The Pataphysician's Library Ben Fisher 2000-01-01 The Pataphysician's Library is a study of aspects of 1890s French literature, with specific reference to the traditions of Symbolism and Decadence. Its main focus is Alfred Jarry, who has proved, perhaps surprisingly, to be one of the more durable fin-de-siècle authors. The originality of this study lies in its use of the enigmatic list of books termed the livres pairs, which appears in Jarry's 1898 novel *Gestes et Opinions du docteur Faustroll*, pataphysicien, his best-known prose work. The greatest interest of the livres pairs lies in a group of works by Jarry's friends and contemporaries, primarily Leon

Bloy, Georges Darien, Gustave Kahn, Catulle Mendès, Josephin Madan, Rachilde, and Henri de Regnier. Several of these authors feature as the lords of islands visited by the pataphysician Dr Faustroll in his curious voyage around Paris. In conjunction with Jarry's own works, the contemporary livres pairs serve to illustrate the vibrant and experimental atmosphere in which these authors worked.

Jewel City James A. Ganz 2015-10-17 Timed with the centennial of the Panama-Pacific International Exposition (PPIE) of 1915, Jewel City presents a large and representative selection of artworks from the fair, emphasizing the variety of paintings, sculptures, photographs, and prints that greeted attendees. It is unique in its focus on the works of art that were scattered among the venues of the exposition—the most comprehensive art exhibition ever shown on the West Coast. Notably, the PPIE included the first American presentations of Italian Futurism, Austrian Expressionism, and Hungarian avant-garde painting, and there were also major displays of paintings by prominent Americans, especially those working in the Impressionist style. This lavishly illustrated catalogue features works by masters such as Winslow Homer, John Singer Sargent, Claude Monet, Paul Cézanne, Robert Henri, Edward Weston, Imogen Cunningham, Edvard Munch, Oskar Kokoschka, Umberto Boccioni, and many more. The volume also explores the PPIE's distinctive murals program, developments in the art of printmaking, and the legacy of the French Pavilion, which hosted an abundance of works by Auguste Rodin and inspired the founding and architecture of the Legion of Honor museum in San Francisco. A rich and fascinating study of a critical moment in American and European art history, Jewel City is indispensable for understanding both the United States' and California's role in the reception of modernism as well as the region's historical place on the international art stage. Published in association with the Fine Arts Museums of San Francisco. Exhibition dates: de Young Museum, San Francisco: October 17, 2015–January 10, 2016

Design Guidelines in American Cities John Punter 1999-01-01 This book is a study of design initiatives and policies in five US West Coast cities -- Seattle (including Bellevue), Portland, San Francisco, Irvine and San Diego--all of which have had particularly interesting urban design experience of relevance to practice in Britain and other countries. Although these cities are not a representative sample of all American design practice, they provide a rich vein of ideas about recent policy development and current initiatives which will stimulate thought about the formulation of effective design controls. The presentation of substantial extracts from key documents that underpin design controls in the five cities will be of interest, inspiration and practical use to academics and practitioners who want to know more about American practice and who want to contribute to improvements in the standards and quality of urban design policies and design control. The opening chapter provides a national context and a comparative framework for the study, with a focus on international perspectives, American planning systems and the development of criteria for comparison and evaluation. The five subsequent chapters take each city in turn, briefly reviewing the salient characteristics of each one before presenting an account of how planning and design policy have evolved in the last twenty-five years; key features of the contemporary systems of design control are highlighted and a summary evaluation is made. The focus in the case studies is on how policy and guidance have been formulated, structured and presented in the various documents that

make up the policy framework, how the process of control operates, and how both respond to the criticisms commonly made of design and control. This final chapter draws general conclusions about the experience of the studied cities of wider relevance to American design review practice, but which are of interest to those engaged in design review and policy formulation everywhere.

Land Use Controls Robert C. Ellickson 2020-10-15 *Land Use Controls: Cases and Materials* emphasizes an interdisciplinary approach that weaves historical, social, and economic causes and effects of legal doctrine. The casebook also brings out the functional relationships between formally unrelated routes of law—statutes, ordinances, constitutional doctrines, and common law—by focusing on their practical deployment, developers, neighbors, planners, politicians, and their empirical effects on outcomes like neighborhood quality, housing supply, racial segregation, and tax burdens. A thematic framework illuminates the connections among multiple topics under land law and gives attention to the factual and political context of the cases and aftermath of decisions. Dynamic pedagogy features original introductory text, cases, notes, excerpts from law review articles, and visual aids (maps, charts, graphs) throughout. New to the Fifth Edition: A focus on affordability and the new conflicts over urban zoning A fully updated treatment of local administrative law Recent constitutional rulings, including up-to-date Supreme Court decisions on exactions and regulatory takings Thoroughly updated notes, with recent cases, law review literature, and empirical studies Professors and students will benefit from: Distinguished authorship by respected scholars and professors with a range of expertise An interdisciplinary approach combining historical, social, political, and economic perspectives and offering dynamic opportunities for analysis along with broad legal coverage Concise but comprehensive treatment of the legal issues in private and public regulation of land development, including environmental justice, building codes and subdivision regulations, and the federal role in urban development A thematic framework illuminating connections among multiple discrete topics under land law and the factual and political context of cases and aftermath of decisions Excellent coverage and dynamic pedagogy

A People's Guide to the San Francisco Bay Area Rachel Brahinsky 2020-10-06 An alternative history and geography of the Bay Area that highlights sites of oppression, resistance, and transformation. A People's Guide to the San Francisco Bay Area looks beyond the mythologized image of San Francisco to the places where collective struggle has built the region. Countering romanticized commercial narratives about the Bay Area, geographers Rachel Brahinsky and Alexander Tarr highlight the cultural and economic landscape of indigenous resistance to colonial rule, radical interracial and cross-class organizing against housing discrimination and police violence, young people demanding economically and ecologically sustainable futures, and the often-unrecognized labor of farmworkers and everyday people. The book asks who had—and who has—the power to shape the geography of one of the most watched regions in the world. As Silicon Valley's wealth dramatically transforms the look and feel of every corner of the region, like bankers' wealth did in the past, what do we need to remember about the people and places that have made the Bay Area, with its rich political legacies? With over 100 sites that you can visit and learn from, this book demonstrates critical ways of reading the landscape itself for clues to these histories. A useful companion for travelers, educators, or longtime residents, this guide links multicultural streets and lush hills to suburban cul-de-sacs and wetlands, stretching from the North Bay to the South Bay, from the East Bay to San Francisco. Original maps help guide readers, and thematic tours offer starting points for creating your own routes through the region.

Chinatown Film Culture Kim K. Fahlstedt 2020-08-14 Chinatown Film Culture provides the first comprehensive account of the emergence of film and moviegoing in the transpacific hub of San Francisco in the early twentieth century. Working with materials previously left in the margins of grand narratives of history, Kim K. Fahlstedt uncovers the complexity of a local entertainment culture that offered spaces where marginalized Chinese Americans experienced and participated in local iterations of modernity. At the same time, this space also fostered a powerful Orientalist aesthetic that would eventually be exported to Hollywood by San Francisco showmen such as Sid Grauman. Instead of primarily focusing on the screen-spectator relationship, Fahlstedt suggests that immigrant audiences' role in the proliferation of cinema as public entertainment in the United States saturated the whole moviegoing experience, from outside on the street to inside the movie theater. By highlighting San Francisco and Chinatown as featured participants rather than bit players, Chinatown Film Culture provides an historical account from the margins, alternative to the more dominant narratives of U.S. film history.

Negotiating Identities Helen Grice 2002-10-11 *Negotiating Identities* is a study of the development of writing by Asian American women in the 20th century, with particular emphasis on the successful late 20th century writers such as Maxine Hong Kingston, Amy Tan, Joy Kogawa, Bharati Mukherjee, and Gish Jen. It relates the development of Asian writing by women in America – with a comparative element incorporating Britain – to a series of theoretical preoccupations: the mother/daughter dyad, biracialism, ethnic histories, citizenship, genre, and the idea of 'home'.

On Site, In Sound Kirstie A. Dorr 2018-02-09 In *On Site, In Sound* Kirstie A. Dorr examines the spatiality of sound and the ways in which the sonic is bound up in perceptions and constructions of geographic space. Focusing on the hemispheric circulation of South American musical cultures, Dorr shows how sonic production and spatial formation are mutually constitutive, thereby pointing to how people can use music and sound to challenge and transform dominant conceptions and configurations of place. Whether tracing how the evolution of the Peruvian folk song "El Condor Pasa" redefined the boundaries between national/international and rural/urban, or how a pan-Latin American performance center in San Francisco provided a venue through which to challenge gentrification, Dorr highlights how South American musicians and activists created new and alternative networks of cultural exchange and geopolitical belonging throughout the hemisphere. In linking geography with musical sound, Dorr demonstrates that place is more than the location where sound is produced and circulated; it is a constructed and contested domain through which social actors exert political influence.

New Mythologies in Design and Culture Rebecca Houze 2016-05-19 Taking as its point of departure Roland Barthes' classic series of essays, *Mythologies*, Rebecca Houze presents an exploration of signs and symbols in the visual landscape of postmodernity. In nine chapters Houze considers a range of contemporary phenomena, from the history of sustainability to the meaning of sports and children's building toys. Among the ubiquitous global trademarks she examines are BP, McDonald's, and Nike. What do these icons say to us today? What political and ideological messages are hidden beneath their surfaces? Taking the idea of myth in its broadest sense, the individual case studies employ a variety of analytic methods derived from linguistics, psychoanalysis, anthropology, sociology, and art history. In their eclecticism of approach they demonstrate the interdisciplinarity of design history and design studies. Just as Barthes' meditations on culture concentrated on his native France, *New Mythologies* is rooted in the author's experience of living and teaching in the United States. Houze's reflections encompass both contemporary American popular culture and the history of American industry, with reference to such foundational figures as Thomas Jefferson and Walt Disney. The collection provides a point of entry into today's complex postmodern or post-postmodern world, and suggests some ways of thinking about its meanings, and the lessons we might learn from it.

New York Magazine 1985-06-17 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Fleeting Moments Gunther Barth 1990-10-18 The tension between nature and culture, which accompanies the rise of any large society, has become a subject of great concern in our time. In this compelling study, Gunther Barth, acclaimed author of *City People: The Rise of Modern City Culture in Nineteenth-Century America*, identifies fleeting moments of concord between

nature and culture in the course of American history. During the search for the Wilderness Passage, the progress of the Lewis and Clark expedition, and the building of park cemeteries and big city parks, Americans realized that nature was not merely a force to be reckoned with, not merely a resource to be exploited, but also an integral component of their lives. Through the engineering of nature and culture in the urban environment, the energetic attempts to conserve large-scale nature in the United States emerged as an offspring of the big city. Heightening our understanding of the historical complexity of the relationship between nature and culture, and suggesting that harmony between the two is a mark of civilization, this original study will be an invaluable guide to anyone concerned with the quality of life in America, past and future.

Not Even Then Brian Blanchfield 2004-04-19 "'Sifting subtext,' Brian Blanchfield infuses measure with feral ways, blandishments with subtle bafflement. Not since Ashbery's early poetry has so much eloquence shown so little pity ('We have our no, libido, go'). Blanchfield speeds up his vision to catch the flickers in what others tend to see as a continuum—the void-gaps of difference in likeness, the exclusive 'invitational' in the "open." Magnificently unappeased ('Not in thirteen / new ways to play can the one that's wild be reconciled'), Not Even Then makes urbanity and originality go round and round together in one astonishing poem after another.—Calvin Bedient "The infinite prospect of cityscape and water route surrounds us in these poems where 'sight is what we are within.' Blanchfield's vigorous language, his kinetic syntax and his captivating gift for assembling a new world out of surprising images make Not Even Then one of the lustiest, most electric reads since Hart Crane's White Buildings. In his own words, 'here is a craft. The kind to ride.' A most enjoyable ride indeed."—D. A. Powell "Lively, intelligent questions of scale and position—of where (& who) the self is vis-a-vis truth—animate the unsteady subjectivity of Brian Blanchfield's first collection. In gorgeous poems whose slanted insights seem earned and unarguable, 'meaning's warning' is delivered just in time. 'We said beauty should have to do with us,' writes Blanchfield: his poems are admirably real and extraordinarily rewarding encounters."—Laura Mullen "Here—from a poet whose language is generous beyond its own constraint—is the welcome news that poetry can expand without being stretched thin, go undeceived without losing its lovingness, and even redeem the future that some of us, otherwise, did not want to enter."—Douglas Crase

The Browns of California Miriam Pawel 2018-09-04 "Miriam Pawel's fascinating book . . . illuminates the sea change in the nation's politics in the last half of the 20th century."--New York Times Book Review California Book Award Gold Medal Winner * Finalist for the Los Angeles Times Book Prize * A Los Angeles Times Bestseller * San Francisco Chronicle's "Best Books of the Year" List * Publishers Weekly Top Ten History Books for Fall * Berkeleyside Best Books of the Year * Shortlisted for NCIBA Golden Poppy Award A Pulitzer Prize-winning journalist's panoramic history of California and its impact on the nation, from the Gold Rush to Silicon Valley--told through the lens of the family dynasty that led the state for nearly a quarter century. Even in the land of reinvention, the story is exceptional: Pat Brown, the beloved father who presided over California during an era of unmatched expansion; Jerry Brown, the cerebral son who became the youngest governor in modern times--and then returned three decades later as the oldest. In *The Browns of California*, journalist and scholar Miriam Pawel weaves a narrative history that spans four generations, from August Schuckman, the Prussian immigrant who crossed the Plains in 1852 and settled on a northern California ranch, to his great-grandson Jerry Brown, who reclaimed the family homestead one hundred

forty years later. Through the prism of their lives, we gain an essential understanding of California and an appreciation of its importance. The magisterial story is enhanced by dozens of striking photos, many published for the first time. This book gives new insights to those steeped in California history, offers a corrective for those who confuse stereotypes and legend for fact, and opens new vistas for readers familiar with only the sketchiest outlines of a place habitually viewed from afar with a mix of envy and awe, disdain, and fascination.

The Image of the City Kevin Lynch 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.
