Toward a Translation Criticism Antoine Berman 2009 Françoise Massardier-Kenney's translation of Antoine Berman's *Toward a Translation Criticism* makes available for the first time in the English-speaking world one of the twentieth-century's foundational texts in translation studies. Berman's book, published posthumously in France, develops an original concept of "criticism of translation" and a methodology to anchor the practice of this criticism. He demonstrates how the work of translation is a critical process as well as a creative one. Moving away from nonsystematic evaluative approaches that focus on the shortcomings of translations or the normative approaches that study the cultural and literary systems into which the translations are inserted, Berman applies the notion of ethics he developed in his earlier works, calling for a translation that is nonethnocentric and stipulating that the creativity required by translation be focused on the re-creation of the original in the other language without being over-determined by the personal poetics of the writer-translator. Berman achieves a rare combination of hermeneutic and stylistic analysis,

of commentary on the original and analysis of its translations, giving the reader access both "to the language of the original--to the way in which poetry and thought are deployed--and to the actual work of translation." *Toward a Translation Criticism* is divided into two separate but interlinked parts, each focused on one element of the ethics of translation: theory (reflection) and practice (experience). In the first part Berman presents what he calls a general "productive criticism," while in the second part he applies the general theoretical principles of this criticism to the analysis of the translations of John Donne's work into French and Spanish. The translation of Berman's text is accompanied by an introduction placing Berman's thought in its intellectual context and by supplementary notes that complete the bibliographic material presented in the French-language version. This study is essential reading for translation studies scholars, readers interested in the creative literary process, in the nature of literary criticism, and in the philosophy of language. It will also be of interest to John Donne specialists.

[The Wretched of the Earth](#) Frantz Fanon 2007-12-01 The sixtieth anniversary edition of Frantz Fanon's landmark text, now with a new introduction by Cornel West First published in 1961, and reissued in this sixtieth anniversary edition with a powerful new introduction by Cornel West, Frantz Fanon's *The Wretched of the Earth* is a masterful and timeless interrogation of race, colonialism, psychological trauma, and revolutionary struggle, and a continuing influence on movements from Black Lives Matter to decolonization. A landmark text for revolutionaries and activists, *The Wretched of the Earth* is an eternal touchstone for civil rights, anti-colonialism, psychiatric studies, and Black consciousness movements around the world. Alongside Cornel West's introduction, the book features critical essays by Jean-Paul Sartre and Homi K. Bhabha. This sixtieth anniversary edition of Fanon's most famous text stands proudly alongside such pillars of anti-colonialism and anti-racism as Edward Said's *Orientalism* and *The Autobiography of Malcolm X*.

World Development Report 2018 World Bank Group 2017-10-16 Every year, the World Bank's World Development Report (WDR) features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education's Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education's promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those

countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions. Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to reform.

Strengths-Based Nursing Care Laurie N. Gottlieb, PhD, RN 2012-08-22 This is the first practical guide for nurses on how to incorporate the knowledge, skills, and tools of Strength-Based Nursing Care (SBC) into everyday practice. The text, based on a model developed by the McGill University Nursing Program, signifies a paradigm shift from a deficit-based model to one that focuses on individual, family, and community strengths as a cornerstone of effective nursing care. The book develops the theoretical foundations underlying SBC, promotes the acquisition of fundamental skills needed for SBC practice, and offers specific strategies, techniques, and tools for identifying strengths and harnessing them to facilitate healing and health. The testimony of 46 nurses demonstrates how SBC can be effectively used in multiple settings across the lifespan.

Allegories of Reading Paul De Man 1979-01-01 This important theoretical work by Paul de Man sets forth a mode of reading and interpretation based on exemplary texts by Rousseau, Nietzsche, Rilke, and Proust. The readings start from unresolved difficulties in the critical traditions engendered by these authors, and they return to the places in the text where those difficulties are most apparent or most incisively reflected upon. The close reading leads to the elaboration of a more general model of textual understanding, in which de Man shows that the thematic aspects of the texts--their assertions of truth or falsehood as well as their assertions of values--are linked to specific modes of figuration that can be identified and described. The description of synchronic figures of substitution leads, by an inner logic embedded in the structure of all tropes, to extended, narrative figures or allegories. De Man poses the question whether such self-generating systems of figuration can account fully for the intricacies of meaning and of signification they produce. Throughout the book, issues in

contemporary criticism are addressed analytically rather than polemically. Traditional oppositions are put in question by a rhetorical analysis which demonstrates why literary texts are such powerful sources of meaning yet epistemologically so unreliable. Since the structure which underlies this tension belongs to language in general and is not confined to literary texts, the book, starting out as practical and historical criticism or as the demonstration of a theory of literary reading, leads into larger questions pertaining to the philosophy of language. "Through elaborate and elegant close readings of poems by Rilke, Proust's Remembrance, Nietzsche's philosophical writings and the major works of Rousseau, de Man concludes that all writing concerns itself with its own activity as language, and language, he says, is always unreliable, slippery, impossible....Literary narrative, because it must rely on language, tells the story of its own inability to tell a story....De Man demonstrates, beautifully and convincingly, that language turns back on itself, that rhetoric is untrustworthy."--Julia Epstein, Washington Post Book World "The study follows out of the thinking of Nietzsche and Genette (among others), yet moves in strikingly new directions....De Man's text, almost certain to be endlessly provocative, is worthy of repeated re-reading."--Ralph Flores, Library Journal "Paul de Man continues his work in the tradition of 'deconstructionist criticism, '... which] begins with the observation that all language is constructed; therefore the task of criticism is to deconstruct it and reveal what lies behind. The title of his new work reflects de Man's preoccupation with the unreliability of language. ... The contributions that the book makes, both in the initial theoretical chapters and in the detailed analyses (or deconstructions) of particular texts are undeniable."--Caroline D. Eckhardt, World Literature Today

The Re-enchantment of the World Joshua Landy 2009 The Re-Enchantment of the World is an interdisciplinary volume that challenges the long-prevailing view of modernity as "disenchanted." There is of course something to the widespread idea, so memorably put into words by Max Weber, that modernity is characterized by the "progressive disenchantment of the world." Yet what is less often recognized is the fact that a powerful counter-tendency runs alongside this one, an overwhelming urge to fill the vacuum left by departed convictions, and to do so without invoking superseded belief systems. In fact, modernity produces an array of strategies for re-enchantment, each fully compatible with secular rationality. It has to, because God has many "aspects"—or to put it in more secular terms, because traditional religion offers so much in so many domains. From one thinker to the next, the question of just what, in religious enchantment, needs to be replaced in a secular world receives an entirely different answer. Now, for the first time, many of these strategies are laid out in a single volume, with contributions by specialists in literature, history, and philosophy.

The Planetarium Nathalie Sarraute 2005 A young writer has his heart and ambition set on his aunt's large apartment. With this seemingly simple conceit, the characters of The Planetarium are set in orbit and a galaxy of argument, resentment, and bitterness erupts. Telling the story from various points of view, Sarraute focuses below the surface, on the emotional lives of the characters in a way that surpasses what Virginia Woolf did years before. The spite the young man feels toward his mother-in-law for offering him and his wife cheap chairs for their apartment; the terror inspired during a confrontation with his aunt; and the need to impress his Gertrude Stein-like literary icon are only some of the many internal conflicts that push the narrative forward, as the characters circle each other. Always deeply engaging, The Planetarium reveals the deep disparity between the way we see

ourselves and the way others see us.
