Power Supplies for LED Driving Steve Winder 2016-12-28 Power Supplies for LED Driving, Second Edition explores the wide use of light-emitting diodes due to their efficient use of power. The applications for power LEDs include traffic lights, street lamps, automotive lighting, architectural lights, theatre lighting, household light replacements, signage lighting (replacing neon strip lights and fluorescent tubes), LCD display backlighting, and many more. Powering (driving) these LED's is not always simple. Linear driving is inefficient and generates far too much heat. With a switching supply, the main issues are EMI, efficiency, and of course cost. This book covers the design trade-offs involved in LED driving applications, from low-power, to UB-LEDs and beyond. Provides a practical, hands-on approach to power supply design for LED drivers Contains detailed examples of what works throughout the design process Presents commentary on how the calculated component value compares with the actual value used, including a description of why the choice was made

Kannadhasan 2022-08-04 We are delighted to introduce the proceedings of the first edition of the 2022 International Conference on Intelligent Technologies in Security and Privacy for Wireless Communication (ITSPWC 2022). This conference has brought researchers, developers and practitioners around the world who are leveraging and developing the Wireless Communication. The theme of ITSPWC 2022 was "Security and Challenges for Wireless Communication and Power Energy". The technical program of ITSPWC 2022 consisted of 33 full papers, including 5 invited papers in oral presentation sessions at the main conference tracks. The conference tracks were: Track 1 - Recent Trends in IoT; Track 2 - Recent Trends in Smart Energy Systems and Transmission; Track 3 - Recent Trends in Embedded Systems; and Track 4 - Recent Trends in Communication Systems. Aside from the high quality technical paper presentations, the technical program also featured one invited talk and two technical workshops. The invited talk was presented by Prof. Kaushik Pal from Universidade Federal do Rio de Janeiro, Brazil. The ITSPWC workshop aimed to gain insights into key challenges, understanding and design criteria of employing wireless technologies to develop and implement future related services and applications. It was a great pleasure to work with such an excellent organizing committee team for their hard work in organizing and supporting the conference. In particular, the Technical Program Committee, led by our Co-Chairs, Dr.R.Nagarajan, Dr.George Ghinea, Dr.Alagar Karthick, Dr.Bassim Alhadidi and Prof. Kanagaraj Venusamy who have completed the peer-review process of technical papers and made a high-quality technical program. We are also grateful to all the authors who

submitted their papers to the ITSPWC 2022 conference and workshops. We strongly believe that ITSPWC conference provides a good forum for all researcher, developers and practitioners to discuss all science and technology aspects that are relevant to Security and Privacy in Wireless Communication.
