One Hundred Days Lukas Bärfuss 2012-10-04 When Swiss aid worker David Hohl arrives in Rwanda in 1990, he wants to know what it feels like to make a difference. Instead, he finds himself among expats, living a life of postcolonial privilege and boredom, and he begins to suspect that the agency is more concerned with political expedience than improving lives. But are his own motives any more noble? When civil war breaks out and David goes into hiding, he is forced to examine his own relationship to the country he wants to help and to the cosmopolitan Rwandan woman he wants to possess. As the genocide rages over the course of one hundred desperate days, the clear line David has always drawn between idealism and complicity quickly begins to blur.

Lexikon des Unwissens Kathrin Passig 2009-10-05 Wir glauben heute, unsere Welt sei weitgehend erforscht: So wie die Erde bis in die entlegensten Regionen hinein vermessen ist, sei fast alles irgendwann von irgendwem analysiert, erklärt, entschlüsselt und beschrieben worden, man müsse nur in dem Wust von Informationen herausfinden, wann und von wem. Doch die Landkarte des menschlichen Wissens weist erstaunlich viele weiße Flecken auf. Selbst auf Gebieten, auf denen wir es nicht vermuten würden, gibt es eine Fülle ungeklärter Fragen: Die Fortpflanzung der Aale ist ebenso rätselhaft wie die Wirkungsweise halluzinogener Drogen, über weibliche Ejakulation weiß man nicht mehr als über die Entstehung von Hawaii, über Dunkle Materie oder darüber, wie man sich einen Schnupfen holt. Warum klebt Klebeband? Wie kam das Leben auf die Erde? Was sind Kugelblitze? Niemand kennt die endgültigen Antworten darauf. Das «Lexikon des Unwissens» versammelt die erstaunlichsten Wissenslücken. Nie wurde das geballte Unwissen der Menschheit auf so engem Raum präsentiert.

The Travels and Adventures of Serendipity Robert K. Merton 2011-11-28 From the names of cruise lines and bookstores to an Australian ranch and a nudist camp outside of Atlanta, the word serendipity--that happy blend of wisdom and luck by which something is discovered not quite by accident--is today ubiquitous. This book traces the word's eventful history from its 1754 coinage into the twentieth century--chronicling along the way much of what we now call the natural and social sciences. The book charts

where the term went, with whom it resided, and how it fared. We cross oceans and academic specialties and meet those people, both famous and now obscure, who have used and abused serendipity. We encounter a linguistic sage, walk down the illustrious halls of the Harvard Medical School, attend the (serendipitous) birth of penicillin, and meet someone who "manages serendipity" for the U.S. Navy. The story of serendipity is fascinating; that of *The Travels and Adventures of Serendipity*, equally so. Written in the 1950s by already-eminant sociologist Robert Merton and Elinor Barber, the book--though occasionally and most tantalizingly cited--was intentionally never published. This is all the more curious because it so remarkably anticipated subsequent battles over research and funding--many of which centered on the role of serendipity in science. Finally, shortly after his ninety-first birthday, following Barber's death and preceding his own by but a little, Merton agreed to expand and publish this major work. Beautifully written, the book is permeated by the prodigious intellectual curiosity and generosity that characterized Merton's influential *On the Shoulders of Giants*. Absolutely entertaining as the history of a word, the book is also tremendously important to all who value the miracle of intellectual discovery. It represents Merton's lifelong protest against that rhetoric of science that defines discovery as anything other than a messy blend of inspiration, perspiration, error, and happy chance--anything other than serendipity.

Parisiana Poetria John of John of Garland 2020 John of Garland's *Parisiana poetria*, first published about 1220, expounds medieval poetic theory and summarizes contemporary thought about writing. European Identity Revisited Viktoria Kaina 2015-12-14 It has been argued that the emergence of a European collective identity would help overcome growing disparity caused by the increasing diversity of today's European Union, with 28 member states and more than 500 million people. Research on European integration is facing the pressing question of what holds 'Europe' together in times of crisis, growing distributional conflict and instability in its neighbourhood. This book departs from the ideas of group cohesion in the EU, and reflects on the newest dynamics and practices of European identity. Whilst applying innovative qualitative, quantitative and experimental research methods and an interdisciplinary approach, this volume looks at a variety of issues such as European citizenship, mobility of European citizens, space-based identities, dual identities, student identity and value-sharing. In doing so, this volume presents new perspectives on this complex and dynamic subject and points to potential solutions both in the academic discourse and the political practice of the EU. This text will be of key interest to scholars and students of European integration, European studies, international relations, citizenship studies, political sociology as well as more broadly in the social sciences.

The Concept of Water R D V Glasgow 2009 Water is commonly taken for granted and treated with contempt, yet it is the very foundation of human existence. Assuming countless forms, it is deeply associated both with life and death, body and soul, purity and pollution, creation and destruction. "The Concept of Water" seeks to bring together the various aspects of our deeply ambiguous relationship with water, providing a systematic account of its symbolic and philosophical significance. This involves looking at how water has been conceived and the role it has played in everyday thought, mythology, literature, religion, philosophy, politics and science, both across cultures and through history. R. D. V. Glasgow was born in Sheffield and currently lives in Zaragoza. His previous books are "Madness, Masks and Laughter" (1995), "Split Down the Sides" (1997), and "The Comedy of Mind" (1999).

Glow Ned Beaman 2015-01-20 South London, May 2010: foxes are behaving strangely, Burmese immigrants are going missing, and everyone is trying to get hold of a new party drug called Glow. A young man suffering from a rare sleep disorder will uncover the connections between all these anomalies in this taut, riveting new novel by a young writer hailed by The Guardian as "playful, arresting, unnerving, opulent, rude and—above all—deliciously, startlingly, exuberantly fresh." Twenty-two-year-old Raf spends his days walking Rose, a bull terrier who guards the transmitters for a pirate radio station, and his nights at raves in warehouses and launderettes. When his friend Theo vanishes without a trace, Raf's efforts to find him will lead straight into the heart of a global corporate conspiracy. Meanwhile, he's falling in love with a beautiful young woman he met at one of those raves, but he'll soon discover that there is far more to Cherish than meets the eye. Combining the pace, drama, and explosive plot twists of a thriller with his trademark intellectual, linguistic, and comedic pyrotechnics, Glow is Ned Beaman's most compelling, virtuosic, and compulsively readable novel yet.

Der offene Mund Lorenz Aggermann 2013-05-23 Die Weitung des Mundes markiert den Menschen grundlegend als ästhetisches Wesen. Daher ist es kaum verwunderlich, dass der offene Mund die Kultur- und Kunstgeschichte von der antiken Maske bis zur gegenwärtigen (Pop-)Performance durchzieht. Allerdings offenbart der geweitete Mund zuvorderst jene pathische Erfahrung, die sich weder auf Zeichen, Bilder oder Sprache reduzieren lässt. Wovon kündigt folglich der offene Mund? Was geht aus ihm

hervor? Anhand seiner vielfältigen und vieldeutigen Weitungen - Gähnen, Schreien, Heulen, Staunen, Sprechen, Lachen, Singen - beschreibt Lorenz Aggermann in seiner Studie den spielerischen Umgang mit den sonoren und affektiven Registern des Subjekts und etabliert derart eine anthropologisch grundierte Theorie der darstellenden Kunst. Zahlreiche Abbildungen bieten zudem eine kleine Phänomenologie des offenen Mundes.

Electroreception Theodore Holmes Bullock 2006-09-28 Electroreception has become one of the most revealing areas in the study of the neural basis of behavior, and neurobiologists recognize it as a model sensory system for experimental study. Through studies of electroreception, researchers have gained extensive knowledge about a complete sensory system, from molecular biology to computation, communication, and behavior. The book *Electroreception* will examine the behavior, structure, and function of the electrosensory systems of fish and other vertebrates. As a comprehensive volume on the subject, the book will serve as both an introduction to the study of electroreception and a reference and review volume for researchers in related fields.

Gender Meets Genre in Postwar Cinemas Christine Gledhill 2012-01-15 This remarkable collection uses genre as a fresh way to analyze the issues of gender representation in film theory, film production, spectatorship, and the contexts of reception. With a uniquely global perspective, these essays examine the intersection of gender and genre in not only Hollywood films but also in independent, European, Indian, and Hong Kong cinemas. Working in the area of postcolonial cinema, contributors raise issues dealing with indigenous and global cinemas and argue that contemporary genres have shifted considerably as both notions of gender and forms of genre have changed. The volume addresses topics such as the history of feminist approaches to the study of genre in film, issues of female agency in postmodernity, changes taking place in supposedly male-dominated genres, concepts of genre and its use of gender in global cinema, and the relationship between gender and sexuality in film. Contributors are Ira Bhaskar, Steven Cohan, Luke Collins, Pam Cook, Lucy Fischer, Jane Gaines, Christine Gledhill, Derek Kane-Meddock, E. Ann Kaplan, Samiha Matin, Katie Model, E. Deidre Pribram, Vicente Rodriguez Ortega, Adam Segal, Chris Straayer, Yvonne Tasker, Deborah Thomas, and Xiangyang Chen.

Morphosyntactic Variation in Medieval Celtic Languages Elliott Lash 2020-10-12 This book showcases the state of the art in the corpus-based linguistics of medieval Celtic languages. Its chapters detail theoretical advances in analysing variation/change in the Celtic languages and computational tools

necessary to process/analyse the data. Many contributions situate the Celtic material in the broader field of corpus-based diachronic linguistics. The application of computational methods to Celtic languages is in its infancy and this book is a first in medieval Celtic Studies, which has mainly concentrated on philological endeavours such as editorial and literary work. The Celtic languages represent a new frontier in the development of NLP tools because they pose special challenges, like complicated inflectional morphology with non-straightforward mappings between lemmata and attested forms, irregular orthography, and consonant mutations. With so much data available in non-electronic form and ongoing efforts to convert these data to computer-readable format, there is much room for the developing/testing of new tools. This book provides an overview of this process at a crucial time in the development of the field and aims to make the data accessible to computational linguists with an interest in diachronic change.

Colonialism, Antisemitism, and Germans of Jewish Descent in Imperial Germany Christian Davis 2012-01-26 Colonialism, Antisemitism, and Germans of Jewish Descent in Imperial Germany examines the relationship between the colonial and antisemitic movements of modern Germany from 1871 to 1918, examining the complicated ways in which German antisemitism and colonialism fed off of and into each other in the decades before the First World War. Author Christian S. Davis studies the significant involvement with and investment in German colonialism by the major antisemitic political parties and extra-parliamentary organizations of the day, while also investigating the prominent participation in the colonial movement of Jews and Germans of Jewish descent and their tense relationship with procolonial antisemites. Working from the premise that the rise and propagation of racial antisemitism in late-nineteenth-century Germany cannot be separated from the context of colonial empire, *Colonialism, Antisemitism, and Germans of Jewish Descent in Imperial Germany* is the first work to study the dynamic and evolving interrelationship of the colonial and antisemitic movements of the Kaiserreich era. It shows how individuals and organizations who originated what would later become the ideological core of

National Socialism---racial antisemitism---both influenced and perceived the development of a German colonial empire predicated on racial subjugation. It also examines how colonialism affected the contemporaneous German antisemitic movement, dividing it over whether participation in the nationalist project of empire building could furnish patriotic credentials to even Germans of Jewish descent. The book builds upon the recent upsurge of interest among historians of modern Germany in the domestic impact and character of German colonialism, and on the continuing fascination with the racialization of the German sense of self that became so important to German history in the twentieth century.

Fly Away, Pigeon Melinda Nadj Abonji 2014 Fly Away, Pigeon tells the heart-wrenching story of a family torn between emigration and immigration and paints evocative portraits of the former Yugoslavia and modern-day Switzerland. In this novel, Melinda Nadj Abonji interweaves two narrative strands, recounting the history of three generations of the Kocsis family and chronicling their hard-won assimilation. Originally part of Serbia's Hungarian-speaking minority in the Vojvodina, the Kocsis family immigrates to Switzerland in the early 1970s when their hometown is still part of the Yugoslav republic. Parents Miklos and Rosza land in Switzerland knowing just one word??work." And after three years of backbreaking, menial work, both legal and illegal, they are finally able to obtain visas for their two young daughters, Ildiko and Nomi, who safely join them. However, for all their efforts to adapt and assimilate they still must endure insults and prejudice from members of their new community and helplessly stand by as the friends and family members they left behind suffer the maelstrom of the Balkan War. With tough-minded nostalgia and compassionate realism, Fly Away, Pigeon illustrates how much pain and loss even the most successful immigrant stories contain. It is a work that is intensely local, while grounded in the histories and cultures of two distinctive communities. Its emotions and struggles are as universal as the human dilemmas it portrays.

Enzyklopädische Phantasien Monika Schmitz-Emans 2019 Jetzt Open Access. Literarische Texte sind wissensvermittelnden Darstellungsformen vielfach verpflichtet: Sie nutzen Formate wie etwa das des alphabetischen Lexikons, des Wörterbuchs oder des Atlas; sie stellen fiktionale Wesen und Welten in enzyklopädischer Form dar; sie treiben ihr reflexives Spiel mit Ordnungsmustern. Die Verbindung ästhetischer und epistemischer Impulse stimuliert insbesondere seit dem Surrealismus sowohl zu neuen Schreibweisen wie auch zu explorativer Buchgestaltung; zentrale Impulse gehen von Jorge Luis Borges und Roland Barthes aus. Am Leitfaden wichtiger Beispiele diskutiert Teil I des Bandes Formen und Poetiken des poetischen Dictionnaires, des Lexikonromans sowie literarischer und künstlerischer Enzyklopädistik. Herausgearbeitet wird insbesondere das Zusammenspiel von Wissensdiskursen, deren kritischer Reflexion und spielerisch-konstruktiven Gestaltungsverfahren literarisch-poetischer Werke. Teil II erörtert einschlägige Formate und Konzepte am Leitfaden einer alphabetischen Artikelreihe von 'Alphabet' bis 'Wörterbücher'. Teil III präsentiert 101 kommentierte Beispiele: Repräsentiert sind die fiktionale Literatur und die philosophische Essayistik, (auto-)biographische Werke, Satiren und Wissenschaftsparodien, eine mit literarischen Mitteln arbeitende Wissens(diskurs)geschichte sowie Verfahren künstlerischer Buchgestaltung.
