Corpus Linguistics 2009-01-01 Throughout history, linguists and literary scholars have been impelled by curiosity about particular linguistic or literary phenomena to seek to observe them in action in original texts. The fruits of each earlier enquiry in turn nourish the desire to continue to acquire knowledge, through further observation of newer linguistic facts. As time goes by, the corpus linguist operates increasingly in the awareness of what has gone before. Corpus Linguistics, thirty years on, is less an innocent sortie into corpus territory on the basis of a hunch than an informed, critical reassessment of existing analytical orthodoxy, in the light of new data coming on stream. This volume comprises twenty-two articles penned by members of the ICAME (International Computer Archive of Modern and Mediaeval English) association, which together provide a critical and informed reappraisal of the facts, data, methods and tools of Corpus Linguistics which are available today. Authors reconsider the boundaries of the discipline, exploring its areas of commonality with Sociolinguistics, Language Variation, Discourse Linguistics, and Lexical Statistics and showing how that commonality is potentially of immense benefit to practitioners in the fields concerned. The volume culminates in the report of a timely and novel expert panel discussion on the role of Corpus Linguistics in the study of English as a global language. This encompasses issues such as English as an international lingua franca, 'norms' for global English, and the question of 'ownership', or who qualifies as a native speaker.

Victor Hugo: Les Misérables (English Edition) Victor Hugo 2018-12-17 "A quarter of a league further on, he arrived at the bottom of a little valley, where there is water which passes beneath an arch made through the embankment of the road. The clump of sparsely planted but very green trees, which fills the valley on one side of the road, is dispersed over the meadows on the other, and disappears gracefully and as in order in the direction of Braine-l'Alleud. On the right, close to the road, was an inn, with a four-wheeled cart at the door, a large bundle of hop-poles, a plough, a heap of dried brushwood near a flourishing hedge, lime smoking in a square hole, and a ladder suspended along an old penthouse with straw partitions. A young girl was weeding in a field, where a huge yellow poster, probably of some outside spectacle, such as a parish festival, was fluttering in the wind. At one corner of the inn, beside a pool in which a flotilla of ducks was navigating, a badly paved path plunged into the bushes. The wayfarer struck into this." "Les Misérables" by Victor Hugo is one of the greatest novels of the 19th century. It was first published in 1862. "Les Misérables" elaborates upon the history of France, the architecture and urban design of Paris, politics, and moral philosophy,

The Beautiful and Damned (English Edition) F. Scott Fitzgerald 2018-11-10 "In 1913, when Anthony Patch was twenty-five, two years were already gone since irony, the Holy Ghost of this later day, had, theoretically at least, descended upon him. Irony was the final polish of the shoe, the ultimate dab of the clothes-brush, a sort of intellectual "There!"—yet at the brink of this story he has as yet gone no further than the conscious stage. As you first see him he wonders frequently whether he is not without honor and slightly mad, a shameful and obscene thinness glistening on the surface of the world like oil on a clean pond, these occasions being varied, of course, with those in which he thinks himself rather an exceptional young man, thoroughly sophisticated, well

Gastrophysics Charles Spence 2018-07-03 The science behind a good meal: all the sounds, sights, and tastes that make us like what we're eating—and want to eat more. Why do we consume 35 percent more food when eating with one other person, and 75 percent more when dining with three? How do we explain the fact that people who like strong coffee drink more of it under bright lighting? And why does green ketchup just not work? The answer is gastrophysics, the new area of sensory science pioneered by Oxford professor Charles Spence. Now he's stepping out of his lab to lift the lid on the entire eating experience—how the taste, the aroma, and our overall enjoyment of food are influenced by all of our senses, as well as by our mood and expectations. The pleasures of food lie mostly in the mind, not in the mouth. Get that straight and you can start to understand what really makes food enjoyable, stimulating, and, most important, memorable. Spence reveals in amusing detail the importance of all the "off the plate" elements of a meal: the weight of cutlery, the color of the plate, the background music, and much more. Whether we're dining alone or at a dinner party, on a plane or in front of the TV, he reveals how to understand what we're tasting and influence what others experience. This is accessible science at its best, fascinating to anyone in possession of an appetite. Crammed with discoveries about our everyday sensory lives, *Gastrophysics* is a book guaranteed to make you look at your plate in a whole new way.

Escaping the Time Crunch Mark Littleton 1990 *Escaping the Time Crunch* is not just another time management book. Mark Littleton cuts directly to the heart of the conflict busy Christians face as they try to carry out the seemingly contradictory commands "Be still and know that I am God" (Psalm 46:10) and "Make the most of every opportunity" (Colossians 4:5). He challenges us to take a fresh look at our priorities and commitments at home, in the work place, and in the church.

throughout government and influenced the transition of our society to liberal mores, which had been fermenting since the San Francisco hippies of the early 1940s. With the unprecedented election of Trump, progressive Democrats were marginalized, hindering their indicated goal following installing some form of government apart from our Constitution. Crunch Time to Save Our Constitution traces the accomplishments of the Trump administration, irrespective of Democrat obstructionist stratagem--unjustified Mueller investigation, prolonging the Kavanaugh Supreme Court appointment--to deter President Trump from executing his statutory role, and why Democrats are compelled to continue and expand such tactics. This once great united nation has purposefully and effectively been divided in a manner that places conservatives and liberals on a course to revolution to satiate the thirst for political power. This political theater is displayed to a naive public subject to managed news, unperceiving of the internal threats to our republican form of government. Crunch Time to Save Our Constitution unmasks the true forces that are competing for political control of our government and the prime internal threats to our nation's security. Crunch Time to Save Our Constitution provides bold actions to reunite our people, avoid a conflict among neighbors, and return to our Constitution and its values as our Founding Fathers intended.

Word by Word Kory Stamper 2017-03-14 "We think of English as a fortress to be defended, but a better analogy is to think of English as a child. We love and nurture it into being, and once it gains gross motor skills, it starts going exactly where we don't want it to go: it heads right for the goddamned electrical sockets." With wit and irreverence, lexicographer Kory Stamper cracks open the obsessive world of dictionary writing, from the agonizing decisions about what to define and how to do it to the knotty questions of ever-changing word usage. Filled with fun facts—for example, the first documented usage of "OMG" was in a letter to Winston Churchill—and Stamper's own stories from the linguistic front lines (including how she became America's foremost "irregardless" apologist, despite loathing the word), *Word by Word* is an endlessly entertaining look at the wonderful complexities and eccentricities of the English language.

This is accomplished by a close reading of Blake's poetry, which examines in detail the subjects of religion, sex, and the attempted colonization of Africa by a Swedenborgian utopian group.

STRUKTURAL 2020 Nina Setyaningsih 2021-09-10 We proudly present the proceedings of 2nd International Seminar on Translation Studies, Applied Linguistics, Literature and Cultural Studies 2020 (STRUKTURAL 2020). It focuses on how disruptive era influences participants field of researches, especially in

Humanities and Social Studies. As we know, the world today is changing and the world we are facing now is the one where everything is connected. Not only are our PCs, our tablets, our hand phones, and other devices connected but everything that happens in societies is also now “connected”. Today, even a robbery incident in a small village has a possibility to make a city in another part of the world collapse. This butterfly effect of social change may also give a big impact in our understanding and our field of study of social sciences and humanities. More than 70 manuscripts were presented at this conference with around 41 of them selected to be published in proceedings. We hope by this conference, discussions on how research on humanities and social studies is possible in a disruptive era will give a perspective for the social and humanities studies development.

Food Policy and the Environmental Credit Crunch Julie Hudson 2013-09-11 The changing economic environment for the consumer that is emerging from the wreckage of the financial credit crunch plays directly into the importance of food spending. This is certainly true from the perspective of food prices in the short run, but also from the perspective of sustainability and reducing the impact of the environmental credit crunch. The economic changes we experience now have a bearing on our ability to manage the environmental credit crunch that looms. *Food Policy and the Environmental Credit Crunch: From Soup to Nuts* elaborates on the issues addressed in the authors' first book, *From Red to Green?*, and asks whether the financial credit crunch could ameliorate or exacerbate the emergent environmental credit crunch. The conclusion drawn here is that a significant and positive difference could be made by changing some of the ways in which we procure, prepare, and consume our food. Written by an economist and an investment professional, this book addresses the economic and environmental implications of how we treat food. The book examines each aspect of the 'food chain', from agriculture, to production and processing, retail, preparation, consumption and waste.
