The Elephant Jenni Desmond 2018 From Africa to Asia, the elephant makes its home. Light on their feet, despite their great weight, these magnificent creatures appear light and graceful because they're always walking on their tip-toes. They have excellent hearing and can detect the rumblings of other elephants from six miles away. And, just like humans being right handed or left handed, elephants can be right tusked or left tusked!

**Ozeane** Françoise Latour 2011 Dieses wunderbare Buch entführt uns in die geheimnisvollen Tiefen unserer Ozeane. Es macht deutlich, dass diese unsichtbare Unterwasserwelt, die einen grossen Teil der Erde bedeckt, ein Reservoir unglaublicher biologischer Vielfalt ist. Ob Plankton, Korallen, Delfine, Haie oder Wale: All diese Lebewesen werden porträtiert, ihre Rolle im Gesamtgefüge Ozean wird erläutert. Aber auch der schonungslose Umgang und die erbarmungslose Ausbeutung der Meere durch den Menschen ist Thema dieses Buches. Prachtvolle Fotos stehen im Kontext detaillierter Informationen über den Ist-Zustand unserer Meere. Ein Buch, das jeder, der das Meer liebt, mit Gewinn lesen wird! Milliarden winziger Planktonorganismen bilden die Lebensgrundlage des Ökosystems Ozeans, das sich geheimnisvolle Tiefseebewohner mit erstaunlichen Fähigkeiten teilen mit perfekt angepassten Jägern wie den Haien, mit Meeressäugern wie den verspielten Delfinen und den beeindruckenden grossen Walen. Auf den letzten Seiten des Buches werden die "Botschafter der Meere" vorgestellt: Menschen, die sich mit Leib und Seele der Bewahrung und dem Schutz der Ozeane verschrieben haben. **Shut Up, Stop Whining, and Get a Life** Larry Winget 2011-07-08 Shut Up, Stop Whining, and Get a Life was immediately hailed as "not your average self-help book" and demanded attention and praise right out of the gate. It is now considered one of the icons of the personal development movement. Now, Larry Winget is back with his signature caustic, no-nonsense, hilarious style, which earned him the titles "Pitbull of Personal Development®" and "World's Only Irritational Speaker®." Winget's "get off your butt and go to work" approach to self-improvement boils success down to a simple formula: Everything in your life gets better when you get better. Get tangible advice from one of the world's most successful speakers and the author of five bestselling books and television personality. Learn the keys to turning your life, money and business around. Stop making excuses, stop blaming others and take responsibility for your life and your results The brutal advice he offers has changed the lives of millions of people and increased sales for countless businesses. In this Second Edition of Shut Up, Stop Whining, and Get a Life, Winget takes the same principles and expands the lessons with brand new examples, stories, and added wisdom. It may sound ruthless, but your life is your own fault and if you shut up, stop whining, and take action you can create a better life.

**Face to Face with Manatees** Brian Skerry 2010 This series goes behind the scenes with the people who research and photograph wild animals to put the reader right into the action; each title includes a scientific experiment, a glossary, a facts at a glance section and more.

*Tales from the Heavens* Sergio Bambaren 2011-10-28 A comet that teaches the Sun that love is the most important gift of life; a butterfly that late in life discovers that true beauty resides within one's heart; A child that wants to fly his kite so high that it will reach the skies...With simple, yet deep

stories, Sergio Bambaren gives us a life's lesson that we should never forget: "Beware how you see the world, because the world will be exactly as you see it."

*The Blue Wonder* Frauke Bagusche 2021-06-08 An intimate account of the beauty, mystery, and amazing science of the ocean. In *The Blue Wonder*, marine biologist and diver Frauke Bagusche brings readers on a fascinating and beautiful deep-sea dive into the ocean. Drawing on scientific discoveries and her own research, she uses photographs and playful prose to reveal: deep-sea reefs that glitter like glass fish that converse with each other by singing--loudly an octopus that imitates more than fifteen other animals the secret behind why the sea glows at night "weddings" that happen amongst the coral underwater "drugstores" and even fish that clean her own teeth! Humans know more about the moon's surface than we do about the ocean. There is so much to be discovered, under the sea. With the heart of a poet and the mind of a scientist, Frauke Bagusche re-awakens our love for the sea and ignites a desire to protect this vital habitat.

**The Natural History of Shrews** Sara Churchfield 1990 'Churchfield . . . has provided a comprehensive volume that synthesizes a wealth of information about shrew ecology and life history.'--Choice In this book, Sara Churchfield offers an encyclopedic coverage of shrews, describing in great detail their life cycle and breeding biology. Her comprehensive treatment of these ubiquitous animals examines their life history, social organization, communication and orientation, food and foraging, energetics, community structure and habitat, and relationship to humans.

*Improbable Destinies* Jonathan B. Losos 2017-08-08 A major new book overturning our assumptions about how evolution works Earth's natural history is full of fascinating instances of convergence: phenomena like eyes and wings and tree-climbing lizards that have evolved independently, multiple times. But evolutionary biologists also point out many examples of contingency, cases where the tiniest change—a random mutation or an ancient butterfly sneeze—caused evolution to take a completely different course. What role does each force really play in the constantly changing natural world? Are the plants and animals that exist today, and we humans ourselves, inevitabilities or evolutionary flukes? And what does that say about life on other planets? Jonathan Losos reveals what the latest breakthroughs in evolutionary biology can tell us about one of the greatest ongoing debates in science. He takes us around the globe to meet the researchers who are solving the deepest mysteries of life on Earth through their work in experimental evolutionary science. Losos himself is one of the leaders in this exciting new field, and he illustrates how experiments with guppies, fruit flies, bacteria, foxes, and field mice, along with his own work with anole lizards on Caribbean islands, are rewinding the tape of life to reveal just how rapid and predictable evolution can be. *Improbable Destinies* will change the way we think and talk about evolution. Losos's insights into natural selection and evolutionary change have far-reaching applications for protecting ecosystems, securing our food supply, and fighting off harmful viruses and bacteria. This compelling narrative offers a new understanding of ourselves and our role in the natural world and the

COSMOS.

**Journey of the Pink Dolphins** Sy Montgomery 2009-02-15 By the acclaimed author of *The Soul of an Octopus* and the bestselling memoir *The Good Good Pig*. When Sy Montgomery ventured into the Amazon to unlock the mysteries of the little-known pink dolphins, she found ancient whales that plied the Amazon River at dawn and dusk, swam through treetops in flooded forests, and performed underwater ballets with their flexible bodies. But she soon found out that to know the botos, as the dolphins are locally called, you must also know the people who live among them. And so in *Journey of the Pink Dolphins*, Montgomery—part naturalist, part poet, part Indiana Jones—winds her way through watery tributaries and riverside villages, searching for botos and hearing the tales of locals who believe these ethereal dolphins are shape-shifters—creatures that emerge from the water as splendidly dressed men or women only to enchant their human onlookers, capture their souls, and then carry them away to the Encante, an underwater world. Montgomery takes readers on four separate journeys, exploring the river-dwelling dolphins' natural history, chronicling their conservation pressures, unraveling their prehistoric roots, and visiting with shamans who delve into the Encante.

**Lachen, Leiden, Lust am Leben** Willibert Pauels 2018-09-24 »Es ist nicht bekloppt, an Gott zu glauben.« (Willibert Pauels) Konfrontiert mit der These vieler Atheisten, als aufgeklärter Mensch sei es doch geisteskrank, noch an Gott zu glauben, fragt Willibert Pauels sich: »Bin ich bekloppt? Warum kann ich nicht aufhören, an Gott zu glauben?« Dieser Frage geht er in »Lachen, Leiden, Lust am Leben« nach. Im Vordergrund stehen dabei die ganz großen Fragen: Gibt es Gott? Wenn ja, warum lässt er das Leid in der Welt zu? Was ist mit dem Tod? Antworten auf diese Fragen nähert Pauels sich in gewohnt lockerem Ton. Es geht ihm weniger um Studien, Statistiken und stringente Argumentationen, sondern vielmehr um das, was ihn schon bewegt, seit er Kind ist: die Erfahrung der Sehnsucht nach Gott, die Erfahrung der Nähe Gottes und auch der Gottferne. Auf dem Highway to heaven Freiheit und Religion gehören zusammen Wirklich gläubig ist der betende Zweifler Humor ist eine Erscheinungsform der Religion

**Cosmic Biology** Louis Neal Irwin 2010-12-08 In *Cosmic Biology*, Louis Irwin and Dirk Schulze-Makuch guide readers through the range of planetary habitats found in our Solar System and those likely to be found throughout the universe. Based on our current knowledge of chemistry, energy, and evolutionary tendencies, the authors envision a variety of possible life forms. These range from the familiar species found on Earth to increasingly exotic examples possible under the different conditions of other planets and their satellites. Discussions of the great variety of life forms that could evolve in these diverse environments have become particularly relevant in recent years with the discovery of around 300 exoplanets in orbit around other stars and the possibilities for the existence of life in these planetary systems. The book also posits a taxonomic classification of the various forms of life that might be found, including

speculation on the relative abundance of different forms and the generic fate of living systems. The fate and future of life on Earth will also be considered. The closing passages address the Fermi Paradox, and conclude with philosophical reflections on the possible place of Homo sapiens in the potentially vast stream of life across the galaxies.

**Will Happiness Find Me?** Peter Fischli 2003 Artwork by Peter Fischli, David Weiss.

**To Night Owl From Dogfish** Holly Goldberg Sloan 2019-02-12 From two extraordinary authors comes a moving, exuberant, laugh-out-loud novel about friendship and family, told entirely in emails and letters. Avery Bloom, who's bookish, intense, and afraid of many things, particularly deep water, lives in New York City. Bett Devlin, who's fearless, outgoing, and loves all animals as well as the ocean, lives in California. What they have in common is that they are both twelve years old, and are both being raised by single, gay dads. When their dads fall in love, Bett and Avery are sent, against their will, to the same sleepaway camp. Their dads hope that they will find common ground and become friends--and possibly, one day, even sisters. But things soon go off the rails for the girls (and for their dads too), and they find themselves on a summer adventure that neither of them could have predicted. Now that they can't imagine life without each other, will Bett and Avery (who sometimes call themselves Night Owl and Dogfish) figure out a way to be a family?

Whales & Dolphins Caroline Bingham 2003 A brief introduction to the physical characteristics and behavior of various marine mammals, particularly whales and dolphins.

*The Guardian of the Light* Sergio Bambaren 2011-10-23 When Martin meets Paola during a business trip to Chile, he is charmed by her sensibility and simplicity. But living in different countries, everything points out that they will never see each other again; however, a series of magical events will make them fall in love and plan a future together. Love leads them to accept the challenge of transforming an old and abandoned lighthouse that overlooks the Pacific Ocean into their dream house; and without planning it, they meet an old man that will change their lives forever: the guardian of the light. A

wonderful love story that encourages us to trust the power of love: capable to overcome prejudices, distance, and all the impossible odds that can only be overcome by crossing the crystal walls that life and society places in our hearts and in our minds.

*Seventy Years of Exploration in Oceanography* Klaus Hasselmann 2010-04-08 It all began with Markus Jochum approaching one of us (HvS) - "when you guys are doing interviews with senior scientists from oceanography and related sciences, why are you not doing Walter Munk?" Indeed, why not? Walter Munk, an icon in oceanography, had just given a wonderful talk in a symposium in honor of his 90th birthday, sweeping a grand circle from his earliest work with Chip Cox on airborne measurements of ocean surface roughness to the latest satellite data - not simply a review, but the struggle of an active scientist opening up new perspectives - as inspiring and stimulating as when one of us (KH) first met him at the Ocean Waves Conference in Easton in 1961 (Fig. I. 1). Walter immediately agreed to share with us his recollections on the nearly seventy years of his path-breaking contributions in a sheer amazing range of topics, from ocean waves, internal waves, ocean currents, tides, tsunamis, sea level, microseisms and the rotation of the earth to ocean acoustic tomography. With "you guys" Markus was referring to HvS and the various partners HvS had invited to join him in conducting a series of interviews of retired colleagues.

**Hello Ruby: Journey Inside the Computer** Linda Liukas 2017-10-03 What exactly is a computer? How does it work? What is it made of? Learn all this and more with Ruby! **Before We Leave You** Patricia Cori 2011-04-26 What if whales and dolphins truly do have a superior intellect, as many believe, and can speak to the human race? What would their message be? In November 2008, gifted clairvoyant Patricia Cori was in Jordan teaching a workshop when a life-changing event occurred. A community of Cetaceans—"a choir of whales and dolphins," as she describes it—interrupted her talk with a frantic plea for help. Cori was suddenly witness to a devastating scene of suffering, a communal grieving of scores of whales and dolphins "frenzied, lost, and dying." This was the first of several terrifying calls for help, all of which were immediately followed by mass suicide events as these majestic creatures collectively chose to leave us and our planet. These troubling incidents evolved into the stream of messages for humanity that Cori reveals in this extremely timely work. The whales and dolphins present their deep understanding of our urgent global situation, calling for the human race to restore balance to our ecosystems—especially our dying oceans. For the first time, we read the communications of the Cetaceans and their story of devotion and celebration of life on the Great Planet Earth. We are also given a glimpse of their role in the unfolding of galactic events throughout our solar system, and the message is clear: We must wake up and realize that our continued abuse of the environment is altering the course of Gaia's progression to the next dimension. Without the whale and dolphin song—without these musicians who hold the oceans in balance—we risk our advancement through the ascension process for which our entire solar system is destined. Before We Leave You is a roadmap to that higher future and a pathway to global transformation. \*\*\*NOTE: ELECTRONIC VERSION OF THIS TITLE DOES NOT INCLUDE THE CETACEAN MEDITATIONS CARDS INCLUDED IN THE REGULAR PRINTED VERSION.

Sea Patricia Hegarty 2021-05-05 A colourful array of sea creatures is brought to life by award-winning illustrator Britta Teckentrup in this delightful peep-through book.

**Mysterious Ocean** Peter Townsend Harris 2019-06-12 This book provides an introduction to ocean sciences that is engaging, evocative and accessible to non-experts interested in marine geoscience, while sparking readers' interest in important unsolved mysteries in marine science. The scope of the book is quite broad, but focuses on the physical ocean and its geological evolution, including the author's experiences working as an oceanographer over the last thirty years. Across ten chapters, the book traces the origins of the ocean from its formation 4 billion years ago, reviews the discoveries of the theory of plate tectonics, the ice ages and the great ocean conveyor, and discusses seafloor features (canyons, seamounts, trenches, abyssal plains, etc.), how they formed and their current environmental issues. The book concludes with a prognosis for the future ocean we might expect with global climate change and other human impacts.
