The MIT Encyclopedia of the Cognitive Sciences (MITECS) Robert A. Wilson 2001-09-04 Since the 1970s the cognitive sciences have offered multidisciplinary ways of understanding the mind and cognition. The MIT Encyclopedia of the Cognitive Sciences (MITECS) is a landmark, comprehensive reference work that represents the methodological and theoretical diversity of this changing field. At the core of the encyclopedia are 471 concise entries, from Acquisition and Adaptationism to Wundt and X-bar Theory. Each article, written by a leading researcher in the field, provides an accessible introduction to an important concept in the cognitive sciences, as well as references or further readings. Six extended essays, which collectively serve as a roadmap to the articles, provide overviews of each of six major areas of cognitive science: Philosophy; Psychology; Neurosciences; Computational Intelligence; Linguistics and Language; and Culture, Cognition, and Evolution. For both students and researchers, MITECS will be an indispensable guide to the current state of the cognitive sciences.

The National Habitus Marie-Pierre Le Hir 2014-08-27 Stories about border crossers, illegal aliens, refugees that regularly appear in the press everywhere point to the crucial role national identity plays in human beings' lives today. The National Habitus seeks to understand how and why national belonging became so central to a person's identity and sense of identity. Centered on the acquisition of the national habitus, the process that transforms subjects into citizens when a state becomes a nation-state, the book examines this transformation at the individual level in the case of nineteenth century France. Literary texts serve as primary material in this study of national belonging, because, as Germaine de Staël pointed out long ago, literature has the unique ability to provide access to "inner feelings." The term "habitus," in the title of this book, signals a departure from traditional approaches to nationalism, a break with the criteria of language, race, and ethnicity typically used to examine it. It is grounded instead in a sociology that deals with the subjective dimension of life and is best exemplified by the works of Norbert Elias (1897-1990) and Pierre Bourdieu (1931-2002), two sociologists who approach belief systems like nationalism from a historical,

instead of an ethical vantage point. By distinguishing between two groups of major French writers, three who experienced the 1789 Revolution firsthand as adults (Olympe de Gouges, François René de Chateaubriand and Germaine de Staël) and three who did not (Stendhal, Prosper Mérimée, and George Sand), the book captures evolving understandings of the nation, as well as thoughts and emotions associated with national belonging over time. *Le Hir* shows that although none of these writers is typically associated with nationalism, all of them were actually affected by the process of nationalization of feelings, thoughts, and habits, irrespective of aesthetic preferences, social class, or political views. By the end of the nineteenth century, they had learned to feel and view themselves as French nationals; they all exhibited the characteristic features of the national habitus: love of their own nation, distrust and/or hatred of other nations. By underscoring the dual contradictory nature of the national habitus, the book highlights the limitations nation-based identities impose on the prospect for peace.

Revue encyclopédique Georges Moreau 1892

The Writing Public Elizabeth Andrews Bond 2021-03-15 Inspired by the reading and writing habits of citizens leading up to the French Revolution, *The Writing Public* is a compelling addition to the long-running debate about the link between the Enlightenment and the political struggle that followed. Elizabeth Andrews Bond scoured France's local newspapers spanning the two decades prior to the Revolution as well as its first three years, shining a light on the letters to the editor. A form of early social media, these letters constituted a lively and ongoing conversation among readers. Bond takes us beyond the glamorous salons of the intelligentsia into the everyday worlds of the craftsmen, clergy, farmers, and women who composed these letters. As a result, we get a fascinating glimpse into who participated in public discourse, what they most wanted to discuss, and how they shaped a climate of opinion. *The Writing Public* offers a novel examination of how French citizens used the information press to form norms of civic discourse and shape the experience of revolution. The result is a nuanced analysis of knowledge production during the Enlightenment. Thanks to generous funding from Michigan State University and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access (OA) volumes, available on the Cornell University Press website and other Open Access repositories.

Biographie universelle et portative des contemporains, ou, Dictionnaire historique des hommes vivants, et des hommes morts depuis 1788 jusqu'a nos jours, qui se sont fait remarquer chez la plupart des peuples, et particulièrement en France, par leurs écrits, leurs actions, leurs talents, leurs vertus ou leurs crimes ... 1834

Monarchy Transformed Robert von Friedeburg 2017-08-31 This decisive contribution to the long-running debate about the dynamics of state formation and elite transformation in early modern Europe examines the new monarchies that emerged during the course of the 'long seventeenth century'. It argues that the players surviving the power struggles of this period were not 'states' in any modern sense, but primarily princely dynasties pursuing not only dynastic ambitions and princely prestige but the consequences of dynastic chance. At the same time, elites, far from insisting on confrontation with the government of princes for principled ideological reasons, had every reason to seek compromise and even advancement through new channels that the governing dynasty offered, if only they could profit from them. *Monarchy Transformed* ultimately challenges the inevitability of modern maps of Europe and shows how, instead of promoting state formation, the wars of the period witnessed the creation of several dynastic agglomerates and new kinds of aristocracy.

Critique of Black Reason Achille Mbembe 2017-02-17 In *Critique of Black Reason* eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world's center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of exclusion. With *Critique of Black Reason*, Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert 1995-08-24
Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

The Negro in France Shelby T. McCloy 2014-07-15 This historical study examines the black experience in Metropolitan France from the 1600s to 1960. Shelby T. McCloy explores the literary and cultural contributions of people of color to French society -- from Alexandre Dumas to Rene Maran -- and charts their political ascension.

Through the Language Glass Guy Deutscher 2010-08-31 A masterpiece of linguistics scholarship, at once erudite and entertaining, confronts the thorny question of how—and whether—culture shapes language and language, culture. Linguistics has long shied away from claiming any link between a language and the culture of its speakers: too much simplistic (even bigoted) chatter about the romance of Italian and the goose-stepping orderliness of German has made serious thinkers wary of the entire subject. But now, acclaimed linguist Guy Deutscher has dared to reopen the issue. Can culture influence language—and vice versa? Can different languages lead their speakers to different thoughts? Could our experience of the world depend on whether our language has a word for "blue"? Challenging the consensus that the fundamentals of language are hard-wired in our genes and thus universal, Deutscher argues that the answer to all these questions is—yes. In thrilling fashion, he takes us from Homer to Darwin, from Yale to the Amazon, from how to name the rainbow to why Russian water—a "she"—becomes a "he" once you dip a tea bag into her, demonstrating that language does in fact reflect culture in ways that are anything but trivial. Audacious, delightful, and field-changing, *Through the Language Glass* is a classic of intellectual discovery.

An Historical Geography of France Xavier de Planhol 1994-03-17 This 1994 book traces the historical geography of France from its roots in the Roman province of Gaul to the 1990s.

The Flour War Cynthia Bouton 1993-11 In the spring of 1775, a series of food riots shook the villages and countryside around Paris. For decades France had been free of famine, but the fall grain harvest had been meager, and the government of the newly crowned King Louis XVI had issued an untimely edict allowing the free commerce of grain within the kingdom. Prices skyrocketed, causing riots to break out in April, first in the market town of Beaumont-sur-Oise, then sweeping through the Paris Basin for the next three weeks. Known as the Flour War, or the *guerre des farines*, these riots are the subject of Cynthia Bouton's fascinating study. Building upon French historian George Rudé's pioneering work, Bouton identifies communities of participants and victims in the Flour War, analyzing them according to class, occupation, gender, and location. As typically happened, crowds of common people (*menu peuple*) confronted those who controlled the grain-bakers, merchants, millers, cultivators, and local authorities. Bouton asks why women of the *menu peuple* were heavily represented in the riots, often assuming crucial roles as instigators and leaders. In most instances, the people did not steal the provisions but forced those they cornered to sell at a price the rioters deemed "just." Bouton examines this phenomenon, known as *taxation populaire*, and considers the growing "sophistication of purpose" of rioters by placing the Flour War within the larger context of food riots in early modern Europe.
