Morphologies of Asia and Africa Alan S. Kaye 2007-06-23 In 1997, Eisenbrauns published the highly-regarded two-volume Phonologies of Asia and Africa, edited by Alan Kaye with the assistance of Peter T. Daniels, and the book rapidly became the standard reference for the phonologies of the Afro-Asiatic languages. Now the concept has been extended, and Kaye has assembled nearly 50 scholars to write essays on the morphologies of the same language group. The coverage is complete, copious, and again will likely become the standard work in the field. Contributors are an international Who's Who of Afro-Asiatic linguistics, from Appleyard to Leslau to Voigt. It is with great sadness that we report the death of Alan Kaye on May 31, 2007, while these volumes were in the final stages of preparation for the press. Alan was diagnosed with bone cancer on May 1 while on research leave in the United Arab Emirates and was brought home to Fullerton by his son on May 22.

Modality, Aspect and Negation in Persian Azita Hojatollah Taleghani 2008 This monograph presents a morpho-syntactic investigation on modality, aspect, and negation by concentrating on Persian, and is designed to contribute to theoretical linguistics and the study of Iranian languages. The analysis is based on the Minimalist program. This research challenges the idea that the syntactic structure maps on the semantic interpretation or vice versa. The discussion presented in this monograph shows that the syntactic structure of Persian modals is uniform no matter if the modals are interpreted as having root or epistemic readings. Although it is claimed that modals are raising constructions in different languages, modals in Persian, which does not have subject-raising constructions, show a different syntactic behavior. Furthermore, the structural analysis of the interaction of Persian modals and negation shows that because of the scope interaction of negation and modals, the syntactic structure of modals with respect to negation mostly corresponds to the semantic interpretation of modals.
