Gravel Roads Ken Skorseth 2000 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Child Protective Services Diane DePanfilis 2003 From the Preface: This manual, Child Protective

Services: A Guide for Caseworkers, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based—including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Planning Guide for Maintaining School Facilities Tom Szuba 2003 This title is no longer available in print. However, please visit the NCES website at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2003347> to view an electronic version of the text. As America's school buildings age, we face the growing challenge of maintaining the nation's education facilities at a level that enables our teachers to meet the needs of the 21st century learners. This tool has been developed to help readers better understand why and how to develop, implement, and evaluate a facilities maintenance plan. It focuses on: maintenance as a vital task in the responsible management of an education organization, the needs of an education audience, strategies and procedures for planning, implementing, and evaluating maintenance programs, a process to be followed, rather than a canned set of "one size fits all" solutions, and recommendations based on "best practices", rather than mandates. The document offers recommendations on the following important issues, which serve as chapter headings: Introduction to School Facilities Maintenance Planning Planning for School Facilities Maintenance Facilities Audits (Knowing What You Have) Providing a Safe Environment for Learning Maintaining School Facilities and Grounds Effectively Managing Staff and Contractors Evaluating Facilities Maintenance Efforts
