Selected Scientific Papers of Alfred Landé P. Barut 2012-12-06 Theoretical physicists allover the world are acquainted with Lande's celebrated computation of the g factor or splitting factor or, more precisely, the magne togyric factor. The so-called anomalous Zeeman effect had intrigued, if not vexed, some of the most distinguished physicists of that time, such as Bohr, Sommerfeld, Pauli, and others. Lande realized that this recalcitrant effect was inseparable from the multiplet line structure - a breakthrough in understanding which he achieved in 1922 at the age of thirty four. It was in the same year that Lande discovered the interval rule for the separation of multiplet sublevels, a significant result that holds in all cases of Russell-Saunders coupling and renders comparatively easy the empirical analysis of spectral multiplets. In the twenties, Lande succeeded in constructing some original concepts of axiomatic thermodynamics by employing Caratheodory's somewhat esoteric approach as his guiding concept. Published in the Handbuch der Physik, his comprehensive treatise, evincing several novel ideas, has become a classic. Lande, Sommerfeld's student though never a true disciple, published two monographs on quantum mechanics that are remarkable for their content and exposition. In this connection it may be apposite to stress that Lande had sub scribed for many years to the (infelicitously named) Copenhagen interpretation.

[Business Plans For Dummies](#) Paul Tiffany 2004-12-31 Whether you're launching a new business or working to strengthen or expand an established one, a business plan is your road map to success Would you take off on a road trip to a new destination without a map or good directions? Probably not. Yet sometimes business owners go full speed ahead without objectives, a mission, or even a destination in mind, much less a map showing them how to get there. That's why so many businesses have difficulty making it - and unfortunately, several don't - in today's competitive marketplace. Business Plans For Dummies helps you start a new business with clear goals and a path forward to reach those goals. If you already have a business, this no-nonsense and comprehensive guide can help you realistically determine where your business is and where you want to take it. You'll learn to: Create a detailed business plan Put that plan into action (instead of in a drawer) Use the plan to secure financing Prepare for opportunities Avoid common pitfalls In short, Business Plans For Dummies helps you create a map to help you take your business where you want it to go. You'll discover how to: Identify and approach potential financial backers, including venture capital firms, angels, bankers, and others Clarify and crystallize your company's mission, vision, and values Analyze your industry and your competition Identify your customers, including their needs, habits, purchase triggers, and decision-making processes Objectively analyze your company's strengths and weaknesses Analyze your financial

Dictionary of Louisiana French Albert Valdman 2009 The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information available for each entry. Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane .

Risk Communication for the Future Mathilde Bourrier 2018-06-27 The conventional approach to risk communication, based on a centralized and controlled model, has led to blatant failures in the management of recent safety related events. In parallel, several cases have proved that actors not thought of as risk governance or safety management contributors may play a positive role regarding safety. Building on these two observations and bridging the gap between risk communication and safety practices leads to a new, more societal perspective on risk communication, that allows for smart risk governance and safety management. Réussir sa création d'entreprise sans business plan Louis Jacques Filion 2012-11-08 "Nous n'avons pas de plan à cinq ans, ni à deux ans, pas plus à un an. Nous avons une mission et une stratégie. La mission est d'organiser l'information du monde. La stratégie est de le faire à travers l'innovation." Eric Schmidt - P-DG de Google "L'instinct, le courage et la créativité de l'entrepreneur ne sont pas quantifiables dans un business plan. Imagination, action, incarnation, voilà les variables fondamentales qu'aucun curseur ne peut modifier." Jacques-Antoine Granjon - P-DG et fondateur de vente-privee.com

Avec un million d'entrepreneurs de plus, en moins de trois ans, la France a rattrapé une densité entrepreneuriale présente à l'international. Pourtant, les créateurs d'entreprise ont de grandes réticences à se lancer, tant le processus leur paraît complexe. D'ailleurs, les plus grands succès viennent des entrepreneurs qui maîtrisent avec brio la conception d'opportunité et qui n'ont pas forcément bâti un business plan. Dans cet ouvrage, un ensemble d'outils sont mis à la disposition du créateur pour l'aider dans sa démarche et le conduire vers le succès. Les approches suggérées font appel autant à ses capacités créatives qu'analytiques pour transformer la compréhension des besoins du marché en opportunités d'affaires. Dans cette perspective, l'approche SynOpp suggère une démarche innovante pour soutenir la création d'opportunité du futur entrepreneur, tandis que l'approche IDÉO offre des paramètres structurants pour l'aider à définir des scénarios pour passer à l'action. L'ouvrage propose une vision globale des actions à mener. Il a été conçu comme un fil conducteur qui offre au créateur des repères pour ses prises de décision. Il favorise l'organisation cohérente de ses activités, en fonction de l'avenir qu'il souhaite construire. Ont collaboré à cet ouvrage : Franck Barès (HEC Montréal), Jean-Pierre Bécharde (HEC Montréal), Cândido Borges (Universidade Federale de Goias), Denis Grégoire (Syracuse University), Julien Husson (université de Lorraine), Edmilson Lima (Universidade Nove de Julho, São Paulo), Marie-Ange Masson (HEC Montréal), Sybil Persson (ICN Business School, Nancy), Patrick Valéau (université de la Réunion). Ce livre a été retenu dans la liste des ouvrages en sciences de gestion labellisés en 2014 par le Collège de Labellisation de la FNEGE.

Intelligent Tutoring Systems Claude Frasson 1992-05-27 This volume of the Encyclopaedia offers a systematic introduction and a comprehensive survey of the theory of complex spaces. It covers topics like semi-normal complex spaces, cohomology, the Levi problem, q -convexity and q -concavity. It is the first survey of this kind. The authors are internationally known outstanding experts who developed substantial parts of the field. The book contains seven chapters and an introduction written by Remmert, describing the history of the subject. The book will be very useful to graduate students and researchers in complex analysis, algebraic geometry and differential geometry. Another group of readers will consist of mathematical physicists who apply results from these fields.

Each edition has introduced cutting-edge firsts while ensuring the underlying principles that guided its creation, Doing the Basics Best, were retained. The seventh edition focuses on three simple rules- Learn, Evaluate, Apply. - NEW- Chapter 2: Understanding the Environments of Business - This new chapter puts business operations in contemporary context, explaining the idea of organizational boundaries and describing the ways in which elements from multiple environments cross those boundaries and shape organizational activities. This chapter sets the stage as an introduction to some of the most important topics covered in the rest of the book, for example: - The Economics Environment includes the role of aggregate output, standard of living, real growth rate; GDP per capita; real GDP; purchasing power parity; and the Consumer Price Index. - The Technology Environment includes special attention to new tools for competitiveness in both goods and services and business process technologies, plus e

Electromagnetic Fields in Mechatronics, Electrical and Electronic Engineering Andrzej Krawczyk 2006 More and more researchers engage into investigation of electromagnetic applications, especially these connected with mechatronics, information technologies, medicine, biology and material sciences. It is readily seen when looking at the content of the book that computational techniques, which were under development during the last three decades and are still being developed, serve as good tools for discovering new electromagnetic phenomena. It means that the field of computational electromagnetics belongs to an application area rather than to a research area. This publication aims at joining theory and practice, thus the majority of papers are deeply rooted in engineering problems, being simultaneously of high theoretical level. The editors hope to touch the heart of the matter in electromagnetism. The book focuses on the following issues: Computational Electromagnetics; Electromagnetic Engineering; Coupled Field and Special Applications; Micro- and Special Devices; Bioelectromagnetics and Electromagnetic Hazard; and Magnetic Material Modelling.
