Henry Drax is a harpooner on the Volunteer, a Yorkshire whaler bound for the rich hunting waters of the arctic circle. Also aboard for the first time is Patrick Sumner, an ex-army surgeon with a shattered reputation, no money, and no better option than to sail as the ship's medic on this violent, filthy, and ill-fated voyage. In India, during the Siege of Delhi, Sumner thought he had experienced the depths to which man can stoop. He had hoped to find temporary respite on the Volunteer, but rest proves impossible with Drax on board. The discovery of something evil in the hold rouses Sumner to action. And as the confrontation between the two men plays out amid the freezing darkness of an arctic winter, the fateful question arises: who will survive until spring? With savage, unstoppable momentum and the blackest wit, Ian McGuire's *The North Water* weaves a superlative story of humanity under the most extreme conditions.

The Queen of Katwe Tim Crothers 2012-10-09 Now a major motion picture starring Academy Award winner Lupita Nyong'o and David Oyelowo, directed by Mira Nair. The "astonishing" (The New York Times Book Review) and "inspirational" (Shelf Awareness) true story of Phiona Mutesi—a teenage chess prodigy from the slums of Uganda. One day in 2005 while searching for food, nine-year-old Ugandan Phiona Mutesi followed her brother to a dusty veranda where she met Robert Katende. Katende, a war refugee turned missionary, had an improbable dream: to empower kids in the Katwe slum through chess—a game so foreign there is no word for it in their native language. Laying a chessboard in the dirt, Robert began to teach. At first children came for a free bowl of porridge, but many grew to love the game that—like their daily lives—requires persevering against great obstacles. Of these kids, one girl stood out as an immense talent: Phiona. By the age of eleven Phiona was her country's junior champion, and at fifteen,

the national champion. Now a Woman Candidate Master—the first female titled player in her country's history—Phiona dreams of becoming a Grandmaster, the most elite level in chess. But to reach that goal, she must grapple with everyday life in one of the world's most unstable countries. The Queen of Katwe is a “remarkable” (NPR) and “riveting” (New York Post) book that shows how “Phiona's story transcends the limitations of the chessboard” (Robert Hess, US Grandmaster).

Chess Opening Workbook for Kids Graham Burgess 2019-11-15 This is a book for those who want to start their chess games purposefully and take full advantage of their opponents' mistakes. It is vital to

start a chess game well. Each move needs to be useful and precise. The best way to develop the necessary know-how is by experience and practice, rather than rote learning of 'rules' and principles. It's all about the specifics and being alert to what the opponent is doing, and pouncing on any errors. Chess Opening Workbook for Kids is the second in a new series of books that help players gain chess skills by tackling hundreds of carefully chosen exercises. The themes are similar to those in Gambit's best-selling 'Chess for Kids' series, but the focus is on getting hands-on experience. Many positions build on ones given earlier, showing how advanced ideas are normally made up of simpler ones that we can all grasp. Each chapter is focused on a particular theme and features dozens of exercises, with solutions that highlight the main strategic and tactical points. Each chapter offers tips on opening play, such as how to detect weaknesses and poorly-placed pieces. Later chapters address key aspects of opening strategy such as the centre, development and castling. The book ends with a series of seven graded tests where you are given few clues about the themes involved. Award-winning author Graham Burgess has written 27 chess books, including two on opening play for the 'Chess for Kids' series. He is a FIDE Master and a former champion of the Danish region of Funen. In 1994 he set a world record for marathon blitz chess playing and won the British Chess Federation Book of the Year Award in 1997.

My System Aron Nimzowitsch 2007-01-01 For the first time, an English-speaking audience can ap-

precipitate the true nature of this famous, classic chess book as this brand-new translation recreates the authors original intention. Not to have read My System is regarded as a shocking gap in a chess players education, but English speakers had only poor translations that toned down or even deleted many passages because the translators feared Nimzowitschs famous biting wit would be controversial. Nimzowitschs ideas about how to play better chess have had a profound influence on modern chess thinking. It is commonly agreed that almost every chess master in the world has studied Nimzowitschs work. This is the first new English translation in decades. This is the first new English translation in decades and, unlike previous translations, does not censor or dilute the authors writing.

Chess Opening Traps for Kids Graham Burgess 2018-11 Chess becomes fun when we learn how to survive the opening and stop falling into our opponents' cheap tactical tricks. And that's what this book is about! By understanding opening play and how to exploit tactical ideas, we turn the tables on our opponents. Now they will be the ones getting outmanoeuvred, tricked, trapped and pushed off the board! Chess Opening Traps for Kids is a serious course on how to play the opening, illustrated with memorable and entertaining examples. By focusing on 100 key themes, Graham Burgess explains how to use opening tricks to our advantage. Every opening features hidden dangers for both players, so we need to avoid pitfalls while making full use of tactics to achieve the opening goals of purposeful development and central control. Most of the 100 sections feature a basic example followed by a more complex one. Some of the traps have claimed grandmaster victims, while others are more likely to arise in junior chess. Either way, the aim is to learn the theme so well that you can use it when similar opportunities arise in your own games. A series of exercises at the end of the book allows you to check that you have grasped the main points. Throughout the book there are tips on how to spot tactics in advance and advice on opening strategy. Award-winning author Graham Burgess has written 25 chess books, ranging from general guides to works on specific openings. He is a FIDE Master and a former champion of the Danish region of Funen. Pier Paolo Pasolini Naomi Greene 2017-03-14 The major Italian filmmaker Pier Paolo Pasolini was also a poet, novelist, essayist, and iconoclastic political commentator. Naomi Greene reveals to English-speaking readers the diverse talents that made him one of the most controversial European intellectuals of the postwar era, at the center of political and cultural debates still vital to our time. Greene presents Pasolini's films to the English-speaking world in full detail and in a rich critical context, using them to trace the evolution of his ideas and the details of his troubled personal life from 1950, when he settled in Rome, to 1975, the year of his brutal murder, apparently at the hands of a young male prostitute. "In her

concise and sympathetic book, Greene intelligently explicates the political and social context within which Pasolini became both a leading figure and a significant heretic. He was an atheist who directed one of the few genuinely profound biblical films in the cinema, a communist who severely criticized many of the radical movements of modern Italy. Though he publicly acknowledged his homosexuality, he privately referred to it as his "sickness." As the book well documents, Pasolini was not a rebel but rather an authentic heretic who worked in contradiction to both his medium and milieu."--Choice Originally published in 1990. The Quotable Feynman Richard P. Feynman 2015-09-29 A treasure-trove of illuminating and entertaining quotations from beloved physicist Richard P. Feynman "Some people say, 'How can you live without knowing?' I do not know what they mean. I always live without knowing. That is easy. How you get to know is what I want to know."—Richard P. Feynman Nobel Prize-winning physicist Richard P. Feynman (1918–88) was that rarest of creatures—a towering scientific genius who could make himself understood by anyone and who became as famous for the wit and wisdom of his popular lectures and writings as for his fundamental contributions to science. The Quotable Feynman is a treasure-trove of this revered and beloved scientist's most profound, provocative, humorous, and memorable quotations on a wide range of subjects. Carefully selected by Richard Feynman's daughter, Michelle Feynman, from his spoken and written legacy, including interviews, lectures, letters, articles, and books, the quotations are arranged under two dozen topics—from art, childhood, discovery, family, imagination, and humor to mathematics, politics, science, religion, and uncertainty. These brief passages—about 500 in all—vividly demonstrate Feynman's astonishing yet playful intelligence, and his almost constitutional inability to be anything other than unconventional, engaging, and inspiring. The result is a unique, illuminating, and enjoyable portrait of Feynman's life and thought that will be cherished by his fans at the same time that it provides an ideal introduction to Feynman for readers new to this intriguing and important thinker. The book features a foreword in which physicist Brian Cox pays tribute to Feynman and describes how his words reveal his particular genius, a piece in which cellist Yo-Yo Ma shares his memories of Feynman and reflects on his enduring appeal, and a personal preface by Michelle Feynman. It also includes some previously unpublished quotations, a chronology of Richard Feynman's life, some twenty photos of Feynman, and a section of memorable quotations about Feynman from other notable figures. Features: Approximately 500 quotations, some of them previously unpublished, arranged by topic A foreword by

Brian Cox, reflections by Yo-Yo Ma, and a preface by Michelle Feynman A chronology of Feynman's life
Some twenty photos of Feynman A section of quotations about Feynman from other notable figures Some notable quotations of Richard P. Feynman: "The thing that doesn't fit is the most interesting." "Thinking is nothing but talking to yourself inside." "It is wonderful if you can find something you love to do in your youth which is big enough to sustain your interest through all your adult life. Because, whatever it is, if you do it well enough (and you will, if you truly love it), people will pay you to do what you want to do anyway." "I'd hate to die twice. It's so boring."
