Museums in the German Art World James J. Sheehan 2000-10-26 Combining the history of ideas, institutions, and architecture, this study shows how the museum both reflected and shaped the place of art in German culture from the late eighteenth century to the early twentieth century. On a broader level, it illuminates the origin and character of the museum's central role in modern culture. James Sheehan begins by describing the establishment of the first public galleries during the last decades of Germany's old regime. He then examines the revolutionary upheaval that swept Germany between 1789 and 1815, arguing that the first great German museums reflected the nation's revolutionary aspirations. By the mid-nineteenth century, the climate had changed; museums constructed in this period affirmed historical continuities and celebrated political accomplishments. During the next several years, however, Germans became disillusioned with conventional definitions of art and lost interest in monumental museums. By the turn of the century, the museum had become a site for the political and cultural controversies caused by the rise of artistic modernism. In this context, Sheehan argues, we can see the first signs of what would become the modern style of museum architecture and modes of display. The first study of its kind, this highly accessible book will appeal to historians, museum professionals, and anyone interested in the relationship between art, politics, and culture.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Winter Birds Lars Jonsson 2017-10-19 In this stunning book, Lars Jonsson celebrates and explores the beauty of the birds that surround him during the Swedish winter months. Inspired by the desolate, wintry landscapes, the dazzling light and the stark contrast of colours he observes against the snow, Jonsson has created an unparalleled collection of art. Jonsson illustrates each bird in his classic style, and his text provides information on their behaviour and insights into how to identify them as he shares personal observations as both an artist and ornithologist. This unique combination offers an intimate and compelling opportunity to better understand the method behind one of the world's preeminent bird artists.

The Mind of Thucydides Jacqueline de Romilly 2017-12-15 The publication of Jacqueline de Romilly's *Histoire et raison chez Thucydide* in 1956 virtually transformed scholarship on Thucydides. Rather than mining *The Peloponnesian War* to speculate on its layers of composition or second-guess its accuracy, it treated it as a work of art deserving rhetorical and aesthetic analysis. Ahead of its time in its sophisticated focus upon the verbal texture of narrative, it proved that a literary approach offered the most productive and nuanced way to study Thucydides. Still in print in the original French, the book has influenced numerous Classicists and historians, and is now available in English for the first time in a careful translation by Elizabeth Trapnell Rawlings. The Cornell edition includes an introduction by Hunter R. Rawlings III and Jeffrey Rusten tracing the context of this book's original publication and its continuing influence on the study of Thucydides. Romilly shows that Thucydides constructs his account of the Peloponnesian War as a profoundly intellectual experience for readers who want to discern the patterns underlying historical events. Employing a commanding logic that exercises total control over the data of history, Thucydides uses rigorous principles of selection, suggestive juxtapositions, and artfully opposed speeches to reveal systematic relationships between plans and outcomes, impose meaning on the smallest events, and insist on the constant battle between intellect and chance. Thucydides' mind found in unity and coherence its ideal of historical truth.

Cultivating Commerce Sarah Easterby-Smith 2017-11-30 Sarah Easterby-Smith rewrites the histories of botany and horticulture from the perspectives of plant merchants who sold botanical specimens in the decades around 1800. These merchants were not professional botanists, nor were they the social equals of refined amateurs of botany. Nevertheless, they participated in Enlightenment scholarly networks, acting as intermediaries who communicated information and specimens. Thanks to their practical expertise, they also became sources of new knowledge in their own right. *Cultivating Commerce* argues that these merchants made essential contributions to botanical history, although their relatively humble status means that their contributions have received little sustained attention to date. Exploring how the expert nurseryman emerged as a new social figure in Britain and France, and examining what happened to the elitist, masculine culture of amateur botany when confronted by expanding public participation, Easterby-Smith sheds fresh light on the evolution of transnational Enlightenment networks during the Age of Revolutions.

Covering many key sociological thinkers and theorists, the book examines the problems of theorising issues such as modernity and mass culture.

The Emancipated Spectator Jacques Rancière 2014-04-08 The theorists of art and film commonly depict the modern audience as aesthetically and politically passive. In response, both artists and thinkers have sought to transform the spectator into an active agent and the spectacle into a communal performance. In this follow-up to the acclaimed *The Future of the Image*, Rancière takes a radically different approach to this attempted emancipation. First asking exactly what we mean by political art or

the politics of art, he goes on to look at what the tradition of critical art, and the desire to insert art into life, has achieved. Has the militant critique of the consumption of images and commodities become, ironically, a sad affirmation of its omnipotence?

Material Histories of Time Gianenrico Bernasconi 2019-11-18 The historiography of timekeeping is traditionally characterized by a dichotomy between research that investigates the evolution of technical devices on the one hand, and research that is concerned with the examination of the cultures and uses of time on the other hand. *Material Histories of Time* opens a dialogue between these two approaches by taking monumental clocks, table clocks, portable watches, carriage clocks, and other forms of timekeeping as the starting point of a joint reflection of specialists of the history of horology together with scholars studying the social and cultural history of time. The contributions range from the apparition of the first timekeeping mechanical systems in the Middle Ages to the first evidence of industrialization in the 18th and 19th centuries.

Memoirs of an Egotist Stendhal 2021-03-22 This book contains the memoirs of Stendahl or in his own words the 'chatter about his private life' between 1821 and 1830. It was between these dates that he moved to Paris and here looks back on his life as an eccentric bachelor. 'As well as Beyle the clairvoyant self-investigator, the sardonic analyst of Parisian salon society and deliberate cultivator of wit, here emerges Beyle the despairing lover, the shakespearean enthusiast, whose romantic sentiment runs always parallel with his eighteenth-century logic'. Marie-Henri Beyle - better-known by his pen name, Stendhal - was born in Grenoble, France in 1783. He turned to writing after the final defeat of Napoleon in 1815, notable works include *A Life of Rossini* (1824), *A Life of Napoleon* (1829) and *The Red and the Black* published in 1830. A number of works were published posthumously, including *Lamuel* (1889), *Memoirs of an Egotist* (1892) and *Lucien Leuwen* (1894). Stendhal is now regarded as one of the earliest and foremost practitioners of literary realism.

Bani Surmah E. Haerinck 2006 This volume presents the final report of the excavations at the Bani Surmah graveyard in Pusht-i Kuh Luristan, Iran, by Ghent University and the Royal Museums of Art and History, Brussels. The Excavations, directed by Louis Vanden Berghe, were conducted in 1966 and 1967. Thirty-seven tombs made of stone boulders were excavated. Some were small and measured between two and four meters in length. Most, however, were much larger and measured ten meters or more in length. Most tombs were collective and were used by several generations. The burial goods cover almost the whole third millennium. Bani Surmah is located in the sub-region I of the Pusht-i Kuh, which is the closest to Mesopotamia. Many of the objects found in the tombs, such as common and painted pottery, seals and metalwork are of Mesopotamian origin. The close ties of this region with Mesopotamia raise some questions about the historical geography. Also the way of life and subsistence of past population groups in Pusht-i Kuh are considered. All the finds are illustrated in line drawings, the tombs and most

objects also in photo.

Objects of Culture H. Glenn Penny 2003-10-16 In the late nineteenth century, Germans spearheaded a worldwide effort to preserve the material traces of humanity, designing major ethnographic museums and building extensive networks of communication and exchange across the globe. In this groundbreaking study, Glenn Penny explores the appeal of ethnology in Imperial Germany and analyzes the motivations of the scientists who created the ethnographic museums. Penny shows that German ethnologists were not driven by imperialist desires or an interest in legitimating putative biological or racial hierarchies. Overwhelmingly antiracist, they aspired to generate theories about the essential nature of human beings through their museums' collections. They gained support in their efforts from boosters who were enticed by participating in this international science and who used it to promote the cosmopolitan character of their cities and themselves. But these cosmopolitan ideals were eventually overshadowed by the scientists' more modern, professional, and materialist concerns, which dramatically altered the science and its goals. By clarifying German ethnologists' aspirations and focusing on the market and conflicting interest groups, Penny makes important contributions to German history, the history of science, and museum studies.
