**Dietary Reference Intakes for Vitamin C, Vitamin E, Selenium, and Carotenoids** Institute of Medicine 2000-08-27 This volume is the newest release in the authoritative series of quantitative estimates of nutrient intakes to be used for planning and assessing diets for healthy people. Dietary Reference Intakes (DRIs) is the newest framework for an expanded approach developed by U.S. and Canadian scientists. This book discusses in detail the role of vitamin C, vitamin E, selenium, and the carotenoids in human physiology and health. For each nutrient the committee presents what is known about how it functions in the human body, which factors may affect how it works, and how the nutrient may be related to chronic disease. Dietary Reference Intakes provides reference intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for different groups based on age and gender, along with a new reference intake, the Tolerable Upper Intake Level (UL), designed to assist an individual in knowing how much is "too much" of a nutrient.

The Art of Systems Architecting, Third Edition Mark W. Maier 2009-01-06 If engineering is the art and science of technical problem solving, systems architecting happens when you don't yet know what the problem is. The third edition of a highly respected bestseller, *The Art of Systems Architecting* provides in-depth coverage of the least understood part of systems design: moving from a vague concept and limited resources to a satisfactory and feasible system concept and an executable program. The book provides a practical, heuristic approach to the "art" of systems architecting. It provides methods for embracing, and then taming, the growing complexity of modern systems. New in the Third Edition: Five major case studies illustrating successful and unsuccessful practices Information on architecture frameworks as standards for architecture descriptions New methods for integrating business strategy and architecture and the role of architecture as the technical embodiment of strategy Integration of process guidance for organizing and managing architecture projects Updates to the rapidly changing fields of software and systems-of-systems architecture Organization of heuristics around a simple and practical process model A Practical Heuristic Approach to the Art of Systems Architecting Extensively rewritten to reflect the latest developments, the text explains how to create a system from scratch, presenting invention/design rules together with clear explanations of how to use them. The author supplies practical guidelines for avoiding common systematic failures while implementing new mandates. He uses a heuristics-based approach that provides an organized attack on very ill-structured engineering problems. Examining architecture as more than a set of diagrams and documents, but as a set of decisions that either drive a system to success or doom it to failure, the book provide methods for integrating business strategy with technical architectural decision making.

How Tobacco Smoke Causes Disease 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and

considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

**My Life Among the Underdogs** Tia Torres 2019-01-15 From one of the most respected figures in the dog rescue community come the harrowing, funny, and inspiring stories of nine incredible dogs that shaped her life. Tia Torres, beloved underdog advocate and star of Animal Planet's hit show *Pit Bulls & Parolees*, chronicles her roller-coaster life in this heartwarming memoir featuring some of her best-loved dogs. With inimitable honesty and characteristic brashness, Tia captures the spirit and heart of these intelligent and loving canines, while carrying us behind the scenes of her TV show, into the heart of post-Katrina New Orleans, onto the soundstages of Hollywood films, and even to the jungles of Sri Lanka. Tia has devoted her life to shattering the stereotype that pit bulls are dangerous, vicious predators. As the top dog at the Villalobos Rescue Center in New Orleans, the largest pit bull rescue in the United States, she and her team have rescued, rehabilitated, and rehomed hundreds of animals that might otherwise have been destroyed. As she puts it, "Most of the stories in this book are about animals (and a few humans) that needed someone to believe in them and a purpose in order to show their true nobility." Each dog Tia writes about here has overcome abuse, trauma, neglect, or just bad luck to become a stalwart, loving

companion to Tia and her family. You'll meet Duke, whose intelligence and matinee-idol looks made him a star in movies and music videos; Junkyard Joe, whose single-minded passion for tennis balls was channeled into expertise as a drug-sniffing dog; Bluie, the unswerving protector of Tia's daughter Tania; and a host of other unforgettable canines. *My Life Among the Underdogs* is above all a love story--one that is sure to grip the heart of anyone who has ever loved a dog.

*Child Protective Services* Diane DePanfilis 2003 From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based—including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Life of David Hockney Catherine Cusset 2019-05-14 Named a Best Book of the Year by The Advocate “Catherine Cusset’s book caught a lot of me. I could recognize myself.” —David Hockney With clear, vivid prose, this meticulously researched novel draws an intimate, moving portrait of the most famous living English painter. Born in 1937 in a small town in the north of England, David Hockney had to fight to become an artist. After leaving his home in Bradford for the Royal College of Art in London, his career flourished, but he continued to struggle with a sense of not belonging, because of his homosexuality, which had yet to be decriminalized, and his inclination for a figurative style of art not sufficiently “contemporary” to be valued. Trips to New York and California—where he would live for many years and paint his iconic swimming pools—introduced him to new scenes and new loves, beginning a journey that would take him through the fraught years of the AIDS epidemic. A compelling hybrid of novel and biography, Life of David Hockney offers an insightful overview of a painter whose art is as accessible as it is compelling, and whose passion to create has never been deterred by heartbreak or illness or loss.

**Hero Dogs** Wilma Melville 2019-01-08 Lola was a buckshot-riddled stray, lost on a Memphis highway. Cody was rejected from seven different homes. Ace had been sprayed with mace and left for dead on a train track. They were deemed unadoptable. Untrainable. Unsalvageable. These would become the same dogs America relied on when its worst disasters hit. In 1995, Wilma Melville volunteered as a canine search-and-rescue (SAR) handler with her Black Labrador Murphy in the aftermath of the Oklahoma City bombing. At the time, there were only fifteen FEMA certified SAR dogs in the United States. Believing in the value of these remarkable animals to help save lives, Wilma knew many more were needed in the event of future major disasters. She made a vow to help 168 dogs receive search-and-rescue training in her lifetime—one for every Oklahoma City victim. Wilma singlehandedly established the National Disaster Search Dog Foundation (SDF) to meet this challenge. The first canine candidates—Ana, Dusty, and Harley—were a trio of golden retrievers with behavioral problems so severe the dogs were considered irredeemable and unadoptable. But with patience, discipline, and love applied during training, they proved to have the ability, agility, and stamina to graduate as SARs. Paired with a trio of firefighters, they were among the first responders searching the ruins of the World Trade Center following 9/11—setting the standard for the more than 168 of the SDF’s search-and-rescue dogs that followed. Beautiful and heart-wrenching, *Hero Dogs* is the story of one woman’s dream brought to fruition by dedicated volunteers and firefighters—and the bonds they forged with the incredible rescued-turned-rescuer dogs to create one of America’s most vital resources in disaster response.

*Epilepsy Across the Spectrum* Institute of Medicine 2012-07-29 Although epilepsy is one of the nation's

most common neurological disorders, public understanding of it is limited. Many people do not know the causes of epilepsy or what they should do if they see someone having a seizure. Epilepsy is a complex spectrum of disorders that affects an estimated 2.2 million Americans in a variety of ways, and is characterized by unpredictable seizures that differ in type, cause, and severity. Yet living with epilepsy is about much more than just seizures; the disorder is often defined in practical terms, such as challenges in school, uncertainties about social situations and employment, limitations on driving, and questions about independent living. The Institute of Medicine was asked to examine the public health dimensions of the epilepsies, focusing on public health surveillance and data collection; population and public health research; health policy, health care, and human services; and education for people with the disorder and their families, health care providers, and the public. In *Epilepsy Across the Spectrum*, the IOM makes recommendations ranging from the expansion of collaborative epilepsy surveillance efforts, to the coordination of public awareness efforts, to the engagement of people with epilepsy and their families in education, dissemination, and advocacy for improved care and services. Taking action across multiple dimensions will improve the lives of people with epilepsy and their families. The realistic, feasible, and action-oriented recommendations in this report can help enable short- and long-term improvements for people with epilepsy. For all epilepsy organizations and advocates, local, state, and federal agencies, researchers, health care professionals, people with epilepsy, as well as the public, *Epilepsy Across the Spectrum* is an essential resource.

*Tropes of Transport* Katrin Pahl 2012-02-29 Intervening in the multidisciplinary debate on emotion, *Tropes of Transport* offers a fresh analysis of Hegel's work that becomes an important resource for Pahl's cutting-edge theory of emotionality. If it is usually assumed that the sincerity of emotions and the force of affects depend on their immediacy, Pahl explores to what extent mediation—and therefore a certain degree of manipulation but also of sympathy—is constitutive of emotionality. Hegel serves as a particularly helpful interlocutor not only because he offers a sophisticated analysis of mediation, but also because, rather than locating emotion in the heart, he introduces impersonal tropes of transport, such as trembling, release, and shattering.
