Durability of Geotextiles Rilem 2004-03-01 During the past decade, the use of geotextiles has increased significantly in a wide range of civil engineering applications: road construction, coastal engineering, stabilization of slopes and retaining structures, reinforcement of foundations, drainage etc. This work focuses on the factors which determine the level of long-term performance of these materials such as their mechanical and physical properties and physico-chemical ageing processes. (It includes contributions to an international seminar held at Saint-Remy-les-Chevreuse, France, in November 1986)

Elastan und die Herausforderungen im biologischen Abbauprozess Lara Werner 2020-06-26 Studienarbeit aus dem Jahr 2019 im Fachbereich Design (Industrie, Grafik, Mode), Note: 1,3, , Sprache: Deutsch, Abstract: Mode soll heutzutage nicht nur den neuesten Trends entsprechen, sondern auch bequem und im besten Fall noch formbeständig sein. Hier hat die Textilindustrie durch Elastan die richtige Faser gefunden. In dieser Forschung beschäftigen wir uns mit dem Thema des Elastans, seiner Entstehung, der Definition und der Auswirkungen auf die Umwelt. Ziel dieser Arbeit ist es, das Problem seiner biologischen Abbaubarkeit zu analysieren und adäquate Lösungsmöglichkeiten vorzustellen.

[Fibers for Technical Textiles](#) Sheraz Ahmad 2020-08-21 This book discusses the properties of fibres used in manufacturing technical textiles, highlighting the importance of material selection in terms of cost, end-user requirements and properties. It also discusses the classification of technical textiles, and describes the details of each category, such as the

properties, applications, advantages and drawbacks. As such, it is a valuable resource for all those interested in advanced textiles.

Die neuesten Fortschritte der Zuschneidekunst. Lilly-Britt Weiß 2020-10-08 Das traditionelle und geheime Erfahrungswissen des Schneiders im Bereich der Zuschneidekunst war bis ins 19. Jahrhundert in der Meisterwerkstatt situiert. Im Zuge der fortschreitenden Industrialisierung wurde diesem technisch-gestalterischen Wissen bis zur Jahrhundertwende ein formalisiertes Wissen an die Seite gestellt, das universell anwendbar sein sollte. Dieses besitzt bis heute Gültigkeit, ersetzt jedoch nicht das implizite, auf Erfahrungen beruhende Wissen. In dieser Studie werden die historische Vielfalt der Wissensformen der Zuschneidekunst und der Formalisierungsprozess dieses Wissens nachgezeichnet. Im Zentrum der Betrachtung stehen konkrete historische Prozesse, Örtlichkeiten und Personen im Wirkungskreis der 1850 in Dresden gegründeten Europäischen Moden-Akademie, der ersten höheren Bildungseinrichtung für das Schneidergewerbe im deutschsprachigen Raum. Die Systematisierung des Wissens erfolgte in einem konstruktiven Dialog unter den Schneidern und lebte von der Rückschau, der Identifizierung des Gegenwärtigen sowie von der Motivation, die Zukunft des Gewerbes zu gestalten. Hierbei bildete sich eine Forschungs- und Lehrpraxis heraus, die auch heute noch die Grundlage für die Ausbildung eines, nun als Ingenieurwissenschaft definierten Wissens im Bereich der Bekleidungstechnik ist. Als Historikerin, Ingenieurin und Gestalterin leistet die Autorin mit dieser Arbeit einen Beitrag zur Bewahrung und Nutzbarmachung handwerklichen Wissens als essentielles und konstituierendes Element der technisierten Welt.

Clothing Technology Hannelore Eberle 2014 "Clothing Technology" has been thoroughly revised. It is designed for specialists in the clothing industry: sewers, finishers, cutters and men's and women's tailors. But it can also be used in master courses or engineer courses, design colleges, polytechnics and in the textile trade, either as course book or as a work of reference. [<http://www.amazon.co.uk/>].

Yesterday - Tomorrow Marc Erwin Babej 2017 An der Entstehung von "Yesterday - Tomorrow" war ein Team von mehr als 50 Mitarbeitern beteiligt, darunter auch 13 renommierte internationale Ägyptologen (Haward University, Université Paris IV-Sorbonne, Brown University, Ludwig-Maximilians-Universität München, usw.). Die jüngste Arbeit des deutsch-amerikanischen Fotokünstlers Marc Erwin Babej nimmt die komplexe Bildsprache des

antiken Ägypten auf und aktualisiert sie in fotorealistischen Medien. Dabei adaptiert er die wohl auffälligste Besonderheit ägyptischer Kunst: die gleichzeitige Darstellung des menschlichen Körpers aus verschiedenen Perspektiven wie Frontal- und Seitenansicht. Unter anderem durch diese "aspektivische" Darstellung übersetzt er die auf Zeitlosigkeit angelegte ägyptische Kunst in die Gegenwart. Der Kunststil wird von Babej und dem Team als aspektivischer Realismus bezeichnet. Eine eigene App macht dem Leser des Katalogs zusätzliche Inhalte sichtbar und ermöglicht eine dreidimensionale Augmented Reality Darstellung von diesem einzigartigen Projekt.

Fashion Buying and Merchandising Rosy Boardman 2020-05-10 Fashion buying and merchandising has changed dramatically over the last 20 years. Aspects such as the advent of new technologies and the changing nature of the industry into one that is faster paced than ever before, as well as the shift towards more ethical and sustainable practices have resulted in a dramatic change of the roles. As a result, contemporary fast fashion retailers do not follow the traditional buying cycle processes step by step, critical paths are wildly different, and there has been a huge increase in 'in-season buying' as a response to heightened consumer demand. This textbook is a comprehensive guide to 21st-century fashion buying and merchandising, considering fast fashion, sustainability, ethical issues, omnichannel retailing, and computer-aided design. It presents an up-to-date buying cycle that reflects key aspects of fashion buying and merchandising, as well as in-depth explanations of fashion product development, trend translation, and sourcing. It applies theoretical and strategic business models to buying and merchandising that have traditionally been used in marketing and management. This book is ideal for all fashion buying and merchandising students, specifically second- and final-year undergraduate as well as MA/MSc fashion students. It will also be useful to academics and practitioners who wish to gain a greater understanding of the industry today.

Not at Your Service Björn Franke 2020-12-16 Not at Your Service: Manifestos for Design brings together the broad spectrum of beliefs, subjects and practices of designers at Zurich University of the Arts. It offers different approaches and insights on the present-day role and impact of design. It is not conceived as a finished project, but as a fluid document of its time. Collaborative design, interaction within complex systems, attention economics, the ecological shift, visual literacy, gender-neutral design, "quick and dirty" design ethnography, social responsibility, the value of ugliness, death futures, immersive technologies, identity and crises, design as a transformative discipline - all of these topics are presented for debate with passion, conviction and professional expertise.

Smart Clothes - Textilien mit Elektronik Sina Carvajal Vargas 2009-03 Smart Clothes, i-wear, Intelligent Bekleidung, diese Schlagwörter stehen für die Kombination von Bekleidung und Elektronik. Die kreativen Entwicklungen reichen von Snowboardjacken mit eingebautem mp3-player über Unterhemden, die Herzfunktionen überwachen oder eine Fahrradjacke, die den Träger warnt und automatisch das Fahrrad abschließt, bis hin zu Oberteilen mit eingewebtem Bildschirm. Bereits seit den 80 Jahren beschäftigen sich Elektronik- und Textilindustrie mit der Thematik der so genannten Smart Clothes die durch den technologischen Fortschritt

zunehmend realisierbar werden. Dieses Buch zeigt anhand einer Untersuchung die vielen interessanten Entwicklungen die seit dem entstanden sind und beschreibt in drei Blöcken die Hauptthemen; Bedeutung, Status Quo und Anforderungen. Zunächst wird der Begriff Smart Clothes abgegrenzt, denn was heißt in diesem Kontext eigentlich intelligent? Darüber hinaus wird ihre Bedeutung für den Konsumenten, wie auch für die Zukunft der Bekleidungsindustrie dargestellt. In einem umfangreichen Diskurs über den derzeitigen Entwicklungsstand, werden eine Vielfalt marktreifer Produkte, aber auch visionäre Ideen und Forschungsprojekte in Produktkategorien unterteilt vorgestellt. Eine darauf basierende Morphologie stellt die Produktkategorien bestimmten Anwendungs-bereichen gegenüber und ermöglicht es Rückschlüsse auf Entwicklungstrends zu ziehen. Um die Einzelkomponenten zur Herstellung der Smart Clothes darzustellen, werden Bausteine, wie leitfähige Textilien, textile Bedienelemente oder textile Sensoren vorgestellt. Im abschließenden Teil werden die Anforderungen an die intelligenten Textilien beschrieben und die gewonnenen Erkenntnisse zusammengefasst. Dieses Buch dient somit dem interessierten Leser als eine Art Kompendium der Smart Clothes. Es verschafft ihm einen umfassenden und spannenden Überblick auf den Entwicklungsstand von Produkten und Zutaten, zeigt die verschiedenen Anbieter und forschenden Institutionen auf und bietet Einblicke

Design of Clothing Manufacturing Processes Jelka Geršak 2013-07-31 The era of mass manufacturing of clothing and other textile products is coming to an end; what is emerging is a post-industrial production system that is able to achieve the goal of mass-customised, low volume production, where the conventional borders between product design, production and user are beginning to merge. To continue developing knowledge on how to design better products and services, we need to design better clothing manufacturing processes grounded in science, technology, and management to help the clothing industry to compete more effectively. Design of clothing manufacturing processes reviews key issues in the design of more rapid, integrated and flexible clothing manufacturing processes. The eight chapters of the book provide a detailed coverage of the design of clothing manufacturing processes using a systematic approach to planning, scheduling and control. The book starts with an overview of standardised clothing classification systems and terminologies for individual clothing types. Chapter 2 explores the development of standardised sizing systems. Chapter 3 reviews the key issues in the development of a garment collection. Chapters 4 to 7 discuss particular aspects of clothing production, ranging from planning and organization to monitoring and control. Finally, chapter 8 provides an overview of common quality requirements for clothing textile materials. Design of clothing manufacturing processes is intended for R&D managers, researchers, technologists and designers throughout the clothing industry, as well as academic researchers in the field of clothing design, engineering and other aspects of clothing production. Considers in detail the design of sizing and classification systems Discusses the planning required in all aspects of clothing production from design and pattern making to manufacture Overviews the management of clothing production and material quality requirements

Command and Control Eric Schlosser 2014-08-26 The Oscar-shortlisted documentary Command and Control, directed by Robert Kenner, finds its origins in Eric Schlosser's book and continues to explore the little-known history of the management and safety concerns of America's nuclear arsenal. "A devastatingly lucid and detailed new history of nuclear weapons in the U.S. Fascinating." —Lev Grossman, TIME Magazine "Perilous and gripping . . . Schlosser skillfully weaves together an engrossing account of both the science and the politics

of nuclear weapons safety.” —San Francisco Chronicle A myth-shattering exposé of America’s nuclear weapons Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America’s nuclear arsenal. A groundbreaking account of accidents, near misses, extraordinary heroism, and technological breakthroughs, Command and Control explores the dilemma that has existed since the dawn of the nuclear age: How do you deploy weapons of mass destruction without being destroyed by them? That question has never been resolved—and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind. While the harms of global warming increasingly dominate the news, the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten. Written with the vibrancy of a first-rate thriller, Command and Control interweaves the minute-by-minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years. It depicts the urgent effort by American scientists, policy makers, and military officers to ensure that nuclear weapons can’t be stolen, sabotaged, used without permission, or detonated inadvertently. Schlosser also looks at the Cold War from a new perspective, offering history from the ground up, telling the stories of bomber pilots, missile commanders, maintenance crews, and other ordinary servicemen who risked their lives to avert a nuclear holocaust. At the heart of the book lies the struggle, amid the rolling hills and small farms of Damascus, Arkansas, to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States. Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons, Command and Control takes readers into a terrifying but fascinating world that, until now, has been largely hidden from view. Through the details of a single accident, Schlosser illustrates how an unlikely event can become unavoidable, how small risks can have terrible consequences, and how the most brilliant minds in the nation can only provide us with an illusion of control. Audacious, gripping, and unforgettable, Command and Control is a tour de force of investigative journalism, an eye-opening look at the dangers of America’s nuclear age.

Advanced Knitting Technology Subhankar Maity 2021-08-22 Advanced Knitting Technology provides complete coverage of the latest innovations and developments in knitting technology, including emerging methods as well as the latest best practice for classical processes. Many technologies can be used for the production of cloth such as weaving, knitting, nonwoven, and braiding. Knitting methods are being selected for a growing range of applications due to the spectacular properties of knitted fabric, such as softer tactile quality, higher stretchability, bulkiness, and functional properties that compare favorably with other woven fabrics. Beyond the well-known apparel applications, specially designed knitted structures are uniquely suitable for high performance applications like reinforcement for composites, medical implants, and geotextiles. This book presents recent advances in knitting technology, including structures, properties and applications of knitted fabrics in modern apparel, activewear, composites, medical textiles, and geotextiles. With reference to the latest industry practice, testing, quality and process control methods for knitting technologies are discussed. Advanced Knitting Technology covers recent advances in knitting technology, properties and performance of knitted structures, their applications in apparel and technical fields. Provides detailed and practical instructions for the sustainable production of knitted textiles, including sustainable chemical processing natural dyeing processes, and sustainability analysis methods Draws on the latest research to discuss the future of knitted apparels and high-tech applications of knitted structures as technical textiles Explores the latest applications of AI and machine learning to the knitting process

Injection Molds for Beginners Rainer Dangel 2020-04-06 This applications-oriented book describes the construction of an injection mould from the ground up. Included are explanations of the individual types of tools, components, and technical terms; design procedures; techniques, tips, and tricks in the construction of an injection mould; and pros and cons of various solutions. Based on a plastic part ("bowl with lid") specially developed for this book, easily understandable text and many illustrative pictures and drawings provide the necessary knowledge for practical implementation. Step by step, the plastic part is modified and enhanced. The technologies and designs that are additionally needed for an injection mould are described by engineering drawings. Maintenance and repair, and essential manufacturing techniques are also discussed. Now in full color, this second edition builds on the success of the first, with updates and small corrections throughout, as well as a new expanded section covering the process chain.

Corsets and Crinolines Norah Waugh 2017-08-03 In this classic book, Norah Waugh explores the changing shapes of women's dress from the 1500s to the 1920s. Simple laced bodices became corsets of cane, whalebone and steel, while padding at shoulders and hips gave way to the structures of farthingales, hoops and bustles. *Corsets and Crinolines* explains the cyclical nature of these fashions, and how waists and skirts changed shape and size through three distinct eras: The 1500s to 1670—farthingales and whaleboned bodies. 1670 to 1800—Stays and hooped petticoats. 1800 to 1925—corsets, crinolines and bustles. Each section describes how these garments originated, how they became popular and how they emerged as central to the fashions of the time. Extracts from diaries, journals, poems and newspapers, as well as over 100 illustrations, demonstrate the variety of these ubiquitous items of clothing throughout modern history. *Corsets and Crinolines* also contains a wealth of practical notes and resources for today's costume makers and designers, including: Scaleable patterns for the construction of 25 different bustles, crinolines, corsets, corselets, stays, pocket hoops, hooped petticoats and bodices. Detailed appendices on the manufacture of corsets and crinolines, including farthingales, supports and hooped petticoats. A list of further reading, including costume histories; textile and weaving histories; reconstruction of period clothing; contemporary application of foundational garments; and a list of museums and institutions with period clothing collections, for first-hand study. A glossary of terms and materials.

Just for Fun Linus Torvalds 2002-06-04 Once upon a time Linus Torvalds was a skinny unknown, just another nerdy Helsinki techie who had been fooling around with computers since childhood. Then he wrote a groundbreaking operating system and distributed it via the Internet -- for free. Today Torvalds is an international folk hero. And his creation LINUX is used by over 12 million people as well as by companies such as IBM. Now, in a narrative that zips along with the speed of e-mail, Torvalds gives a history of his renegade software while candidly revealing the quirky mind of a genius. The result is an engrossing portrayal of a man with a revolutionary vision, who challenges our values and may change our world.

Design Ethnography Francis Müller 2020-12-14 This open access book describes methods for research on and research through design. It posits that ethnography is an appropriate method for design research because it constantly orients itself, like design projects, towards social realities. In research processes, designers acquire project-specific knowledge, which happens mostly intuitively in practice. When this knowledge becomes the subject of reflection and explication, it strengthens the discipline of design and makes it more open to interdisciplinary dialogue. Through the use of the ethnographic method in design, this book shows how design researchers can question the certainties of the everyday world, deconstruct reality into singular aesthetic and semantic phenomena, and reconfigure them into new contexts of signification. It shows that design ethnography is a process in which the epistemic and creative elements flow into one another in iterative loops. The goal of design ethnography is not to colonize the discipline of design with a positivist and objectivist scientific ethos, but rather to reinforce and reflect upon the explorative and searching methods that are inherent to it. This innovative book is of interest to design researchers and professionals, including graphic artists, ethnographers, visual anthropologists and others involved with creative arts/media.

2021-12-02 The field of American Jewish studies has recently trained its focus on the transnational dimensions of its subject, reflecting in more sustained ways than before about the theories and methods of this approach. Yet, much of the insight to be gained from seeing American Jewry as constitutively entangled in many ways with other Jewries has not yet been realized. Transnational American Jewish studies are still in their infancy. This issue of PaRDeS presents current research on the multiple entanglements of American with Central European, especially German-speaking Jewries in the 19th and 20th centuries. The articles reflect the wide range of topics that can benefit from a transnational understanding of the American Jewish experience as shaped by its foreign entanglements.

Clothing Poverty Andrew Brooks 2015-02-12 'An interesting and important account.' Daily Telegraph Have you ever stopped and wondered where your jeans came from? Who made them and where? Ever wondered where they end up after you donate them for recycling? Following a pair of jeans, Clothing Poverty takes the reader on a vivid around-the-world tour to reveal how clothes are manufactured and retailed, bringing to light how fast fashion and clothing recycling are interconnected. Andrew Brooks shows how recycled clothes are traded across continents, uncovers how retailers and international charities are embroiled in commodity chains which perpetuate poverty, and exposes the hidden trade networks which transect the globe. Stitching together rich narratives, from Mozambican markets, Nigerian smugglers and Chinese factories to London's vintage clothing scene, TOMS shoes and Vivienne Westwood's ethical fashion lines, Brooks uncovers the many hidden sides of fashion.
