Social Mobility In Kerala Filippo Osella 2000-12-20 Filippo and Caroline Osella, anthropologists who spent

three years in rural Kerala, south India, write about the modern search for upward social mobility: the processes involved, the ideologies that support or thwart it, and what happens to the people involved. They focus on the caste called Izhavas, a group that in the mid-19th century consisted of a small land-owning and titled elite and a large mass of landless and small tenants who were largely illiterate and considered untouchable, and who eked out a living by manual labor and petty trade. In the 20th century, Izhavas pursued mobility in many social arenas, both as a newly united caste and as families. The work considers how successful the mobility has been and looks at the effects on their society of an ethos of progress. Distributed by Stylus. Demand-Driven Approaches in Vocational Education and Training Muthuveeran Ramasamy 2016-09-09 Muthuveeran Ramasamy shows that the formal way of vocational education and training (VET) in rural areas often ignores the illiterate, the less educated, and the poor. The author demonstrates that VET programs need to be demand-driven and consider the socio-economic aspects of particular regions. Therefore, the significance of the study at grassroots level helps customize VET programs to respond to the demand of the individuals' vocational training needs of rural people by keeping their endogenous needs at the centre of vocational skill development processes. The findings and lessons learnt from action research are also intensively discussed as guiding principles of demand-driven approaches from the

learners'/societal perspectives.

The "Keystone" Jacket and Dress Cutter Charles Hecklinger 2006-01-01 With opulent fashions the ultimate in style, women of the late Victorian era wore a great deal of silks and satins. Daring combinations of bright colors were in. So were large hats, profusely trimmed. But by the end of the nineteenth century, ladies' tastes in fashion were changing, along with female lifestyles. Larger numbers of women were not only working outside the home, they were also playing tennis and golf, and riding bicycles and horses. All these activities called for a definite change in female fashions. Women came to rely on tailored suits with full skirts and fitted jackets over simple blouses. Riding habits called for a long, draped skirt worn over a pair of trousers. With the dawn of the twentieth century, professional tailors turned to the comprehensive 1895 "Keystone" guide to create office outfits, riding pants, shirtwaists, and other garments. Filled with more than eighty patterns, the handy resource provided tailors with suggestions for fabric choices as well as instructions for the proper measurement, fitting, cutting, and sewing of such items as a bolero jacket, a shirtwaist with yoke, a single-breasted vest, and riding breeches. Supplemented with a selection of newly captioned illustrations from *The Delineator* magazine, this volume will be a valuable reference for costume designers and fashion historians, and a fascinating window on the past for nostalgia enthusiasts.
