialized. In contrast to studies concerned with locations of poverty, Territories of Poverty engages with spatial technologies of power, be they community development and counterinsurgency during the American 1960s or the unceasing anticipation of war in Beirut. Within this territorial matrix, contributors uncover dissent, rupture, and mobilization. This book helps us understand the regulation of poverty—whether by globally circulating models of fast policy or vast webs of mobile money or philanthrocapitalist foundations—as multiple terrains of struggle for justice and social transformation.

*The Rise and Fall of Greater Syria* Carl C. Yonker 2021-04-19 The Syrian Social Nationalist Party devoted itself to reviving and unifying the Syrian nation and establishing this nation's complete independence over its historical homeland, Greater Syria. It continues its struggle today, influencing and shaping Lebanese and Syrian society and politics. Yet, the party remains largely unknown and misunderstood, a condition that stems from the lack of any comprehensive study of it. This book fills this gap. Syrian nationalism and nationalist movements, generally speaking, have been largely neglected and ignored by historians, scholars, and observers of the Middle East. So, too, has the SSNP. The lack of detailed and nuanced analyses has left significant gaps in the party's rich history unaddressed and enabled the perpetuation of inaccuracies and misperceptions regarding its past. Given this and the party's ongoing relevance in Lebanon and Syria, a thorough examination of the early history of the SSNP, the political organization and movement that embodied Syrian nationalism's most explicit, most cogent expression is

even more necessary. Based on an extensive and thorough examination of Arabic, French, and English primary sources, the monograph is the first comprehensive, systematic history of the SSNP to date, detailing its struggle to fulfill its nationalist vision and establish a secular, independent state in Greater Syria through a thorough analysis of its formation, evolution, and political activities in Lebanon and Syria.

**From Village School to Global Brand** James Tooley 2012-06-14 Can education be run as a profitable business and still be driven by a humanitarian vision? SABIS shows the answer is yes. Now with 60 schools in 15 countries and over 60,000 students, SABIS is a global education company committed to improving lives. The book is a journey through time - tracing the company from its humble origins in 1886 Mount Lebanon, through the civil war to the present day. It's also a journey through geographies, from Kurdistan to Katrina - from the first international schools in war-torn northern Iraq, to the first charter school to reopen after the hurricane devastated inner city New Orleans. SABIS goes where other educational providers are unwilling to tread, helping to rebuild lives shattered by war and natural disaster. It's finally a journey through the minds of committed educators, watching as they grapple with the fundamental question of how we educate young people in the virtues that have stood the test of time, whilst still enabling them to be prepared for a future of unknown possibilities.

*Education and Gendered Citizenship in Pakistan* M. Naseem 2010-12-14 This book challenges the uncritical use of the long held dictum of the development discourse that education empowers women. Situated in the post-structuralist feminist position it argues that in its current state the educational discourse in Pakistan actually disempowers women.

**Postwar** Okwui Enwezor 2016-10-19 This unprecedented global survey of the art of the postwar era represents a comprehensive examination of the production of art across all continents, under the conditions engendered by World War II. Accompanying the exhibition *Postwar: Art between the Pacific and the Atlantic, 1945-1965*, this extensive catalogue presents the work of more than 200 artists from over 50 countries. Uniquely, it understands the term "postwar" as a truly global condition, focusing on the increasingly interdependent nature of the world as the result of new geopolitical affinities and technological realities. The catalogue illuminates how these epochal social changes manifested worldwide across the practices of painting, sculpture, installation, performance, cinema, and music, through eight thematic sections: *Aftermath: Zero Hour and the Atomic Era*; *Form Matters*; *New Images of Man*; *Realisms*; *Concrete Visions*; *Cosmopolitan Modernisms*; *Nations Seeking Form*; and *Networks, Media, and Communication*. Key historical texts, visual essays, color illustrations, and over 35 original contributions by leading international art historians, curators, and scholars offer new insights into the complex legacies of artistic practice and art historical discourses that emerged in the aftermath of World War II's devastation. Artists' biographies, a comprehensive bibliography, and chronologies of the postwar period further supplement what will become an indispensable resource for future research.

For decades, while the Gulf Cooperation Council (GCC) states have housed and employed groups of migrants coming and going from Asia, Africa and the West, they have also served as home to the older, more settled communities that have come from neighbouring Arab states. *Arab Migrant Communities in the GCC* is a unique, original work of scholarship based on in-

depth fieldwork shedding light on a topic both highly relevant and woefully understudied. It focuses on the earlier community of Arab immigrants within the GCC, who are among the politically most significant and sensitive of migrant groups in the region. Through its multi-disciplinary lenses of social history, cultural studies, economics, and political science, the book presents original data and provides analyses of the settlement and continued evolution of migrant Arab communities across the GCC, their work in and assimilation within host societies and labour markets, and their political, economic, social and cultural significance both to the GCC region and to their countries of origin.

**Divining Victory** William Arkin 2010-05 The 2006 Israel-Hezbollah War may well be a paradigm for twenty-first century warfare. The technically sophisticated Israel Defense Forces (IDF) were confronted by a much smaller but well-armed and highly unconventional "state within a state" opponent. Israel launched an intensive 34-minute air assault designed to essentially disarm Hezbollah; it did not. Hezbollah's interspersed within the civilian population presented major targeting problems for the IDF, setting up condemnation of Israel's "over-reaction" in the international press. Airpower became the big loser in the press and after-action reports. *Divining Victory* examines the decisions, the effects, and the lessons learned for those who must confront similar enemies. Originally published in 2007. Recommended on the 2008 Royal Air Force Chief of the Air Staffs' reading list.

*The Epic of Difficult Choices* Kamel Mohanna 2017-01-01 Born the year of Lebanon's independence in 1943, in Khiyam, a village of South Lebanon, Dr. Kamel Mohanna studied, at the time of illiteracy, defying poverty to become a doctor. He forged himself a Lebanese role by joining the student movement which, in the sixties headed France. Then in the seventies, following the path traced by Che Guevara, he joined the revolutionaries in the mountains of Dhofar. It is there that he participated in the march of "barefoot doctors" on the footsteps of Mao Zedong. He resisted the "mermaids" of Paris, Canada and the chic

neighborhoods of Beirut. Upon his return to Lebanon, he preferred to them the misery of the Palestinian refugee camps, where he lived with the poor and sick of whom he made his cause. In the middle of the civil war, in the seventies and eighties, he travelled the length and breadth of Lebanon; not hesitating to go against all commonly accepted political precepts. In 1979, he founded the AMEL association, pacifist in time of war, open to all in time of partition, preaching the life in the shadow of the collective suicide. Until today and through this non-denominational organization, he endeavors to develop the humanity of human beings, without taking into account its religious, political and geographical affiliations, to attain a more just and dignified world.
