Murrinhpatha Morphology and Phonology John Mansfield 2019-04-01 Murrinhpatha is an Australian Aboriginal language spoken in a region of tropical savannah and tidal inlets on the north coast of the continent. Some 3000 speakers live mostly in the towns of Wadeye and Nganmarriyanga, though they maintain close ties to their traditional lands, totems and spirit ancestors. Murrinhpatha word structure is highly complex, and quite distinct from the better-known Pama-Nyungan languages of central and southern Australia. Murrinhpatha is characterised by prolific compounding, clitic clusters, cumulative inflection, irregular allomorphy and phonological assimilation. This book provides a comprehensive account of these phenomena, giving particular attention to questions of morphological constituency, lexical storage, and whether there is really such thing as a 'word' unit.

In Order to Learn Frank E. Ritter 2007-07-30 Order affects the results you get: Different orders of presenting material can lead to qualitatively and quantitatively different learning outcomes. These differences occur in both natural and artificial learning systems. In Order to Learn shows how order effects are crucial in human learning, instructional design, machine learning, and both symbolic and connectionist cognitive models. Each chapter explains a different aspect of how the order in which material is presented can strongly influence what is learned by humans and theoretical models of learning in a variety of domains. In addition to data, models are provided that predict and describe order effects and analyze how and when they will occur. The introductory and concluding chapters compile suggestions for improving learning through better sequences of learning materials, including how to take advantage of order effects that encourage learning and how to avoid order effects that discourage learning. Each chapter also highlights questions that may inspire further research. Taken together, these chapters show how order effects in different areas can and do inform each other. In Order to Learn will be of interest to researchers and students in cognitive science, education, machine learning.

Reading Achievement and Motivation in Boys and Girls Pelusa Orellana García 2018-05-02 This volume links theoretical and instructional approaches on how reading is motivated and assessed, and examines the interrelationship between reading motivation and achievement among boys and girls in culturally and geographically different settings. Much of the research on children's reading has focused on cognitive processes; however, reading is an activity that also requires interest and motivation. These attitudes are generally defined as readers' affect toward reading and their consequence is that children with more positive attitudes are more motivated to read. Taking into account the variability that exists within the notion of gender and age, this volume aims to examine and scrutinize previous research on the topic, as well as test theories on how the different dimensions of reading motivation vary with gender, in relation to cultural issues, motivational constructs, such as engagement and classroom climate, the role of emotions, interests and attitudes towards reading, among others. The book will be of interest to researchers, educators, graduate students, and other professionals working in the area of literacy, reading motivation, reading achievement and gender differences.
