Principles of Metal Refining and Recycling Thorvald Abel Engh 2021-10-23 Principles of Metal Refining and Recycling provides a self-contained introduction to the field of purification and recycling of metals. The scientific principles in the treatment of the various metals are the same. The importance of using a clean and properly alloyed metal is described in detail. The text covers thermodynamics, physical and transport properties, mixing, mass transfer and numerical models. It describes methods for removal of dissolved impurity elements, particles, and inclusions. It considers important aspects of the solidification process, remelting and adding of alloys. Recycling, future challenges and specific processes for each metal are discussed in detail. The book is a greatly extended update of the 1992 book *Principles of Metal Refining* by T. Abel Engh. It includes in particular the subjects of metal recycling, ferrous and non-ferrous metal refining, and metalloids like silicon.

Artificial Intelligence in Marketing IntroBooks Team Artificial intelligence in marketing, which is commonly known as AI Marketing, is a process of striking a chord of linkage between customer statistics and artificial intelligence hypotheses. It is basically an automated learning curve for a business house on the marketing front such that it can predict a customer's ongoing move and the next phase of action. By doing so, a business entity can easily amplify its outlook in the interests of the customer, which, in turn, displays the quality of relevant products or services in an intelligent manner to reach a larger audience. Due to the emergence of artificial intelligence marketing solutions, an effective recourse is seen apparent in terms of bonding between scientific data points, which are amassed industriously for subsequent implementation. In other words, the erstwhile process of manual hard work of assembling and analyzing a colossal quantum of data has surely become a thing of the past.

Museum of Unheard (Of) Things Roland Albrecht 2015-11-05 MUSEUM OF UNHEARD (OF) THINGS is the catalogue raisonne of the world-famous "literary cabinet of curiosities" in Berlin, which holds the record of being the most visited museum in the German capital (if one offsets the number of visitors to the square meters of the exhibition space). The museum collects unique objects to which curator Roland Albrecht has patiently lent his ear in order to hear the unheard (of) story each of them has to tell. This book is the first publication to assemble all the 78 stories in the current collection, all categorized according to weight, translated into English for the first time. Included are unheard (of) tales about a clock of a Swiss inventor who promoted "New-Time"-where the day was only twenty hours long, an hour fifty minutes, and a minute fifty seconds- and was subsequently arrested by the authorities, the first portrait ID card in history created for Michel de Montaigne, a fork which reveals the secret history of a meeting of chefs in the Alps, the stone that inspired Thomas Mann to write many of his stories, or the scandalous relationship between the Brothers Grimm and alphabet soup. The book ends with a story about the museum itself which may make some readers ponder about the veracity of its existence. These extraordinary tales of seemingly ordinary objects invite the reader to imagine the world differently by listening more carefully and intimately to all the things that surround our everyday lives. "The present is always a story presented by the winners of history. With a gaze kindred to Walter Benjamin's, Albrecht collects things which appear utterly trivial in the given here and now. With patience kindred to Sigmund Freud's, he listens to them until they start revealing their stories. With a playful spirit kindred to Jorge Luis Borges, he writes them down. The result is a gentle but persistent wake-up call in the form of short stories, which cracks the tyranny of present and offers a glimpse into the unheard (of) world of things devoid of victors and losers, but full of tales that await to be told." - CODY EIKMAN "Berlin exists for Museum der Unerhorten Dinge, or maybe the whole world exists for this small museum. Finally its secrets have been translated into English from German." - TOMOMI ADACHI"

Rachel Ashwell Shabby Chic Interiors Rachel Ashwell 2009-10-08 Romantic florals reclining against pure white linen, ruffles of muslin skirting a bed base against bleached floorboards, the deep comfort of a simple nest of fluffy towelsâ€¦ This is Rachel Ashwellâ€™s signature style that for the past 20 years has been a major influence in our modern lives. *Chic Interiorsâ€™ My Rooms, Treasures, and Trinkets*, an eclectic book of quirky inspiration, falls into chapters according to location, and begins with Rachelâ€™s breathtaking Los Angeles residence. Next, we wander into a photographerâ€™s minimalist mountain-top home in the Hollywood hills before heading to the coast and a beautiful Malibu beach cottage. A truly bohemian hideout in southern California is next on the journey, followed by a peek at celebrity homes, including the house that once belonged to Marilyn Monroe. With rooms combining flea-market finds and objects of pure functionalityâ€¦ an elegant French mirror reflecting a painting, a bejeweled metallic candle holder sitting by a cluster of willow-patterned china, a single faded velvet pillow lounging under the twinkle of a vintage chandelierâ€¦ this book

celebrates all that is wonderfully Shabby Chic.

Paperclay Rosette Gault 2018-10-09 Now firmly established in the ceramics world, paperclay is a vital part of the modern clay artist and potter's repertoire. The workability of this material allows expressive freedom and imagination at every stage in the creative process, from wet to dry. Paperclay, made with new or recycled paper, is remarkable for its flexibility, unfired strength, and the ease with which it can be repaired, and allows the creation of beautiful finished forms. Building on the immense success of her previous *Ceramics Handbook Paper Clay*, pioneering artist, researcher and teacher Rosette Gault (M.F.A.) explains how potters and clay sculptors can make, fire and use the material. In addition to the basics, she introduces more advanced techniques for building armatures, sculpting figures and making works for the wall. Packed throughout with photographs of inspiring works by a new generation of paperclay artists, *Paperclay: Art and Practice* is an essential introduction to the medium.

Crobots Nelly Pailloux 2011-08-01 Amigurumi--Japanese for cute, little stuffed dolls. (See cute book cover if you're having trouble with the translation.) It's the latest and hottest craft craze among young and trendy crafters. *Crobots* features a 20-strong army of charming, cuddly amigurumi designs such as **BigBot**, **BabyBot** (don't let his age fool you), **Geisha**, **DogBot**, **CatBot**, and **Thinker**. The pattern for each design is simple enough for crochet novices, yet can be adapted to keep the experts interested and amused.

Made by Dad Scott Bedford 2013-05-07 *The Snail Soup Can Decoy* to keep the candy stash safe. The Customizable "Keep Out" Sign to deter meddlesome siblings and parents. A Bunk Bed Communicator made from cardboard tubes ("Psst! Can you keep the snoring down?"). Clever, whimsical, and kind of genius, here are 67 unique projects that will turn any dad with DIY leanings into a mad scientist hero that his kid(s) will adore. No screens, no hi-tech gadgetry. Made by Dad combines the rough-edged, handmade ethos of a Boy Scout manual or *The Dangerous Book for Boys* with a sly sense of humor that kids love. Scott Bedford, a creative director by day and Webby Award-winning blogger by nights and weekends, wields an X-ACTO knife, magic marker, and prodigious imagination to create endlessly delightful projects for his two sons. He knows that kids like contraptions and gadgets, things that are surprising—a chair that appears to be balanced on eggshells. Things that are complex—a multilevel city, with buildings, tunnels, and roads, built from old boxes around the legs of a table. And especially things with humor—the Snappy Toast Rack, made to resemble a crocodile's gaping mouth. The projects are shown in full-color photographs, and the instructions are illustrated in detailed line drawings that exude personality. Some are quick and simple enough to be done in a coffee shop; others are more of an afternoon project—yielding hours and hours of rich, imaginative playtime.

Calligraphic Ornaments 1997 Add a note of elegance to countless graphic arts and craft projects with 166 black-and-white designs depicting lovely swirls and curlicues reminiscent of 18th-century pen flourishes. Designed by Kiyoshi Takahashi, these copyright-free motifs will add a delicate touch to ads, newsletters, posters, scrolls, certificates and more.

Holding the Man Timothy Conigrave 1996-07-02 The mid-seventies – and satin baggies and chunky platforms reigned supreme. Jethro Tull did battle with glam-rock for the airwaves. At an all-boys Catholic school in Melbourne, Timothy Conigrave fell wildly and sweetly in love with the captain of the football team. So began a relationship that was to last for 15 years, a love affair that weathered disapproval, separation and, ultimately death. *Holding the Man* recreates that relationship. With honesty and insight it explores the highs and lows of any partnership: the intimacy, constraints, temptations. And the strength of heart both men had to find when they tested positive to HIV. This is a book as refreshing and uplifting as it is moving; a funny and sad and celebratory account of growing up gay.

Experiments in Ethics Kwame Anthony Appiah 2010-03-30 In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of “experimental philosophy,” provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Collected Interiors Philip Mitchell 2021-10-26 Modern maximalist designer Philip Mitchell reveals his talent for blending collections, family heirlooms, contemporary art, and accessories in visually creative environments that are brimming with personality, color, authenticity, and warmth. The elegant, clean classicism of Philip Mitchell’s style is on full display in these homes, where he masterfully incorporates a wide-ranging mix of antiques, vintage collectibles, and contemporary pieces—everything from inherited furniture collections to modern art—in rooms that are filled with memories and warmth. As a master of what he calls modern maximalism, Mitchell embraces the challenge of taking wonderful things that a homeowner already has and making more of them. Once Mitchell has established a connecting thread among a variety of disparate pieces—whether through finish, material, scale, color, texture, or line—he starts the process of building the relationships that bring a space to life. Brilliant photographs take readers on in-depth tours of nine homes, ranging from an elegant Upper East Side pied-à-terre to a classic cottage on the water in Nova Scotia. Mitchell’s personal narrative in elegant text enlightens, while his takeaways accompanying each home help readers understand how to blend new and old, mix colors and patterns, and fill a home with an eclectic mix that is truly their own.

Ultrafast All-Optical Signal Processing Devices Dr. Hiroshi Ishikawa 2008-09-15 Semiconductor-based Ultra-Fast All-Optical Signal Processing Devices –a key technology for the next generation of ultrahigh bandwidth optical communication systems! The introduction of ultra-fast communication systems based on all-optical signal processing is considered to be one of the most promising ways to handle the rapidly increasing global communication traffic. Such systems will enable real time super-high definition moving pictures such as high reality TV-conference, remote diagnosis and surgery, cinema entertainment and many other applications with small power consumption. The key issue to realize such systems is to develop ultra-fast optical devices such as light sources, all-optical gates and wavelength converters. *Ultra-Fast All-Optical Signal Processing Devices* discusses the state of the art development of semiconductor-based ultrafast all-optical devices, and their various signal processing applications for bit-rates 100Gb/s to 1Tb/s. *Ultra-Fast All-Optical Signal Processing Devices: Provides a thorough and in-depth treatment of the most recent achievements in ultrafast all-optical devices Discusses future networks with applications such as HD-TV and super-high definition moving screens as a motivating background for devices research Covers mode-locked semiconductor lasers, electro-absorption modulator based 160Gb/s signal sources, SOA based symmetric Mach-Zehnder type all-optical gates, intersubband transition gate device, and more Explains the technical issues behind turning the ultra-fast optical devices into practical working tools Examples of above 160Gb/s transmission experiments Discusses future prospects of the ultra-fast signal processing devices This invaluable reference will provide device researchers and engineers in industry, researchers at universities (including graduate students, and post doctoral researchers and professors) and research institutes with a thorough understanding of ultrahigh bandwidth optical communication systems. Device and communication market watchers will also find this book useful.*

Experimental Preservation Jorge Otero-Pailos 2016-07 Old things, historic things, smelly dirty things, all the things that were considered the very opposite of "contemporary," have suddenly irrupted forcefully into architecture and art, blurring their boundaries. This book takes stock of the emerging generation behind this turn, and examines their experimental engagements with the preservation of culturally charged objects. Structured around a series of interdisciplinary dialogues among practitioners and thinkers, and illustrated with recent projects, the book provides a window into the unfolding intellectual frameworks, aesthetic modes, cultural ambitions, and political commitments that are the basis of experimental preservation.

Sewing Secrets 2017 "Sewing secrets is a limited edition artists' book that explores personal sewing-related experiences. Sewing is part of our heritage and throughout history there has been an expectation that every girl should be taught the necessary sewing skills to enable her to run a successful home. These skills would either be passed down from mother or grandmother, or taught at school as part of home economics or needlecraft classes. This publication offers memories of sewing traditions, guilty pleasures and the odd act of rebellion, all of which highlight our relationship with needle and thread. The book is formed of 12 dress pattern envelopes that are zig-zagged stitched together; within each 'envelope' is an individually typed story illustrated using collage and letterpress" - from the-case.co.uk website.

Notamuse Silva Baum 2019-05 Speaking about women graphic designers and their lack of visibility in the design scene without placing the focus on their gender.
