Silent Hill Bernard Perron 2012-01-03 Silent Hill: The Terror Engine, the second of the two inaugural studies in the Landmark Video Games series from series editors Mark J. P. Wolf and Bernard Perron, is both a close analysis of the first three Silent Hill games and a general look at the whole series. Silent Hill, with its first title released in 1999, is one of the most influential of the horror video game series. Perron situates the games within the survival horror genre, both by looking at the history of the genre and by comparing Silent Hill with such important forerunners as Alone in the Dark and Resident Evil. Taking a transmedia approach and underlining the designer's cinematic and literary influences, he uses the narrative structure; the techniques of imagery, sound, and music employed; the game mechanics; and the fiction, artifact, and gameplay emotions elicited by the games to explore the specific fears survival horror games are designed to provoke and how the experience as a whole has made the Silent Hill series one of the major landmarks of video game history.

A Forest Journey: The Story of Wood and Civilization John Perlin 2005-09-20 A contemporary view of the effects of wood, as used for building and fuel, and of deforestation on the development of civilization. Until the ascendancy of fossil fuels, wood has been the principal fuel and building material from the dawn of civilization. Its abundance or scarcity greatly shaped, as *A Forest Journey* ably relates, the culture, demographics, economy, internal and external politics, and technology of successive societies over the millennia. The book's comprehensive coverage of the major role forests have played in human life--told with grace, fluency, imagination, and humor—gained it recognition as a Harvard Classic in Science and World History and as one of Harvard's "One-Hundred Great Books." Others receiving the honor include such luminaries as Stephen Jay Gould and E. O. Wilson. This new paperback edition will add a prologue and an epilogue to reflect the current situation in which forests have become imperative for humanity's survival.

A Very Fine House Rose Molina 2021-12 When Letty Marquez discovers an elegant-but-decrepit Victorian mansion not far from school, she and her friends decide to keep it a secret and make it their

own. As the Vietnam war escalates, the nation reels from protests, riots, and a drug epidemic. Letty and her friends pit themselves against forces that want the land beneath the house. At the same time, boys, friends, and permissive American culture constantly clash with Letty's Mexican upbringing and her Catholic religion. In *A Very Fine House* by Rose Molina, we experience the turmoil of an era where political awareness and social change engulf the lives of young people struggling to come of age. Interwoven in this difficult phase of life, culture clashes exacerbate the struggle in the search for an identity. The story sheds light on these complex issues with both humor and warmth.

Signals of Distress Jim Crace 2008-09-04 November 1836, and Aylmer Smith is making the voyage from his London home to coastal Wherrytown to deliver bad news. Screen Consciousness Robert Pepperell 2006-01 This collection of essays is driven by the question of how we know what we know, and in particular how we can be certain about something even when we know it is an illusion. The contention of the book is that this age-old question has acquired a new urgency as certain trends in science, technology and ideas have taken the discussion of consciousness out of the philosophy department and deposited it in the world at large. As a consequence, a body of literature from many fields has produced its own sets of concerns and methods under the rubric of Consciousness Studies. Each contribution in this collection deals with issues and questions that lots of people have been thinking about for many years in many different contexts, things such as the nature of film, cinema, world, mind and so on. Those of us fascinated by these diverse yet related issues may have often felt we were working in a disciplinary no-man's-land. Now suddenly, it seems with Consciousness Studies we have a coherent intellectual home - albeit one that is self-consciously eclectic. The essays included in *Screen Consciousness: Cinema, Mind and World* are from a range of disciplines — art, philosophy, film theory, anthropology and technology studies — each represented by significant international figures, and each concerned with how their field is being transformed by the new discipline of Consciousness Studies. Together they attempt to reconcile the oncoming rush of new data from science and technology about how we know what we know, with the insights gained from the long view of history, philosophy and art. Each of the contributions seeks to interpose Consciousness Studies

between film and mind, where for cultural theorists psychoanalysis had traditionally stood. This is more than simply updating Film Studies or nodding in the direction of cognitive film theory. Film, with all its sentient, sensuous and social qualities, is a common reference point between all these forces, and Consciousness Studies provides the intellectual impetus for this book to revisit familiar problems with fresh insight.

The End We Start From Megan Hunter 2017-11-07 The universally acclaimed debut novel. "Extraordinary . . . a spare, futuristic fable about a brand-new mother navigating a flooded world."—Vogue.com Pre-empted by publishers around the world within days of the 2016 London Book Fair, *The End We Start From* heralds the arrival of Megan Hunter, a dazzling and unique literary talent. Hunter's debut is a searing original, a modern-day parable of rebirth and renewal, of maternal bonds, and the instinct to survive and thrive in the absence of all that's familiar. As London is submerged below flood waters, a woman gives birth to her first child, Z. Days later, she and her baby are forced to leave their home in search of safety. They head north through a newly dangerous country seeking refuge from place to place, shelter to shelter, to a desolate island and back again. The story traces fear and wonder, as the baby's small fists grasp at the first colors he sees, as he grows and stretches, thriving and content against all the odds. Written with poise and poeticism, *The End We Start From* is an indelible and elemental first book—a lyrical vision of the strangeness and beauty of new motherhood, and a portentous tale of endurance in the face of ungovernable change. "Strange and powerful, and very apt for these uncertain times. I was moved, terrified, uplifted—sometimes all three at once. It takes skill to manage that, and Hunter has a poet's understanding of how to make each word count."—Tracy Chevalier, New York Times bestselling author of *The Girl with a Pearl Earring*

Artful Ali Smith 2013-01-29 The incomparable Ali Smith melds the tale and the essay into a magical hybrid form, a song of praise to the power of stories in our lives In February 2012, Ali Smith delivered the Weidenfeld lectures on European comparative literature at St. Anne's College, Oxford. Her lectures took the shape of this set of discursive stories. Refusing to be tied down to either fiction or the essay form, Smith narrates *Artful* through a character who is haunted—literally—by a former lover, the writer of a series of lectures about art and literature. A hypnotic dialogue unfolds, a duet between and a meditation on art and storytelling, a book about love, grief, memory, and revitalization. Smith's heady powers as a fiction writer harmonize with her keen perceptions as a reader and critic to form a living thing that reminds us that life and art are never separate. *Artful* is a book about the things art can do, the things art is full of, and the quicksilver nature of all artfulness. It glances off artists and writers

from Michelangelo through Dickens then all the way past postmodernity, exploring every form from ancient cave painting to 1960s cinema musicals. Artful is a celebration of literature's worth in and to the world and a meaningful contribution to that worth in itself. There has never been a book quite like it.

You're privy to the dining-hall conversations at the world's greatest research institutions. Villani shares his favorite songs, his love of manga, and the imaginative stories he tells his children.
