Disappearance of the Dowry: Women, Families, and Social Change in São Paulo, Brazil, 1600-1900 Muriel Nazzari 1991-10-01 Why did a practice that had been considered a duty stop being a duty, or, conversely, why did daughters lose the right they had previously enjoyed of receiving from their parents the wherewithal to contribute to the support of their marriage? Despite the many historical and anthropological studies about dowry, to the best of my knowledge this is the first analysis of its disappearance. My hypothesis at a general level is that the institution of dowry was among the many fetters to the development of capitalism, such as entail, monopolies, and the privileges of the nobility, of churchmen, and of army officers, that disappeared as the influence of industrial capital spread worldwide. Yet entail, monopolies, and privileges were abolished legally, whereas the dowry was not abolished legally, it disappeared in practice. Thus the question remains: what led individual families to change their customs regarding dowry? And they changed remarkably. I found that, in the seventeenth century, practically all propertied families in São Paulo endowed every one of their daughters, favoring them by giving dowries far exceeding the value of what their brothers would inherit later on. By the early nineteenth century, in contrast, long before the custom of dowry had disappeared, less than a third of the propertied families in São Paulo were endowing their daughters, and those who did gave comparatively smaller dowries, with a very different content, while some families endowed only one or two of several daughters. How to explain this transformation in customs? I will argue throughout this book that the practice of dowry altered because of changes in society, the family, and marriage. Since dowry is a transfer of property between family members, changes in the concept of property, in the way property is acquired and held, or in business practices are relevant to an understanding of change in the institution of dowry, as are changes in the function of the family in society, the way it is integrated into production, and how it supports its members. The changes experienced by Brazilian society that help explain the decline and disappearance of the dowry are many of the same transformations that have been observed in more central regions of the Western

world. Through a long process that started in the eighteenth century and continued into the early twentieth century, Brazil changed from a hierarchical, ancien régime type of society in which status, family, and patron-client relations were primary to a more individualistic society in which contract and the market increasingly reigned. A society divided vertically into family clans changed gradually into a society divided horizontally into classes. As the state grew stronger, it took over functions previously performed by the family, which in seventeenth-century São Paulo's frontier society had included municipal government and defense. Between the seventeenth and the late nineteenth centuries, a new concept of private property developed. The family changed from being the locus of both production and consumption to being principally the locus of consumption, while "family" and "business" became formally separate. The power of the larger kin declined and the conjugal family became more important, and marriage was transformed from predominantly a property matter to an avowed "love" relationship, the economic underpinnings of which were no longer made explicit. At the same time there was a change from the strong authority of the patriarch over adult sons and daughters to their greater independence, and from arranged marriages to marriages freely chosen by the bride and groom. These transformations took place in Brazil starting in the eighteenth century and continuing throughout the nineteenth century in a gradual and complex manner so that both old and new characteristics often coexisted at a given time, sometimes even within the same family. Neither a Borrower Richard A. Serrano 2017-12-02 "In his studies of borrowing from distant poetic traditions, Serrano aims to uncover the heterogeneity of influences and intentions in the most canonical of texts: "Mallarme" (1842-98), "Segalen" (1878-1919), "Wang Wei" (701-61), the "Classic of Poetry" (8th century BCE), "Buhturi" (821-97), and the "Qur'an" (7th century CE). Arguing, among other things that Mallarme was really a Chinese poet, that ancient Chinese poets discovered the workings of film imagery, and that the Qur'an's apparently disjointed narrative is profoundly lyrical, Serrano intends to overturn accepted notions of how to read individual works. He brings methodologies from the study of one literature to bear on the reading of another."

**Kiss of Death** Lauren Henderson 2011-05-10 Scarlett thought Dan McAndrew's murder was long behind her, but when she and her classmates arrive in Edinburgh for a weeklong field trip, she's startled to be joined by her old St. Tabby's cohorts--and enemies--who are visiting the area on a field trip as well. Even more startling, Callum, Dan's surviving twin, is in the area--and his cold treatment leaves Scarlett wondering what's changed, especially when a series of attacks makes her believe that someone's out to get her for her past mistakes. Would Callum ever hurt her, though? And what's Scarlett to make of her conflicting feelings for Callum, now that Jase isn't around? Even more upsetting, why is her most trusted confidante, Taylor, acting distant and dismissive?

*Hito Steyerl: I Will Survive* Hito Steyerl 2021-05-04 A massive, long-overdue retrospective on the multimedia image critique of Hito Steyerl, influential artist and author of *Duty-Free Art* and *The Wretched of the Screen*. Over the past

30 years, through video and installation, the immensely influential German artist and writer Hito Steyerl (born 1966) has been tracking the ways that images have mutated--from the analogue image and its manifold possibilities for montage to the fluidity of the split digital image--and the implications these mutations have had for the representation of wars, genocides and the flow of capital. "We are no longer dealing with the virtual but with a confusing and possibly alien concreteness that we are only beginning to understand," writes Brian Kuan Wood of the digital visual worlds that the artist presents. At nearly 500 pages, this book--the first substantial overview on Steyerl--looks at multimedia installations and film projects of the past ten years, as well as earlier works, all of which are united by the artist's unflagging interrogation of the politics of the image.

*The Rejection of Consequentialism* Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.
