Closing the Gap in a Generation WHO Commission on Social Determinants of Health 2008 Social justice is a matter of life and death. Urban Stormwater Management in the United States National Research Council 2009-03-17 The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events, putting higher volumes of water and more pollutants into the nation's rivers, lakes, and estuaries. These changes have degraded water quality and habitat in virtually every urban stream system. The Clean Water Act regulatory framework for addressing sewage and industrial wastes is not well suited to the more difficult problem of stormwater discharges. This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level. A number of additional actions, such as conserving natural areas, reducing hard surface cover (e.g., roads and parking lots), and retrofitting urban areas with features that hold and treat stormwater, are recommended.

Civil Society and Health World Health Organization. Regional Office for Europe 2017-11 Civil Society Organizations (CSOs) can make a vital contribution to public health and health systems, but harnessing their potential is complex in a Europe where government-CSO relations vary so profoundly. This study is intended to outline some of the challenges and assist policy-makers in furthering their understanding of the part CSOs can play in tandem and alongside government. To this end it analyzes existing evidence and draws on a set of seven thematic chapters and six mini case studies. They examine experiences from Austria, Bosnia-Herzegovina, Belgium, Cyprus, Finland, Germany, Malta, the Netherlands, Poland, the Russian Federation, Slovenia, Turkey and the European Union and make use of a single assessment framework to understand the diverse contexts in which CSOs operate. The evidence shows that CSOs are ubiquitous, varied and beneficial, and the topics covered in this study reflect such diversity of aims and means: anti-tobacco advocacy, food banks, refugee health, HIV/AIDS prevention and cure, and social partnership. CSOs make a substantial contribution to public health and health systems with regards to policy development, service delivery and governance. This includes evidence provision, advocacy, mobilization, consensus building, provision of medical services and of services related to the social determinants of health, standard setting, self-regulation and fostering social partnership. However, in order to engage successfully with CSOs, governments do need to make use of adequate tools and create contexts conducive to collaboration. To guide policy-makers working with CSOs through such

complications, and help avoid some potential pitfalls, the book outlines a practical framework for such collaboration. This suggests identifying key CSOs in a given area; clarifying why there should be engagement with civil society; being realistic as to what CSOs can or will achieve; and an understanding of how CSOs can be helped to deliver.

Insomniac City Bill Hayes 2017-02-14 Amazon's Best Biographies and Memoirs of the Year List A moving celebration of what Bill Hayes calls "the evanescent, the eavesdropped, the unexpected" of life in New York City, and an intimate glimpse of his relationship with the late Oliver Sacks. "A beautifully written once-in-a-lifetime book, about love, about life, soul, and the wonderful loving genius Oliver Sacks, and New York, and laughter and all of creation."--Anne Lamott Bill Hayes came to New York City in 2009 with a one-way ticket and only the vaguest idea of how he would get by. But, at forty-eight years old, having spent decades in San Francisco, he craved change. Grieving over the death of his partner, he quickly discovered the profound consolations of the city's incessant rhythms, the sight of the Empire State Building against the night sky, and New Yorkers themselves, kindred souls that Hayes, a lifelong insomniac, encountered on late-night strolls with his camera. And he unexpectedly fell in love again, with his friend and neighbor, the writer and neurologist Oliver Sacks, whose exuberance--"I don't so much fear death as I do wasting life," he tells Hayes early on--is captured in funny and touching vignettes throughout. What emerges is a portrait of Sacks at his most personal and endearing, from falling in love for the first time at age seventy-five to facing illness and death (Sacks died of cancer in August 2015). *Insomniac City* is both a meditation on grief and a celebration of life. Filled with Hayes's distinctive street photos of everyday New Yorkers, the book is a love song to the city and to all who have felt the particular magic and solace it offers.

UN Millennium Development Library: Taking Action UN Millennium Project 2013-06-17 The Millennium Development Goals, adopted at the UN Millennium Summit in 2000, are the world's targets for dramatically reducing extreme poverty in its many dimensions by 2015 income poverty, hunger, disease, exclusion, lack of infrastructure and shelter while promoting gender equality, education, health and environmental sustainability. These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them. The Harper Record Teresa Healy 2008

The Curatorial Jean-Paul Martinon 2013-10-24 Stop curating! And think what curating is all about. This book starts from this simple premise: thinking the activity of curating. To do that, it distinguishes between 'curating' and 'the curatorial'. If 'curating' is a gamut of professional practices for setting up exhibitions, then 'the curatorial' explores what takes place on the stage set up, both intentionally and unintentionally, by the curator. It therefore refers not to the staging of an event, but to the event of knowledge itself. In order to start thinking about curating, this book takes a new approach to the topic. Instead of relying on conventional art historical narratives (for example, identifying the moments when artistic and curatorial practices merged or when the global curator-author was first identified), this book puts forward a multiplicity of perspectives that go from the anecdotal to the theoretical and from the personal to the philosophical. These perspectives allow for a fresh reflection on curating, one in which, suddenly, curating becomes an activity that implicates us all (artists, curators, and viewers), not just as passive recipients, but as active members. As such, the Curatorial is a book without compromise: it asks us to think again, fight against sweeping art historical generalizations, the sedimentation of ideas and the draw of the sound bite. Curating will not stop, but at least with this book it can begin to allow itself to be challenged by some of the most complex and ethics-driven thought of our times.

Vocational Education and Training in Times of Economic Crisis Matthias Pilz 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training (VET). Revealing how youth in transition is affected by economic crises, it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the university track for young people in many countries.

Rethinking Canadian Aid Stephen brown 2016-06-09 This book contributes to a “rethinking” Canadian aid at four different levels. First, it undertakes a collective rethinking of the foundations of Canadian aid, including both its normative underpinnings – an altruistic desire to reduce poverty and inequality and achieve greater social justice, a means to achieve commercial or strategic self-interest, or a projection of Canadian values and prestige onto the world stage – and aid’s past record. Second, it analyzes how the Canadian government government is itself rethinking Canadian aid, including greater focus on the Americas and specific themes (such as mothers, children and youth, and fragile states) and countries, increased involvement of the private sector (particularly Canadian mining companies), and greater emphasis on self-interest. Third, it rethinks where Canadian aid is or should be heading, including recommendations for improved development assistance. Fourth, it highlights how serious rethinking is required on aid itself: the concept, its relation to non-aid policies that affect development in the Global South, and the rise of new providers of development assistance, especially “emerging economies”. Each of these novel challenges holds important implications for Canada, for its development policies and for its declining influence in the morphing global aid regime.

Confronting Corruption Jeremy Pope 2000 The first version of this Source Book argued the case for a "National Integrity System", an holistic approach to transparency and accountability and embracing a range of accountability "pillars", democratic, judicial, media and civil society. The expression has since passed into common usage in development circles, and the argument for an holistic approach to anti-corruption efforts has similarly achieved a widespread consensus. The fight against corruption is not wholly a moral one, in the sense that it is a struggle against the intrinsic "evil" of corruption. Certainly there is a moral element - and one which cuts across al major religions and societies throughout the world. But the compelling reason for the struggle is the suffering and deprivation corruption brings to whole societies, and to the world's most poor. It is concern for the latter, rather than a distaste for the corrupt and their deeds, that rightly drives the global movement against corruption.

The Cambridge Handbook of the International Psychology of Women Fanny M. Cheung 2020-06-30 There is a growing knowledge base in understanding the differences and similarities between women and men, as well as the diversities among women and sexualities. Although genetic and biological characteristics define human beings conventionally as women and men, their experiences are contextualized in multiple dimensions in terms of gender, sexuality, class, age, ethnicity, and other social dimensions. Beyond the biological and genetic basis of gender differences, gender intersects with culture and other social locations which affect the socialization and development of women across their life span. This handbook provides a comprehensive and up-to-date resource to understand the intersectionality of gender differences, to dispel myths, and to examine gender-relevant as well as culturally relevant implications and appropriate interventions. Featuring a truly international mix of contributors, and incorporating cross-cultural research and comparative perspectives, this handbook will inform mainstream psychology of the international literature on the psychology of women and gender.

The Business of Social and Environmental Innovation Verena Bitzer 2015-01-05 In the face of limited progress toward meeting Millennium Development Goals or addressing climate change and resource degradation, increasing attention turns to harnessing the entrepreneurial, innovative, managerial and financial capacities of business for improved social and environmental outcomes. A more proactive role for business in sustainable development is especially pertinent in sub-Saharan Africa, which has been plagued by conflict and poverty but shows signs of a brighter future as the world's second-fastest-growing region. The book considers how the socio-economic context influences the objectives of social innovation and even our definition of what we mean by social innovation. Secondly, the book aims to show how social innovation initiatives emerge and fare in context of the limited ability of many African countries to provide public goods and services.
